1. INTRODUCTION

A. What Is the Coastal General Plan?

Every city and county in California is required by State law to have a General Plan. A General Plan is a legal document that serves as the community's "constitution" for land use, development and conservation. A General Plan must be comprehensive and long term, outlining proposals for the physical development of the city and any land outside its boundaries which in the City's judgment bears relation to its planning. The Coastal General Plan achieves these goals for the Coastal Zone in the City of Fort Bragg.

State law specifically requires that the General Plan address seven topics or "elements." These are land use, circulation (transportation), housing, conservation, open space, noise, and safety. The General Plan may also address other topics the community feels are relevant to its development. All of the City's land use regulations for the Coastal Zone, including zoning and subdivision regulations, specific plans, and redevelopment plans must conform to the Coastal General Plan. The Coastal General Plan serves the following functions:

- Expresses the community's vision of the future physical development of Fort Bragg in the Coastal Zone.
- Enables the Planning Commission and the City Council to establish long-range conservation and development policies in the Coastal Zone.
- Provides the basis for judging whether specific private development proposals and public projects are consistent with these policies in the Coastal Zone.
- Informs the residents, developers, decision makers, and other jurisdictions of the ground rules that will guide development and conservation in the Coastal Zone.

The Coastal General Plan consists of narrative text and maps, along with goals, policies, and programs. It is organized into seven elements required by State law, and an optional element dealing with Community Design.

The eight elements of the Coastal General Plan are summarized below:

1. *Land Use*: Establishes land use designations with types and intensities of land use, and policies and programs regarding – redevelopment – and maintenance of coastal-dependent businesses.
2. *Public Facilities*: Establishes the essential public facilities and services to ensure that the existing and future population of Fort Bragg is provided with the highest feasible level of public services.
3. *Circulation*: Contains policies and Levels of Service standards for the roadway system, as well as policies for public transit, bicycle facilities, parking and transportation for the mobility

impaired, taking into account the relationship between land use and transportation needs of the community.

4. *Conservation, Open Space, Energy, and Parks*: Contains the State-mandated open space and conservation elements. Emphasis is placed on protecting the City's natural resources, protecting and enhancing environmentally sensitive areas, and providing open space and parks to meet the community's recreational needs. This element also includes specific policies and programs to ensure continued public access, preserve and enhance scenic views, protect wetlands, bluff tops, and other natural resources.
5. *Community Design*: This optional element establishes policies and programs dealing with the appearance of the community. It includes urban design guidelines to ensure that development contributes to the community's identity and unique sense of place, and policies to preserve historic sites and buildings.
6. *Safety*: Contains policies and programs to reduce the risk of injury, loss of life, and property damage resulting from natural disasters and hazardous conditions and materials.
7. *Noise*: Contains policies and programs to reduce the community's exposure to excessive noise.
8. *Housing*: Includes policies and programs to meet the housing needs of all economic segments of the community, emphasizing increased mixed-use housing, more effective utilization of infill sites, inclusionary housing, and providing additional housing for special needs groups such as seniors.

State law requires that all parts of the General Plan comprise an integrated, internally consistent and compatible statement of policies. This standard, as well as court cases which have interpreted it, implies that all elements of the General Plan have equal status, that all goals and policies must be internally consistent, and that programs must follow logically from the Plan's goals and policies. This Coastal General Plan meets these standards.

B. California Coastal Act

The California Coastal Act of 1976 established a comprehensive plan to protect resources and regulate development along California's coast. The Coastal Act requires every city and county located partly or wholly within the designated Coastal Zone to prepare a Local Coastal Program (LCP) which is reviewed and certified by the California Coastal Commission. The Coastal Act defines a Local Coastal Program as "a local government's (a) land use plans, (b) zoning ordinances, (c) zoning district maps, and (d) within sensitive coastal resource areas, other implementing actions, which, when taken together, meet the requirements of, and implement the provisions and policies of this division at the local level" (Public Resources Code Section 30108.6). The LCP zoning ordinance, district maps, and other implementing actions must be found to conform with and be adequate to carry out the LCP Land Use Plan.

The Coastal Act (in Public Resources Code, Section 30001.5), sets the following goals for LCPs in the Coastal Zone:

- Protect, maintain, and, where feasible, enhance and restore the overall quality of the Coastal Zone environment and its natural and artificial resources.

- Assure orderly, balanced utilization and conservation of Coastal Zone resources taking into account the social and economic needs of the people of the state.
- Maximize public access to and along the coast and maximize public recreational opportunities in the Coastal Zone consistent with sound resource conservation principles and constitutionally protected rights of private property owners.
- Assure priority for coastal-dependent and coastal-related development over other development on the coast.
- Encourage state and local initiatives and cooperation in preparing procedures to implement coordinated planning and development for mutually beneficial uses in the Coastal Zone.

C. Coastal General Plan

This document establishes the Land Use Plan portion of the City of Fort Bragg Local Coastal Program (LCP), and was prepared in accordance with the California Coastal Act. The Land Use Plan is defined as “the relevant portion of a local government’s general plan, or local coastal element which are sufficiently detailed to indicate the kinds, location, and intensity of land uses, the applicable resource protection and development policies, and where necessary, a listing of implementing actions” (PRC Section 30108.5). The policies contained in the portion of the Coastal General Plan that constitute the LCP described in subsection (2) below govern the use of land and water in the Coastal Zone within the City of Fort Bragg.

This Coastal General Plan update, following certification by the Coastal Commission, will supersede the City’s 1983 certified Land Use Plan.

1. Area Covered by the Coastal General Plan

The Coastal General Plan establishes policies for all land within the Fort Bragg Coastal Zone. Approximately one-third of the City of Fort Bragg is located within the Coastal Zone, including all of the lands west of Highway One and most of the lands on the east side of the highway, south of Walnut Street as described in Coastal Act Section 30150 and generally depicted on General Plan Map LU-1. The City administers a separate General Plan and Land Use and Development Code that governs development outside of the Coastal Zone.

2. Organization and Content

The policies contained within the Coastal General Plan constitute the Land Use Plan portion of the City’s Local Coastal Program and govern the review and approval of coastal development permits include the following:

2.a: Policies that are part of the Certified Local Coastal Program

- Land Use Element:

Policy LU-1.1	Policy LU-6.1	Policy LU-9.6
Policy LU-1.2	Policy LU-6.2	Policy LU-9.7
Policy LU-3.1	Policy LU-6.3	Policy LU-9.8
Policy LU-3.2	Policy LU-6.4	Policy LU-9.9
Policy LU-3.3	Policy LU-7.1	Policy LU-9.10

Policy SF-1.6	Policy SF-2.5	Policy SF-5.2
Policy SF-1.7	Policy SF-2.6	Policy SF-5.5
Policy SF-1.8	Policy SF-2.7	Policy SF-8.1
Policy SF-1.9	Policy SF-3.1	Policy SF-8.2

- **Noise Element**

n/a

Housing Element

Policy H-1.2	Policy H-2.5	Policy H-3.4
Policy H-1.3	Policy H-2.6	Policy H-3.5
Policy H-2.1	Policy H-2.7	Policy H-3.6
Policy H-2.2	Policy H-3.2	Policy H-3.8
Policy H-2.4		

2.b: Policies not part of the Certified Local Coastal Program

The policies demarcated with the Fort Bragg City seal:  are not part of the certified LCP and do not govern the review and approval of coastal development permits. These policies are not part of the standard of review for coastal development permit purposes, as they are not relevant to indicate the “kinds, location, and intensity of land uses” as required of Coastal Land Use Plans (PRC Section 30108.5). However, the policies demarcated with the City seal are retained in the Coastal General Plan document as the City will apply these policies within the Coastal Zone under its own separate authority.

The following policies and associated programs demarcated with the City seal are not considered part of the City’s certified Local Coastal Program for purposes of the review and approval of coastal development permits:

2. Land Use Element:

- Map LU-3 Sphere of Influence
- Policies LU-2.1 through LU-2.5

3. Public Facilities Element:

- Policy PF-1.5
- Policy PF-2.1
- Policy PF-2.7
- Policy PF-2.8
- Policy PF-2.9

4. Conservation, Open Space, Energy, & Parks Element:

- Policy OS-7.1
- Policy OS-7.2
- Policy OS-8.1
- Policy OS-17.4
- Policy OS-17.5
- Policy OS-17.7
- Policy OS-18.2
- Policy OS-18.3

5. Circulation Element:

- Policy C-2.11
- Policy C-9.4
- Policy C-9.7
- Policy C-12.1
- Policy C-12.1
- Policy C-12.3
- Policy C-13.1
- Policy C-15.1

6. Community Design Element:

- Policy CD-2.6
- Policy CD-3.3
- Policy CD-7.3
- Policy CD-8.1

7. Safety Element:

- Policy SF-4.2
- Policy SF-5.3
- Policy SF-5.4
- Policy SF-6.1
- Policy SF-6.2
- Policy SF-7.1
- Policy SF-7.2
- Policy SF-9.1
- Policy SF-9.2

8. Noise Element

- Policies N-1.1 through N-1.6

9. Housing Element

- Policy H-1.1
- Policy H-2.3
- Policy H-2.8
- Policy H-3.1
- Policy H-3.3
- Policy H-3.7
- Policy H-3.9
- Policy H-3.10
- Policy H-3.11
- Policy H-4.1
- Policy H-4.2
- Policy H-5.1
- Policy H-5.2

D. Mission and Vision

The mission of the Coastal General Plan is to preserve and enhance the small town character and natural beauty that make the City a place where people want to live and visit, and to improve the economic diversity of the City to ensure that it has a strong and resilient economy which supports its residents. The following concepts articulate a vision of Fort Bragg that embraces its past and prepares for the future. Fort Bragg is:

- A friendly city with a small town character and a strong sense of community.
- A city which seeks to preserve its natural beauty and provide access to the scenic and recreational resources of its natural setting.
- A city that values its roots in the fishing and timber industries and seeks to maintain a connection to its past, while preparing for the future.
- A city with strong connections to its heritage and a commitment to the preservation of historic resources.
- A city which strives to create an environment where business and commerce can grow and flourish.
- A city that embraces its role as the primary commercial and service center on the Mendocino coast.
- A city which promotes itself as a tourist destination and which provides the necessary infrastructure and services to support a growing population of transient visitors.
- A city that supports efforts to preserve and strengthen the vitality of commerce in its central business district.
- A city that fosters a business climate which sustains and nourishes the growth and expansion of local businesses and cottage industries.

- A tolerant city that welcomes and values the cultural diversity of its residents.
- A city that values its youth and considers their needs in the planning of public spaces and facilities.
- A safe city that emphasizes community-oriented policing and crime prevention.
- A city that strives to provide housing opportunities for all income groups.
- A city that provides an adequate road system and public infrastructure to serve its residents, businesses, and future growth.

E. The General Plan and Coastal General Plan Process

The City initially decided to update its General Plan in 1994. An extensive public participation process took place to ensure that the revised Plan reflects the concerns and views of the community.

Key milestones of the public participation process include the following:

- The Citizen Advisory Committee (CAC) was established in 1994 and conducted public workshops on the General Plan Vision Statement and various elements.
- The CAC and the Planning Commission conducted public workshops on the goals and policies in 1995.
- Joint Planning Commission/City Council public workshops were held in 1996 to review an Administrative Draft General Plan. After these workshops, work on the General Plan was interrupted for more than two years.
- In 1999, an insert describing the General Plan and Coastal Element update process was placed in the local newspaper, the *Fort Bragg Advocate-News*. The City Council and Planning Commission conducted a joint workshop to review the 1996 Administrative Draft and provide direction to staff and the consultants regarding additional work necessary to complete the General Plan.
- In 2000, a Background Report was prepared on land use, environmental resources, transportation, and on the Local Coastal Program. The Background Report presented information about the City, the issues and constraints related to the General Plan, and alternative policy options.
- Joint Planning Commission/City Council public workshops were held during 2000 and 2001 on General Plan issues and alternatives.
- A revised Administrative Draft General Plan with a more comprehensive Coastal Element was prepared in October 2001.
- Public workshops were held by the Planning Commission and the City Council during late 2001.

- Public hearings were held by the Planning Commission and the City Council in August through December 2002 to review the Draft General Plan and the Environmental Impact Report.
- The General Plan was adopted by the City Council in December 2002.

The result of this multi-year process is a General Plan which reflects the concerns and values of Fort Bragg residents and businesses. It is a Plan that seeks a balance among the environmental, social, and economic needs of the community.

The General Plan was transformed into the Land Use Plan portion of the Local Coastal Program through the following process:

- The General Plan was submitted to the California Coastal Commission by the City of Fort Bragg in January of 2006 as part of the LCP amendment to update the City's certified Local Coastal Program.
- City Staff and Coastal Commission staff held a series of meetings and conference calls to resolve as many of the issues as possible that Coastal Staff had identified regarding conformity of the Land Use Plan as submitted with the Coastal Act prior to publication of the Coastal staff recommendation to the Coastal Commission on the Land Use Plan amendment.
- The Coastal Commission acted on the LCP amendment at its January 11, 2008 public hearing. The Commission denied the LCP amendment as submitted by the City, but certified the LCP amendment with numerous suggested modifications in accordance with the staff recommendation. The Commission directed the staff to work with the City to attempt to resolve outstanding issues by considering minor language changes that substantially conform to the Commission's action to certify the LCP Amendment with suggested modifications.
- The City subsequently held three public workshops to obtain further input and review the amendments.
- Furthermore a separate public hearing was held by the Planning Commission, with the Planning Commission making a "written recommendation" to the Council for acceptance and adoption of the Coastal Commission suggested modifications to the LUP amendment with minor changes that substantially conform to the Coastal Commission's previous action in January.
- The City Council held a public hearing for acceptance and adoption of the suggested modifications to the LCP Land Use Plan (Coastal General Plan) by resolution and the LCP Implementation Program (Coastal Land Use & Development Code) by ordinance.
- The Executive Director of the Coastal Commission reviewed the resolutions and ordinances adopted by the City and determined that the LCP changes adopted by the City substantially conform to the Commission's action to certify the LCP amendment with suggested modifications and that the resolutions and ordinances are legally adequate to implement the LCP amendment as modified.

- The Coastal Commission concurred with the Executive Director's determination at the Commission's July, 2008 meeting.

The new LCP became effective upon submittal of Notice of Determination by the Coastal Commission to the Secretary of Resources after the meeting.

F. Goals, Policies and Programs

The City's mission and vision form the foundation for the goals, policies, and programs included in each element of the General Plan. Goals, policies, and programs are the essence of the Coastal General Plan and are defined below:

- **Goal:** A general, overall, ultimate purpose, aim or end toward which the City will direct effort. Goals are a general expression of community values and, therefore, are abstract in nature. Consequently, a goal is not quantifiable, time-dependent, or suggestive of specific actions for its achievement. Examples of goals include: "Maintain the small-town atmosphere" or "Diversify the economic base of the City."
- **Policy:** A specific mandatory statement binding the City's action and establishing the standard of review to determine whether land use and development decisions, zoning changes or other City actions are consistent with the Coastal General Plan. An example of a policy is: "New development shall minimize energy consumption."
- **Program:** An action, activity, or strategy carried out in response to adopted policy to achieve a specific goal. An example of a program to implement the above policy is: "Complete the bicycle and pedestrian trail system as indicated in Map 4: Bicycle and Pedestrian Trails."

G. Administering the Coastal General Plan

All land use and development decisions in the Coastal Zone must be consistent with the Local Coastal Program (LCP). In authorizing Coastal Development Permits after LCP certification, the City must make the finding that the development conforms to the certified LCP as well as all other findings required by Section 18.71.040 of the Coastal Development Permit ordinance of the Coastal Land Use and Development Code.

The following general policies shall provide the framework for the Coastal Land Use Element:

Policy 1-1: The policies of the Coastal Act (Coastal Act Sections 30210 through 30264) shall guide the interpretation of the Land Use Plan.

Policy 1-2: Where policies within the Coastal General Plan overlap or conflict, the policy which is the most protective of coastal resources shall take precedence.

Policy 1-3: Prior to the issuance of any development permit required by this Plan, the City shall make the finding that the development meets the standards set forth in all applicable Coastal General Plan policies.

Policy 1-4: The textual discussion is intended as elaboration of and justification for the Plan policies and map designations. Therefore, the text shall be considered as the findings justifying the specified policies and Land Use Maps.

In addition, certain types of development, as well as development within certain geographic areas that are acted on by the City after certification of the LCP, are appealable to the Coastal Commission (PRC Section 30603). These include:

- (1) Developments approved by the local government between the sea and the first public road paralleling the sea or within 300 feet of the inland extent of any beach or of the mean high tideline of the sea where there is no beach, whichever is the greater distance.
- (2) Developments approved by the local government not included in paragraph (1) that are located on tidelands, submerged lands, and public trust lands, within 100 feet of any wetland, estuary, or stream, or within 300 feet of the top of the seaward face of any coastal bluff.
- (3) Developments approved by the local government not included with paragraphs (1) or (2) that are located in a sensitive coastal resource area.
- (4) Any development which constitutes a major public works project or a major energy facility (whether approved or denied by the local government).

The grounds for an appeal of an approval of a permit are limited to an allegation that the development does not conform to the standards set forth in the certified Local Coastal Program or the public access policies of the Coastal Act. In addition, the grounds for appealing of a denial of a permit for a major public works project or major energy facility, referenced in number (5) above, are limited to an allegation that the development conforms to the standards set forth in the certified Local Coastal Program and the public access policies of the Coastal Act.

The Coastal Commission retains coastal development permitting jurisdiction on submerged lands, tidelands, and public trust lands (PRC Section 30519).

H. Amending the Coastal General Plan

Any amendments to the certified LCP will require review and approval by the Coastal Commission prior to becoming effective.

2. LAND USE ELEMENT

A. Purpose

The Land Use Element is the heart of the Coastal General Plan since it has the broadest scope of the required elements and provides an overview of the long-term development and conservation goals and policies of the City. Map LU-1: Land Use Designations describes the desired types and intensity of land use for the City and its Sphere of Influence. The goals, policies, and programs in this element should be considered in relation to this map.

This Element covers the following policy areas:

- Sphere of Influence and Annexation
- Redevelopment
- Land Use Designations
- Residential Land Uses
- Commercial Land Uses
- Recreation & Visitor-Serving Facilities
- Industrial Land Uses
- Commercial & Recreational Fishing and Boating
- Aquaculture Development

The Land Use Element establishes policies and programs to maintain the existing pattern of land uses within the City while anticipating and providing for future growth and development. It is expected that growth will continue to occur at a slow but regular pace (i.e., one to two percent per year) as experienced in the last decade.

Commercial land uses in the City are located along the Highway One and Franklin Street corridors. The central business district, located between Oak and Pine Streets, is the historic, civic, and cultural core of the community. Industrial lands are located on the Georgia-Pacific timber mill property west of Highway One, on North Franklin Street immediately north of the central business district, and on Highway One north of Pudding Creek. Residential neighborhoods are located east of the commercial core and in the west Fort Bragg neighborhood.

Land Use Element policies support a concentrated development pattern by encouraging infill development on vacant and underutilized sites throughout the City.

The most significant policy change in the Land Use Element is the reclassification of the Industrial Lands which lie west of Highway One between Noyo River and Elm Street. The newly-created Timber Resource Industrial land use designation is intended to support the continued use of this area for timber processing activities and to establish a clear planning process for the transition of this land to other uses, as initiated by the property owners.

B. The Sphere of Influence and Annexation

The Coastal General Plan applies to both publicly and privately owned land within the City's boundaries and its broader Planning Area. State law permits the City to plan for areas outside of its boundaries if the City determines those areas have a relationship to the City's planning needs. The Planning Area is defined in this Plan as lands within the City and the City's designated Sphere of Influence (as approved by the Mendocino County Local Agency Formation Commission or LAFCO) which represents areas that may be annexed to the City and for which urban services may be provided. The purpose of a Sphere of Influence is twofold: to ensure that urban development takes place in an orderly manner, and to allow for land use and development policies of a city to be recognized in areas that will eventually be part of the City. The Coastal General Plan establishes policies for the Sphere of Influence which ensure that development requiring annexation can be adequately served by infrastructure and that the costs associated with annexations are fairly allocated. It provides for the orderly development and extension of City services within the Sphere of Influence. Map LU-2 indicates the boundaries of the City and its Sphere of Influence. Map LU-3 indicates the Annexation Areas within the Sphere of Influence, as defined by the City Council.

Areas within the Sphere of Influence are currently under County jurisdiction and are regulated by the Mendocino County General Plan and Zoning Ordinance. Although the County is not bound by Fort Bragg's Coastal General Plan, the City will work with the County to assure that County land use decisions in Fort Bragg's Sphere of Influence are compatible with this Coastal General Plan. Furthermore, if and when lands within the City's designated Sphere of Influence are annexed to the City, the land use designations assigned by the City's Coastal General Plan provide guidance for future development densities, and the policies and land use designations established by the Coastal General Plan become effective upon annexation to the City.

C. Redevelopment

The California Community Redevelopment Law enables local jurisdictions to establish a Redevelopment Agency to eliminate blighted areas, stabilize the tax base, and improve the local economy. Redevelopment plans must be consistent with local General Plans.

The City adopted the *Fort Bragg Redevelopment Project* in 1987 which provides a framework for redeveloping about 1,130 acres of the City. The Project was established to address a number of adverse conditions and to achieve the following goals:

- Promote the economic health of the City;
- Renovate and/or redevelop the residential, commercial, and industrial properties characterized by blight;
- Improve the City's infrastructure such as roads, parking facilities, storm drainage, water and sewer capacity, pedestrian paths, and parks;
- Carry out improvements to enhance the functioning, appearance, and economic strength of the Central Business District; and
- Implement the City's housing policies described in the Housing Element.

The Redevelopment Agency can fund improvements through its ability to collect a portion of the increase in property tax revenues within the Redevelopment Area above the 1987 base figure established by the County (i.e., the tax increment), rather than sharing this tax growth with other agencies.

D. Land Use Designations

The Coastal General Plan establishes land use designations shown on Map LU-1: Land Use Designations. Each land use designation is described relative to the development density or intensity, and the types of activities or land uses permitted. Residential density is defined by dwelling units per net acre.

E. Applying Land Use Designations to Specific Properties

The Land Use Element provides the primary basis for City decisions on development applications. Privately and publicly-sponsored projects must be consistent with all parts of the Coastal General Plan, but the Land Use Element is the first place to find out what type of development would be appropriate in a specific location, or what location would be suitable for a particular development type.

Densities described under the applicable land use designations are maximums; maximum densities can only be achieved after meeting all of the other policies and goals of the Coastal General Plan. The City does not guarantee that an individual project will attain the maximum density indicated by the Coastal General Plan land use designations. The Coastal General Plan includes maps identifying hazards and constraints, floodplains, street systems, parkland, and trails which are an integral part of the Coastal General Plan and which must be consulted in order to obtain a complete interpretation of Coastal General Plan policies and goals applicable in a given area or parcel of land. Other elements of the Coastal General Plan contain specific policies to preserve Fort Bragg's character and appearance, and to protect sensitive environmental resources.

F. Residential Land Use Designations

Medium Lot Rural Residential (RR2)

This designation is intended for single-family dwellings on the northern fringe of the City where the existing development pattern is comprised of one- to two-acre parcels and where infrastructure is inadequate to support higher development densities. The maximum allowable density is 1 unit per 2 acres.

Rural Residential (RR1)

This designation is intended for single-family dwellings in a semi-rural environment. The RR1 designation is located primarily on the eastern edge of the City, where larger lots serve as a transition between the RL neighborhoods of the City and the rural lands in the unincorporated areas. The RR1 designation in the Todd Point and Noyo Heights neighborhoods acknowledges the existing pattern of parcelization. The maximum allowable density is 1 unit per acre.

Suburban Residential (RS)

This designation is intended for single-family dwellings and is assigned to areas where infrastructure limitations and/or environmental constraints inhibit the establishment of urban development densities. The allowable density range is 1 to 3 units per acre.

Low Density Residential (RL)

This designation is intended for single-family residences on standard City lots in residential neighborhoods surrounding the more densely developed core of the City. With issuance of a conditional use permit, limited neighborhood-serving commercial uses are permitted, such as convenience stores, cafés, and restaurants located primarily on individual parcels or in small clusters of retail establishments. The allowable density range is 3 to 6 units per acre.

Medium Density Residential (RM)

This designation is intended for a variety of housing types, including duplexes, triplexes, townhouses, and apartment units located in proximity to parks, schools, and public services. With issuance of a conditional use permit, limited neighborhood-serving commercial uses are permitted, such as convenience stores, cafés, and restaurants located primarily on individual parcels or in small clusters of retail establishments. The allowable density range is 6 to 12 units per acre.

High Density Residential (RH)

This designation is intended to allow a variety of higher density housing types, including townhouses, apartments, and mobile home parks on sites that are large and provide important open space or large properties where the City wishes to see creative planning and design. It is assigned primarily to larger parcels where innovative site design can provide for a mix of housing types, aesthetic and functional open space areas, and other features that enhance the development and the neighborhood. With issuance of a conditional use permit, limited neighborhood-serving commercial uses are permitted, such as convenience stores, cafés and restaurants located primarily on individual parcels or in small clusters of retail establishments. The allowable density range is 10 to 15 units per acre. Residential densities above 6 units per acre may only be permitted for projects which include open space, provide affordable housing, clustered housing, energy conservation, and/or aesthetically pleasing design features.

Very High Density Residential (RVH)

This designation is intended to allow high density multi-family housing on sites that are close to commercial areas and public services. Apartments, mobile home parks, and similar types of residential uses are allowed in this designation. With issuance of a conditional use permit, limited neighborhood-serving commercial uses are permitted, such as convenience stores, cafés, and restaurants located primarily on individual parcels or in small clusters of retail establishments. The allowable density range is 12 to 24 units per acre.

G. Commercial and Industrial Land Use Designations

Central Business District (CBD)

This designation applies to the core of the downtown which is the civic, cultural, and commercial center of the community. Uses and site development patterns in the Central Business District are typically pedestrian-oriented. This designation is intended to accommodate government and professional offices, retail stores, theaters, and other similar uses. Residential uses on upper floors or on the ground floor at the rear of buildings are encouraged at a density of up to 40 units per net acre.

Neighborhood Commercial (CN)

This designation provides small-scale, convenience shopping and services for surrounding residential neighborhoods. Retail and service businesses such as grocery stores, laundromats, restaurants, beauty salons, and similar types of uses are allowed in this designation.

General Commercial (CG)

The General Commercial designation is intended for a less compact and intensive type of development than found in the Central Business District. Typical land uses in this designation depend more on vehicular than pedestrian access and include automotive and service-related outlets, retail sales, home improvement, paint or carpeting sales, offices, apparel stores, and food stores. Shopping centers are allowed with approval of a conditional use permit. Residential uses are permitted above the ground floor or on the ground floor at the rear of buildings at a maximum density of up to 24 units per acre with a conditional use permit.

Highway Visitor Commercial (CH)

This land use designation applies to land uses serving residents and visitors on sites which are located along Highway One and arterials at the entry points to the community. Typical uses allowed in this designation include motels and other lodging enterprises, restaurants, and retail outlets. Residential uses are permitted above the ground floor or on the ground floor at the rear of buildings at a maximum density of up to 24 units per acre with a conditional use permit.

Office Commercial (CO)

This designation is intended to serve the office and institutional needs of the community and permits such uses as professional offices, hospitals, medical clinics, and banks. Commercial uses supportive of the office and institutional uses, such as blueprint and copy shops, cafés and restaurants, pharmacies, and similar retail establishments are permitted. Residential uses are permitted at a maximum density of 24 units per acre with a conditional use permit.

Heavy Industrial (IH)

This designation is intended for a range of heavy industrial uses including manufacturing, assembly and processing, and the storage and distribution of raw materials, aggregate plants, and related heavy industrial uses which are generally incompatible with and require locations removed from residential and visitor serving uses.

I. Population Density and Building Intensity

State law mandates that general plans include standards of population density and building intensity for all of the territory covered by the plan. To satisfy this requirement, the Coastal General Plan includes building intensity for each of the land use designations, expressed in units per acre for residential uses.

Population densities for residential land use designations are based on an average household size of 2.5 persons, except for Very High Density Residential which is based on an average of 2.1 persons per household. If there is a discrepancy between dwelling units per acre and persons per acre, the dwelling units per acre measure (e.g., building intensity) shall govern. The population densities are:

Large Lot Rural Residential (RR5)	up to 0.5 persons per acre
Medium Lot Rural Residential (RR2)	up to 1.25 persons per acre
Rural Residential (RR1)	up to 2.5 persons per acre
Suburban Residential (RS)	up to 7.5 persons per acre
Low Density Residential (RL)	up to 15 persons per acre
Medium Density Residential (RM)	up to 30 persons per acre
High Density Residential (RH)	up to 37.5 persons per acre
Very High Density Residential (RVH)	up to 50 persons per acre

Goals, Policies and Programs

The following policies demarcated with the Fort Bragg City seal:  are not part of the certified LCP and do not govern the review and approval of coastal development permits: Map LU-3 Sphere of Influence, and Policy LU-2.1 through Policy LU-2.5.

Using the Land Use Designations and Map

Goal LU-1 Promote development and conservation of land in Fort Bragg according to the pattern shown on the Land Use Designations Map.

Policy LU-1.1 Implementation of the Land Use Designations Map: Implement the Land Use Designations Map by approving development and conservation projects consistent with the land use designations, and ensure consistency between the Coastal General Plan and the Coastal Land Use & Development Code.

Program LU-1.1.1: Request that the County of Mendocino maintain or, if warranted, revise its General Plan in accordance with the land use designations of the Fort Bragg Coastal General Plan for the area within the City's Sphere of Influence.

Policy LU-1.2: Require that development on APNs 018-440-38, -39, -49, -50, & -59 in excess of one dwelling per existing lot obtain a Planned Development approval that minimizes access

The following properties are owned by the City of Fort Bragg and are not contiguous to the City limits. They have been annexed to the City and are assigned the General Plan land use classification of Public Facilities.

APN	PURPOSE
018-391-07	Hwy 20 Water Tank (fire station)
019-070-01	Newman Gulch
019-460-21	Waterfall Gulch
019-470-08	
020-270-48	Madsen Hole
020-480-19	Water Treatment Plant/Corp. Yard
020-500-13	

Revision date: July 2008

The boundaries of the Land Use Designations are general and schematic illustrating the policies of the General Plan. Refer to the Assessor's Parcel Maps at the Community Development Department for updated parcel boundary maps.

driveways onto Ocean View Drive and includes design and site planning features to ensure compatibility with the surrounding single-family residential neighborhood.

Sphere of Influence

Policy LU-2.1 through Policy 2.5 and associated Programs are not part of the certified LCP and shall not govern the review and approval of Coastal Development Permits

Goal LU-2 Establish and maintain clear boundaries and guidelines for the future expansion of Fort Bragg.

Policy LU-2.1 Boundaries of the Sphere of Influence: Revise the existing Sphere of Influence boundaries, as submitted to Local Agency Formation Commission (LAFCO).

Policy LU-2.2 Annexations to the Municipal Improvement District Boundary: Require annexation approval prior to permitting new connections to the sanitary sewer system operated by the City's Municipal Improvement District in the Sphere of Influence. Out-of-area service agreements may be approved for new connections to the sanitary sewer system for development proposals that comply with the policy of the Municipal Improvement District regarding projects that provide affordable housing per Resolution No. ID 230-2003, adopted on December 8, 2003.

Policy LU-2.3 County Referrals: Review and comment on development projects in the City's Sphere of Influence which are under the jurisdiction of Mendocino County.

Program LU-2.3.1: Establish a Memorandum of Understanding between the City and Mendocino County regarding procedures for project review within the Fort Bragg Sphere of Influence.

Policy LU-2.4 Annexation Standards: Require annexations to the City to meet all of the following standards:

- Areas annexed must be able to be served by existing City facilities and by facilities provided by other agencies, or by environmentally and economically feasible improvements to these facilities. Prior to City approval of an annexation application, findings shall be made indicating that: necessary public and private infrastructure to support the development is available, or that a development plan for extending or upgrading the infrastructure has been adopted, and that the annexation would not result in a substantial reduction or deterioration of public services and facilities, including streets, water supply, wastewater treatment, storm drainage facilities, fire, police, schools, and other public services and facilities.
- Proposed annexations must be contiguous to existing developed areas. Annexation proposals that "leapfrog" over vacant and undeveloped land shall not be approved.

- Based on a cost-revenue analysis, annexations shall have a cumulative net positive fiscal effect on the City within fifteen years of approval. The fiscal analysis must demonstrate that annexed properties would generate sufficient City revenues to pay for ongoing services to the annexed area and infrastructure cost benefiting annexed area borne by City – such as public safety, road maintenance, street lighting, etc. To achieve this, property owner(s) may be required to establish Mello-Roos districts and/or other forms of benefit assessment districts as a condition of, and at the time of, annexation to the City.
- All annexation applications shall include an environmental review document which provides full disclosure of any potential adverse environmental impacts. To the maximum extent possible, annexations that would result in significant environmental impacts will not be approved.
- A development plan, including maps and text, showing how existing and proposed future development within the annexation area contributes to the attainment of Coastal General Plan goals and policies, shall be submitted with an annexation application.
- All proposed future development within an annexation area shall be consistent with the land use designations shown on the Land Use Designations Map and all other requirements of the Coastal General Plan and the Fort Bragg Municipal Code.
- A cost-revenue analysis is not required for parcels that are annexed by the City of Fort Bragg for public purposes.

Program LU-2.4.1: Require a fiscal impact analysis of proposed annexations, at the applicant's cost, as deemed appropriate by the City. The fiscal impact analysis shall include, at a minimum, the cost of providing City services on a per capita basis for residential projects, or per square foot of building for commercial and industrial projects, the impact on existing and future property owners, and a comparison of the potential revenues anticipated from the proposed annexation versus the cost to the City of providing services for a period of at least five years from the date of project completion.

Policy LU-2.5 Discourage Piecemeal Annexations: Discourage annexations of small, individual parcels of land in a piecemeal fashion.

Program LU-2.5.1: Consider revising the Coastal LUDC to establish a minimum area for an annexation request or a process for pre-approval of the annexation area by the City Council prior to accepting an annexation application as complete.

Program LU-2.5.2: Annexation applications should include, to the maximum feasible extent, the entire annexation area as shown in Map LU-3: Annexation Areas. Annexation applications for smaller subareas may be allowed for parcels that are annexed by the City of Fort Bragg for public purposes and for projects that provide affordable housing consistent with the criteria established in Resolution No. ID 230-2003, adopted on December 8, 2003.

Commercial Land

The goals and policies in this section ensure that the Central Business District remains the historic, civic, cultural, and commercial core of the community. There are also policies encouraging mixed use and infill development to strengthen the other commercial areas of the City. The Circulation and the Community Design Elements provide goals and policies addressing parking, alleyways, and the overall appearance of commercial development.

Goal LU-3 Ensure that the Central Business District remains the historic, civic, cultural, and commercial core of the community.

Policy LU-3.1 Central Business District: Retain and enhance the small-scale, pedestrian-friendly, and historic character of the Central Business District (CBD).

Program LU-3.1.1: Develop streetscape and landscape requirements to enhance the pedestrian environment, encourage an active commercial setting, and reduce traffic congestion in the Central Business District.

Program LU-3.1.2: Consider revisions to the Coastal Land Use & Development Code (LUDC) requiring buildings in the Central Business District be located adjacent to the sidewalk with parking to the rear or to the side of buildings.

Program LU-3.1.3: Utilize all feasible funding sources to implement the public improvements and to establish organizational support for businesses in the Central Business District as identified in the Downtown Revitalization Plan.

Program LU-3.1.4: Utilize City-owned land at the Guest House Museum, Town Hall, and City Hall for historic and cultural uses, public assembly, and entertainment.

Program LU-3.1.5: Residential uses will be permitted only above the ground floor or at the rear of buildings on the ground floor.

Policy LU-3.2 Mixed Uses: Support mixed use development (i.e., a combination of residential and commercial uses) in the Central Business District that does not conflict with the primary retail function of this area.

Policy LU-3.3: Historic Buildings and Mixed Uses: In the Central Business District and in other commercial areas with historic residential structures, encourage residential uses, mixed residential, and commercial uses, and the preservation of historic structures.

Policy LU-3.4 Encourage Infill Development: Encourage infill development of vacant and underdeveloped land in the Central Business District and adjacent commercial areas before amending the Coastal General Plan and rezoning to obtain additional commercial land elsewhere.

Policy LU-3.5 Re-Use of Existing Buildings: Encourage the adaptive re-use and more complete utilization of buildings in the Central Business District and other commercial districts.

Program LU-3.5.1 Consider establishing incentives such as low-interest loans for rehabilitation and installation of fire sprinklers in buildings to encourage the reuse of

upper floors of existing buildings in the Central Business District for housing, offices, and other uses.

Goal LU-4 Promote the economic vitality of the City's existing commercial areas.

Policy LU-4.1 Formula Businesses and Big Box Retail: Regulate the establishment of formula businesses and big box retail to ensure that their location, scale, and appearance do not detract from the economic vitality of established commercial businesses and are consistent with the small town, rural character of Fort Bragg.

Policy LU-4.2: Require that a fiscal and economic analysis be performed as part of the conditional use permit process for big box retail projects. The analysis shall evaluate the economic effects of the project for a minimum five-year time frame. A consultant selected by the City and paid for by the project proponent shall carry out the analysis.

Policy LU-4.3 Large-Scale Commercial Development: To maintain scenic views of the coast and to ensure that building sizes at the City's gateways are in scale with the community, no commercial building shall exceed the following limitations on the gross floor area:

- a) between the Noyo River and Pudding Creek Bridges - maximum 50,000 square feet;
- b) east of Highway One and north of Pudding Creek Bridge - maximum 30,000 square feet;
- c) west of Highway One and north of Pudding Creek Bridge and south of the Noyo River Bridge - maximum 15,000 square feet; and
- d) east of Highway One and south of Noyo River Bridge – maximum 40,000 square feet.

Policy LU-4.4 Standards for Commercial Uses in Residential Areas: Commercial uses in and adjacent to residential areas shall not adversely affect the primarily residential character of the area.

Program LU-4.4.1: Consider revisions to the Coastal LUDC to require a conditional use permit for commercial uses in residential land use designations and to establish design standards addressing architectural design, landscaped buffers, lighting, signage, noise, and other features to ensure neighborhood compatibility.

Program LU-4.4.2: Amend the Coastal LUDC to allow existing Bed & Breakfasts in R1 neighborhoods to rebuild and expand with City approval of a conditional use permit.

Recreation and Visitor-Serving Facilities

The Coastal Act gives priority to recreational and visitor-serving uses in the Coastal Zone. The goals established by the State for the Coastal Zone include reserving upland areas for recreational uses, protecting an adequate amount of oceanfront land for recreational use, and focusing recreational facilities in selected areas, rather than spreading them out along the entire coastline.

Fort Bragg serves as the regional service center for the Mendocino coast and many support services needed for recreation and tourist-oriented businesses on the coast are located here. No shortage of visitor-serving land use exists in the City.

All commercial land use designations in the City allow visitor-commercial uses, and there are many vacant parcels available for this use.

Goal LU-5 Maximize public recreational opportunities in the Coastal Zone consistent with sound resource conservation principles and the constitutionally protected rights of property owners.

Policy LU-5.1 Additional Sites for Visitor-Serving Commercial: Continue to provide for and encourage additional visitor-serving commercial facilities.

Policy LU-5.2: Ensure that there are adequate sites for visitor-serving land uses by:

- a) Maintaining existing areas designated for Highway-Visitor Commercial uses;
- b) Maintaining the Highway Visitor Commercial land use designation as one allowing primarily recreational and visitor-serving uses; and
- c) Reserving adequate infrastructure capacity to accommodate existing, authorized, and probable visitor serving uses.

Policy LU-5.3: Lower Cost Facilities: Protect, encourage, and, where feasible, provide lower-cost visitor and recreational facilities for persons and families of low and moderate income. If and when average annual occupancy rates at Fort Bragg visitor facilities exceed 70%, removal or conversion of existing lower cost facilities shall be prohibited unless the use will be replaced with another facility offering comparable visitor serving or recreational facilities.

Program LU-5.3.1: Create an inventory and monitor lower-cost visitor recreational facilities in the City.

Program LU-5.3.2: Encourage lower-cost visitor and recreational facilities during the project review process with private developers and work with State Parks to expand such facilities on State land.

Policy LU-5.4: Oceanfront land suitable for recreational use shall be protected for recreational use and development unless present and foreseeable future demand for public or commercial recreational activities that could be accommodated on the property is already adequately provided for in the area.

Policy LU-5.5: Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred.

Policy LU-5.6: The use of private lands suitable for visitor-serving and commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development, but not over agriculture or coastal-dependent industry.

Policy LU-5.7: Adequate parking should be provided to serve coastal access and recreation uses to the extent feasible. Existing parking areas serving recreational uses shall not be displaced unless a comparable replacement area is provided.

Policy LU-5.8: Coastal areas suited for water-oriented recreational activities that cannot readily be provided at inland water areas shall be protected for such uses.

Industrial Land

The lumber and fishing industries have played an important role in the formation and growth of Fort Bragg. Both of these industries are in transition, and the local economy is evolving from a natural resource-based economy to a more service-oriented economy. Fort Bragg is the commercial, educational, medical, and professional service center for a large portion of the Mendocino coast. Future growth in the local economy is projected to occur in the retail, tourism, and service sectors.

The Coastal General Plan is intended to support the growth and vitality of existing industries while ensuring that the community is prepared to actively participate in the decision-making process as new industries develop in Fort Bragg and as current industrial lands transition to other uses. This Coastal General Plan requires that specific plans be prepared when different land uses are proposed for large areas of industrial land. This offers the community the opportunity to: plan for its future, engage in consensus building, and develop comprehensive land use and economic development strategies.

Goal LU-6 Support industrial development which is consistent with the protection, enhancement, and restoration of coastal resources.

Policy LU-6.1: Standards for Noyo Harbor Industrial Development: Limit industrial development in the Noyo Harbor to uses which:

- a) are coastal-dependent uses or aquaculture, giving priority to commercial fishing activities;
- b) do not generate excessive traffic on City streets, such as South Street, North Harbor Drive, and Cypress Street;
- c) do not interfere with existing coastal-dependent industry, especially commercial fishing; and
- d) are consistent with applicable LCP policies, including but not limited to LCP policies regarding the protection of public access and recreation, visual resources, and environmentally sensitive habitat areas, and Coastal Act public access policies.

Program LU-6.1.1: Work with the County of Mendocino, the Noyo Harbor District and other agencies to develop and adopt a Noyo Harbor Plan establishing standards for conservation and development for the entire Noyo River drainage area.

Program LU-6.1.2: Offshore Oil Drilling: Support Mendocino County's LCP policy to request that the Federal government be requested to establish all underwater land within the Outer Continental Shelf as a petroleum reserve to be used only in a national emergency and that the Mendocino Coast be deleted from any Outer Continental Shelf gas development licensed by the Federal government.

Policy LU-6.2: In areas designated for industrial land uses, coastal-dependent and coastal-related industrial uses shall have priority over other industrial uses on or near the shoreline.

Policy LU-6.3: Pipeline, Electrical, and Telecommunications Transmission Corridors: Consolidate new pipeline, electrical, and telecommunications transmission corridors within existing pipeline or electrical and telecommunications transmission corridors, wherever feasible, unless

there are overriding technical constraints or significant social, aesthetic, environmental, or economic concerns.

Policy LU-6.4: Electrical and telecommunications transmission rights-of-way and pipelines shall be routed to minimize impacts to scenic resources and to Environmentally Sensitive Habitat Areas according to the following standards:

- a) Require underground installation of electrical and telecommunication lines where technically and economically feasible, unless it can be shown that other options are less environmentally damaging.
- b) Scarring, grading, or other vegetative removal shall be minimized and construction areas shall be revegetated with plants native to the area.
- c) Where above-ground electrical or telecommunications transmission lines are necessary, the design and color of the support towers shall be compatible with the surroundings to the extent feasible. Avoid locating above-ground transmission lines along the crests of hills, bluffs, and in scenic resource areas.

Goal LU-7 Support industrial development which is consistent with the protection, enhancement, and restoration of coastal resources.

Policy LU-7.1 Changes in Industrial Land Use: Require that any Local Coastal Program (LCP) amendments and rezoning of lands which are designated Timber Resources Industrial be subject to a specific plan process. The portions of a Specific Plan that meet the definition of "Land Use Plan" as defined by Coastal Act Section 30108.5 and "Implementing Actions" as defined by Coastal Act Section 30108.4 shall be submitted to, and effectively certified by, the Coastal Commission as an LCP amendment before those portions of the Specific Plan become effective.

Policy LU-7.2: In order for LCP amendments and rezoning of lands designated Timber Resources Industrial to be considered, a specific plan shall be prepared which addresses, at a minimum, an area approximating one or more of the subareas as shown on Map LU-4: Specific Plan Areas in the Timber Resources Industrial Land Use Designation. Specific plans shall meet the following minimum criteria:

- a) The specific plan shall make provisions for existing and future infrastructure connections such as roads, utilities, and coastal access to surrounding developed and undeveloped areas.
- b) The specific plan shall contain financing methods to provide infrastructure and public amenities based on a nexus between development exactions being imposed and the development-induced needs being met by those exactions, establish an orderly phasing of development, and include other measures as needed to protect the health, safety, and well-being of the community.
- c) The specific plan, and environmental studies required for that plan, shall be paid for by the applicant who may be repaid by future developers of other portions of the specific plan area on a pro rata basis.
- d) The specific plan shall be consistent with the Chapter 3 policies of the Coastal Act.

Policy LU-7.3 Siting New Industrial Development: Site new industrial development so that it is contiguous with, or in close proximity to, existing developed areas able to accommodate it, or where such areas are not able to accommodate it, in other areas with adequate public services and where it will not have significant adverse effects on coastal resources, either individually or cumulatively.

Policy LU-7.4: Where feasible, locate new hazardous industrial development away from existing developed areas.

Policy LU-7.5 Industrial Land Use Standards: Require that industrial development avoid or minimize creating substantial pollution, noise, glare, dust, odor, or other significant adverse impacts.

Program LU-7.5.1: Continue to enforce, and revise as needed, Coastal LUDC standards with regard to noise, glare, dust, odor, and other potentially adverse impacts of industrial activity.

Commercial & Recreational Fishing and Boating

Commercial fishing and recreational boating and fishing are located in Noyo Harbor. It is an all-weather port and the most active and important harbor between Bodega Bay and Eureka. The Noyo Harbor District has constructed 256 berths since 1968. Those berths are nearly always occupied, and approximately 43 percent of the boats moored there are commercial craft. The lower harbor area also contains parking and ship building areas, boat launching and repair facilities, fish processing plants, and marine supply stores. Commercial outlets, including visitor-oriented restaurants, are clustered on the north bank of the harbor. About a half-mile upriver, on the south side of the river, the Dolphin Cove private commercial marina provides berths for about 150 boats, most of which are recreational.

Several jurisdictions share responsibility for the Noyo Harbor, which is largely located in the County's jurisdiction but is within the City's Sphere of Influence. The U. S. Army Corps of Engineers is responsible for maintaining the channel. The Noyo Harbor District operates the harbor, docks, and related facilities and prepares long-term plans for facilities expansion. The State Department of Fish and Game, the State Department of Boating and Waterways, the California Coastal Commission, the County of Mendocino, and the City of Fort Bragg have partial responsibility and jurisdiction in the area.

The Coastal Act gives priority to coastal-dependent development such as commercial fishing and recreational boating over other types of land use on or near the shoreline.

Goal LU-8 Encourage a mixture of commercial fishing, recreational boating and fishing, mixed commercial and visitor-serving uses consistent with coastal access policies.

Policy LU.8.1: Annexation of Noyo Harbor: Consider annexation of the Noyo Harbor.

Program LU-8.1.1: Encourage the preparation of a specific plan for the Noyo Harbor with the cooperation and involvement of the Noyo Harbor District, the County of Mendocino, local property owners, and appropriate State agencies. Include in the specific plan policies that continue to give priority to coastal-dependent land uses such as commercial fishing, recreational boating, and related commercial uses, while increasing the range of visitor-serving uses on parcels not located directly on the coast or the Noyo River.

Program LU-8.1.2: Work with the County of Mendocino to improve emergency vehicle access and to establish a secondary access route to Noyo Harbor.

Policy LU-8.2: Facilities serving the commercial fishing and recreational boating industries shall be protected and, where feasible, upgraded. Existing commercial fishing and recreational boating harbor space shall not be reduced and shall be protected unless written findings are made that present and foreseeable future demand for the facilities that could be accommodated on the property is already adequately provided for in the area. Proposed recreational boating facilities shall, where feasible, be designed and located in such a fashion as not to interfere with the needs of the commercial fishing industry.

Policy LU-8.3: Increased recreational boating use of coastal waters shall be encouraged, in accordance with this division, by developing dry storage areas, increasing public launching facilities, providing additional berthing space in existing harbors, limiting non-water-dependent land uses that congest access corridors and preclude boating support facilities, providing harbors of refuge, and by providing for new boating facilities in natural harbors, new protected water areas, and in areas dredged from dry land.

Policy LU-8.4: The economic, commercial, and recreational importance of fishing activities shall be recognized and protected.

Aquaculture Development

Goal LU-9 Minimize impacts of aquaculture development on coastal resources.

Policy LU-9.1: Aquaculture Development. All aquaculture development or facilities shall require a coastal development permit and shall be consistent with all policies and standards of the certified LCP, including but not limited to policies regarding the protection of public access, water and marine resources, environmentally sensitive habitat areas, hazards, water quality, archaeological resources, and visual resources.

Policy LU-9.2: No intake or discharge lines shall be placed above ground in the Timber Resources Industrial District in any Environmentally Sensitive Habitat Areas as defined in Policy OS-1.2 and Section 30107.5 of the Coastal Act, including but not limited to, along portions of any coastal bluff that constitute ESHA, or within any rocky intertidal habitat area.

Policy LU-9.3: No intake or discharge lines shall be placed above ground within the Harbor District, the adjoining tidelands and submerged lands of the Noyo River, or on the face of coastal bluffs within the Timber Resources Industrial district, unless all other alternatives have been demonstrated to be infeasible or more environmentally damaging. Alternatives to be evaluated shall include, but not be limited to, (1) placing lines underground through use of directional drilling or trenching, (2) using closed-loop aquaculture systems that do not require offshore intake and discharge lines, and (3) connecting discharge lines to the existing sanitary sewer system. If all other alternatives have been demonstrated to be infeasible or more environmentally damaging and intake or discharge lines must be placed above ground within the Harbor District and the adjoining tidelands and submerged lands of the Noyo River, or on the face of coastal bluffs within the Timber Resources Industrial district, the lines shall be placed in the least environmentally damaging feasible location and in a manner that will not interfere with Noyo River navigation, existing recreational boating facilities, and coastal dependent industry, especially commercial fishing facilities.

Policy LU-9.4: Any intake or discharge lines allowed to be placed above ground within the Harbor District and the adjoining tidelands and submerged lands of the Noyo River shall be removed upon abandonment of the aquaculture development or facility it was installed to serve.

Policy LU-9.5: All aquaculture development or facilities shall be sited and designed to be visually compatible with the character of surrounding areas, and shoreline facilities shall be screened.

Policy LU-9.6: All aquaculture development or facilities shall be sited and designed to prevent impacts which would significantly degrade environmentally sensitive habitat areas, as defined in Policy OS-1.1 and section 30107.5 of the Coastal Act, and shall be compatible with the continuance of biological and ecological values in those habitat areas.

Policy LU-9.7: All aquaculture development or facilities shall be sited and designed to avoid encroachment of aquaculture operations into adjacent recreational areas.

Policy LU-9.8: No aquaculture development or facilities shall interfere with the public's right of access to the sea. All aquaculture development or facilities shall ensure adequate provision of lateral and vertical access.

Policy LU-9.9: All aquaculture development or facilities shall be sited and designed to: (1) minimize risks to life and property from geologic and flood hazards, including but not limited to bluff erosion, slope stability, seismic events, liquefaction, tsunamis, floods, and wave attack; and (2) assure stability and structural integrity, and neither create nor contribute significantly to erosion, geologic instability, or destruction of the site or surrounding area or in any way require the construction of protective devices that would substantially alter natural landforms along bluffs and cliffs.

Policy LU-9.10: Availability of adequate water to serve all aquaculture development or facilities shall be demonstrated prior to approval of such aquaculture development or facilities.

Policy LU-9.11: All aquaculture development or facilities shall be sited and designed to minimize the chances for release of non-native species, pathogens, and parasites into the aquatic environment.

Policy LU-9.12: All aquaculture development or facilities shall be sited and designed to ensure that waste discharges will comply with all applicable water quality regulations, including, but not limited to, any applicable regulations contained within (1) the State Water Resources Control Board's "Water Quality Control Plan, Ocean Waters of California" Ocean Plan, (2) the State Water Resources Control Board's "Water Quality Control Plan for Control of Temperature in the Coastal and Interstate Waters and Enclosed Bays and Estuaries of California" (Thermal Plan), and (3) the North Coast Regional Water Quality Control Board's (RWQCB) "Water Quality Control Plan for the North Coast Region" (Basin Plan).

Policy LU-9.13: All aquaculture development or facilities shall be sited and designed to minimize the discharge of pollutants to water, including but not limited to substances in concentrations toxic to human, animal, plant, or aquatic life.

Policy LU-9.14: All aquaculture development or facilities shall implement Best Management Practices (BMPs) to ensure the number and quantity of pollutants discharged or potentially discharged from the facility shall be minimized to the maximum extent feasible. BMPs shall

specifically address adequate cleaning, feeding, transfer and importation of species, husbandry practices, removal of dead species, storage and handling of raw material, drugs and chemicals, and disposal of solid waste.

Policy LU-9.15: All aquaculture development or facilities shall be carried out in a manner that will sustain the biological productivity of coastal waters, protect human health and maintain healthy populations of all species of marine organisms for long-term commercial, recreational, scientific and educational purposes.

Policy LU-9.16: Aquaculture facilities sited within the Harbor District shall not interfere with existing recreational boating facilities and existing coastal-dependent industry, including fishing.

Policy LU-9.17: Ocean front land that is suitable for coastal dependent aquaculture shall be protected for that use, and proposals for aquaculture facilities located on those sites shall be given priority, except over other coastal dependent developments or uses.

Residential Land

The residential neighborhoods of Fort Bragg are one of its most precious assets. Due to the layout of the City, most residential neighborhoods are relatively separated from commercial, retail, and industrial developments. Homes are typically located on local and collector streets, rather than on the busier arterial streets, thereby minimizing the number of residents exposed to heavy traffic and noise.

Many of the residences in Fort Bragg were built more than thirty years ago and ongoing repair and renovation are required to maintain these older homes. It is a priority of this Coastal General Plan to promote the preservation and rehabilitation of these older neighborhoods. Other priorities include maintaining the character of existing residential areas and providing additional areas for affordable housing, particularly for senior citizens. More detailed policies and programs regarding housing and enhancing the quality of the City's residential neighborhoods are contained in the Housing and the Community Design Elements.

Goal LU-10 Provide adequate land to accommodate the housing needs of all income groups.

Policy LU-10.1: Preserve Neighborhoods: Preserve and enhance the character of the City's existing residential neighborhoods.

Program LU-10.1.1: Use the minimum density indicated by the Land Use Designations Map as a starting point when determining specific density for a residential project. Densities above the minimum may be achieved only through a combination of the following: excellence of design, provision of affordable housing, effective mitigation of environmental constraints and impacts, demonstrated ability to provide services, and compatibility with adjacent development.

Program LU-10.1.2: Revise the Coastal LUDC to provide more refined Design Review Guidelines, which address the design, size, bulk, and scale of residential development and ensure that new residences are compatible with and enhance the character of the neighborhoods in which they are located.

Program LU-10.1.3: Revise the Coastal LUDC regulations for Planned Development (PD) to establish standards and procedures which encourage the use of the PD process in new residential development.

Locating New Development

Policy LU-10.2: Locating New Development. New residential, commercial, or industrial development, except as otherwise provided in the LCP, shall be located within, contiguous with, or in close proximity to, existing developed areas able to accommodate it or, where such areas are not able to accommodate it, in other areas with adequate public services and where it will not have significant adverse effects, either individually or cumulatively, on coastal resources. Where feasible, new hazardous industrial development shall be located away from existing developed areas.

Policy LU-10.3: The location and amount of new development shall maintain and enhance public access to the coast by: (1) facilitating the extension of transit services where feasible; (2) providing non-automobile circulation within the development that includes circulation connections outside of the development; (3) assuring that the recreational needs of new residents will be supported by onsite recreational facilities and/or off-site local park recreational facilities to ensure that coastal recreation areas are not overloaded; and (4) utilizing smart growth and mixed-use development concepts where feasible to improve circulation and reduce auto use, where such auto use would impact coastal access roads.

Policy LU-10.4: Ensure Adequate Services and Infrastructure for New Development. Development shall only be approved when it has been demonstrated that the development will be served with adequate water and wastewater treatment. Lack of adequate services to serve the proposed development shall be grounds for denial of the development.

Policy LU-10.5: Minimize Impacts on Air Quality and Green House Gasses. New development shall: 1) be consistent with requirements imposed by an air pollution control district or the State Air Resources Control Board as to each particular development, and 2) minimize energy consumption and vehicle miles traveled.

Policy LU-10.6: Protect Special Communities. New Development shall, where appropriate, protect special communities and neighborhoods which, because of their unique characteristics, are popular visitor destination points for recreational uses.

Policy LU-10.7: Priority for Coastal Dependent Uses. Coastal-dependent developments shall have priority over other developments on or near the shoreline. Except as provided elsewhere in this division, coastal-dependent developments shall not be sited in a wetland. When appropriate, coastal-related developments should be accommodated within reasonable proximity to the coastal-dependent uses they support.

3. PUBLIC FACILITIES ELEMENT

A. Purpose

This Element is intended to identify essential public facilities, buildings, and services and to describe policies and programs that will ensure that the existing and future population of Fort Bragg is provided the best feasible level of public services and infrastructure. Although not required as a separate Coastal General Plan element, this element compiles the public facilities planning requirements of the circulation, conservation, and open space elements in Government Code Section 65302.

B. Water Supply and Distribution

The City's current water supply system consists of the Newman Reservoir, the Simpson diversion, and a direct diversion in the Noyo River (which includes a wet well in the Noyo River, a pump station at the Noyo River, and various conveyances to the water treatment plant).

The City currently obtains about 50 percent of its water from the Noyo River. Under its existing temporary license, the City is entitled to draw up to 1,500 acre feet of water per year from the Noyo River so long as withdrawals do not exceed 3.0 cubic feet per second and specified amounts are maintained in the river to meet the needs of the fish population. The City currently uses about 36 percent of this entitlement. The City's Water Permit contains limits on how much water can be pumped from the Noyo River. These conditions were established in the past by the State Department of Health Services because, at the time, it was concluded that the City could not withdraw sufficient water from the Noyo River to meet its needs while retaining the required flows within the river necessary to support the fish population. To comply with these Permit conditions, the City requires that new development implement measures that limit new water demand.

The City is developing new water storage facilities to ensure adequate water during years of severe drought, including the installation of a new 45-acre foot reservoir at Newman Gulch. The City is also seeking additional water storage capacity to meet the needs of a buildout development scenario in the City of Fort Bragg. The City will apply for a permanent license to divert water from the Noyo River by 2009.

In the year 2007, the City produced 291,423,000 gallons of water from its three sources, or 113.6 gallons per day per person. Buildout over the next 10 years would generate a projected 1,900 additional people which would require production of an additional 200,000 gallons of water per day. The City will have sufficient water supply to meet this demand, though it may not have sufficient water storage. New development in the City will be required to pay its fair share of new water system improvements.

C. Sewer System

Sewage treatment and disposal are provided by the Fort Bragg Municipal Improvement District No. 1. The District is larger than the City; it includes much of the proposed Sphere of Influence. The District accepts septage from residences and businesses outside the City boundaries but within the District boundaries. Currently, the District facility serves residences and businesses within the City plus 102 septic tanks spread throughout the District plus septage from the area north of Pudding Creek.

The treatment and disposal facility currently disposes of about 640,000 gallons of treated wastewater per day (Average Dry Weather Flow - ADWF). The projected increase in population of about 1,900 people over the next ten years will increase wastewater flows to the plant by about 173,000 gallons per day ADWF.

The plant has a rated capacity of 1,000,000 gallons per day ADWF which is sufficient to meet the demand of the projected population increase. However, due to spikes in the inflow to the facility during wet weather (caused by infiltration and inflow into the collection lines), the plant's wet weather capacity is frequently exceeded, resulting in violations of the facility's National Pollutant Discharge Elimination System (NPDES) permit.

The City has installed a new secondary digester at the plant and will make additional improvements to the collection system to address infiltration and inflow problems. The new digester will allow closing down of the primary digester to allow cleaning and maintenance of this digester. Until the necessary improvements to the plant are fully funded and constructed, wet weather capacity at the plant will continue to be limited. The District is able to meet projected wastewater treatment and disposal demands. Future development will need to pay its fair share of any additional improvements that are needed.

D. Storm Drain System

Based on a Storm Drain Master Plan developed in 1985, the City adopted the "Drainage Facility Improvements and Drainage Fees" chapter (Chapter 12.14) of the City's Municipal Code. This Chapter allows the City to review new development proposals and condition those proposals to ensure that adequate on-site and off-site drainage is included in the development.

The priority storm drain improvements in the 2004 Master Plan have been implemented, although there are additional problems identified in that report that still need to be addressed. In addition, much of the area north of Pudding Creek, and south of the Noyo River generally do not have improved drainage systems in place. Drainage in these areas is generally provided by natural channels. Additional development per the Coastal General Plan would increase the amount of impervious surfaces in these areas, and unless adequate storm drains are provided, there will be localized flooding. New development will be required to pay for improvements necessary to ensure adequate capacity within the storm drain system.

E. Schools

Education in the area is provided by the Fort Bragg Unified School District. Within the Fort Bragg Planning Area, the District operates two elementary schools (Dana Gray Elementary School and Redwood Elementary School), one middle school (Fort Bragg Middle School), one high school (Fort Bragg High School), one continuation high school (Noyo High School), and one adult school (Coastal Adult School). The student capacity of the District's schools is 2,460 students. The history of student enrollment is shown in Table PF-1 below.

TABLE PF-1
ENROLLMENT AT FORT BRAGG UNIFIED SCHOOL DISTRICT FACILITIES

Type of School	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001
Elementary Schools	1,206	1,170	1,128	1,141	1,128	1,080	1,023	1,022	996	906
Middle School	576	583	604	624	607	578	525	528	509	509
High School	770	792	803	731	777	750	769	746	729	721
TOTAL	2,552	2,545	2,535	2,496	2,512	2,408	2,317	2,296	2,234	2,136

Source: Fort Bragg Unified School District CBEDS Enrollments

Development over the next ten years would generate 562 additional students. Given declining enrollment, the District believes it will have capacity for these students within existing school buildings. The 562 additional students are only 146 more students than District schools housed in 1992. Even if there is insufficient permanent classroom capacity and/or capacity at existing relocatable classrooms, the District could add additional relocatables and/or construct new permanent classrooms on existing campuses. In addition, there is no guarantee that District enrollment would actually increase by 562 students. Given recent declines in enrollment, it is possible that the student enrollment from existing residences in the District would continue to decline so that the student population in 2011 may be less than 562 new students. The District currently receives developer mitigation fees of \$2.24 per square foot for new residential construction and \$0.36 per square foot for new nonresidential construction. These fees are used to purchase and/or lease additional portable classrooms as needed and to repair or renovate existing schools.

F. Goals, Policies, and Programs

The following policies demarcated with the Fort Bragg City seal:  are not part of the certified LCP and do not govern the review and approval of coastal development permits: Policy PF-1.5 through Program PF-1.5.2; Policy PF-2.1 through Program PF-2.1.2; Policy PF-2.7; Policy PF-2.8; and Policy PF-2.9 through Program PF-2.9.1.

Goal PF-1 Ensure that new development is served by adequate public services and infrastructure.

Policy PF-1.1: All new development proposals shall be reviewed and conditioned to ensure that adequate public services and infrastructure can be provided to the development without substantially reducing the services provided to existing residents and businesses.

Program PF-1.1.1: New development shall be responsible for any improvements or extensions of infrastructure or the service capacity necessary to serve the development.

Policy PF-1.2: Ensure Adequate Services and Infrastructure for New Development. No permit for development shall be approved unless it can be demonstrated that such development will be served upon completion with adequate services, including but not limited to potable water; wastewater collection, treatment and disposal; storm drainage; fire and emergency medical response; police protection; transportation; schools; and solid waste collection and disposal; as applicable to the proposed development.

- a. Demonstration of adequate water and sewer facilities shall include evidence that adequate capacity will be available within the system to serve the development and all other known and foreseeable development the system is committed to serving, and that the municipal system will provide such service for the development;
- b. Demonstration of adequate road facilities shall include information demonstrating that (i) access roads connecting to a public street can be developed in locations and in a manner consistent with LCP policies; and (ii) that the traffic generated by the proposed development, and all other known and foreseeable development, will not cause Levels of Service (LOS) of roads, streets, and intersections within the City to reduce below LOS standards contained in Policy C-1.1 of the Circulation Element of the Coastal General Plan.

Policy PF-1.3: Ensure Adequate Service Capacity for Priority Uses.

- a. New development that increases demand for new services by more than one equivalent dwelling unit (EDU) shall only be permitted in the Coastal Zone if,
 - Adequate services do or will exist to serve the proposed development upon completion of the proposed development, and
 - Adequate services capacity would be retained to accommodate existing, authorized, and probable priority uses upon completion. Such priority uses include, but are not limited to, coastal dependent industrial (including commercial fishing facilities), visitor serving, and recreational uses in commercial, industrial, parks and recreation, and public facilities districts. Probable priority uses are those that do not require an LCP amendment or zoning variance in the Coastal Zone.
- b. Prior to approval of a coastal development permit, the Planning Commission or City Council shall make the finding that these criteria have been met. Such findings shall be based on evidence that adequate service capacity remains to accommodate the existing, authorized, and probable priority uses identified above.

Policy PF-1.4: New or expanded public works facilities shall be designed and limited to accommodate needs generated by development or uses permitted consistent with the provisions of this division; provided, however, that it is the intent of the Legislature that State Highway Route 1 in rural areas of the coastal zone remain a scenic two-lane road. Special districts shall not be formed or expanded except where assessment for, and provision of, the service would not induce new development inconsistent with the certified LCP. Where existing or planned public works facilities can accommodate only a limited amount of new development, services to coastal dependent land use, essential public services and basic industries vital to the economic health of the region, state, or

nation, public recreation, commercial recreation, and visitor-serving land uses shall not be precluded by other development.

Policy PF-1.5 Ensure Adequate Services and Infrastructure for Annexations: Review annexation requests to ensure that the area can be served with adequate potable water; wastewater collection, treatment, and disposal; storm drainage; fire and emergency medical response; police protection; transportation; schools; and solid waste collection and disposal.

Program PF-1.5.1: Areas to be annexed must be able to be served by existing City services or by services provided by other districts or agencies, or by environmentally and economically feasible extensions of these services. Any improvements or extensions required to serve the annexation area shall be paid for by property owners of the annexation area. The City will support annexations only upon a finding that infrastructure is available or that a specific development plan for extending or upgrading the infrastructure has been adopted by the City or other appropriate public service provider.

Program PF-1.5.2: Require that property owners requesting annexation for vacant parcels of land which do not propose any development and connections to City services enter into a recorded agreement with the City stating all annexation fees applicable for the density of the proposed development shall be paid in full prior to approval of any land use or building permits for the subject property.

Goal PF-2 Assure that the City's infrastructure is maintained and expanded to meet the needs of the City's residents.

Policy PF-2.1 Development Pays Its Share: Require that new development pay its share of capital improvements and the cost of public services to maintain adequate levels of service.

Program PF-2.1.1: Maintain development impact and mitigation fees at a level adequate to finance infrastructure costs. Periodically review the City's fee structure to ensure that it accurately reflects the actual cost of providing services.

Program PF-2.1.2: Consider revising the Coastal LUDC to require property owners seeking annexation approval to enter into a pre-annexation agreement stating that they will not oppose assessment districts, including lighting and street maintenance districts.

Policy PF-2.2: Potable Water Capacity: Develop long-term solutions regarding the supply, storage, and distribution of potable water and develop additional supplies. In addition to providing capacity for potential build-out under the City General Plan outside the coastal zone, any expansion of capacity of water facilities shall be designed to serve no more than the maximum level of development in the coastal zone allowed by the certified LCP that is consistent with all other policies of the LCP and Coastal General Plan. The City shall identify and implement water system improvements or changes in service areas that are designed to ensure adequate service capacity to accommodate existing, authorized, and projected probable future coastal dependent priority uses. Such uses include, but are not limited to, industrial (including commercial fishing facilities), visitor serving, and recreational priority uses in commercial, industrial, parks and recreation, and public facilities districts.

Program PF-2.2.1: Maintain and update a Water System Master Plan and identify capital improvements required to meet anticipated demand.

Program PF-2.2.2: Monitor, on an ongoing basis, the capacity of the potable water system in relation to the anticipated demand.

Program PF-2.2.3: Evaluate, and periodically adjust as appropriate, water capital improvement installation and user fees to reflect the actual cost of providing water service and increasing capacity.

Program PF-2.2.4: Pursue all available sources of revenue to fund the maintenance and expansion of the City's water system.

Program PF-2.2.5: Develop a program to encourage and allow the safe use of graywater.

Program PF-2.2.6: Obtain a permanent license for the water rights initially permitted to the City by the State Division of Water Rights in 1956.

Program PF-2.2.7: Reconstruct the Madsen Hole pump station, construct a new raw water line from the Madsen Hole pump station to Sherwood Road, and reconstruct water storage ponds.

Program PF-2.2.8: Improve the pressure in the water system lines to meet State standards.

Policy PF-2.3 Emergency Water Supply: Develop an emergency water supply for disaster preparedness.

Program PF-2.3.1: Provide a means for obtaining and treating water from Pudding Creek or the Noyo River for emergency disaster situations only, if allowed by the State and if deemed feasible.

Policy PF-2.4: Potable Water Quality: Maintain the safety of the water supply.

Program PF-2.4.1: Continue to maintain the water collection, treatment, and distribution system to ensure compliance with all State requirements for a public drinking water system.

Program PF-2.4.2: Provide security and protection for the watersheds and water storage and treatment facilities with monitoring, appropriate notices, physical barriers, and protective devices as well as land use policies and controls.

Program PF-2.4.3: Develop long range management and improvement programs for the watersheds. These plans should include management practices and methods of protecting the water source from degradation.

Program PF-2.4.4: Develop and secure additional water storage capacity to meet potential buildout water use needs for the City of Fort Bragg.

Policy PF-2.5: Wastewater Capacity: Review wastewater capacity and expansion plans as needed when regulations change and as the treatment and disposal facility nears capacity. In addition to providing capacity for potential build-out under the City General Plan outside the coastal zone, any expansion of capacity of wastewater facilities shall be designed to serve no more than the maximum level of development in the coastal zone allowed by the certified LCP that is consistent with all other policies of the LCP and Coastal General Plan. The City shall identify and implement wastewater system improvements or changes in service area that are designed to ensure adequate service capacity to accommodate existing, authorized, and probable future priority uses. Such uses include, but are not limited to, industrial (including commercial fishing facilities), visitor serving, and recreational priority uses in commercial, industrial, parks and recreation, and public facilities districts.

Program PF-2.5.1: Develop a Wastewater System Master Plan.

Program PF-2.5.2: Continue to improve the wastewater treatment and disposal facility to comply with changing State requirements.

Program PF-2.5.3: Upgrade wastewater collector lines in areas where there is inadequate capacity or where lines are subject to substantial infiltration and inflow

Program PF-2.5.4: Evaluate and periodically adjust, as appropriate, wastewater capital improvement, installation, and user fees to reflect the actual cost of providing wastewater collection, treatment, and disposal service and increasing capacity.

Policy PF-2.6 Storm Drainage: Annually review storm drain system capacity and expansion plans.

Program PF-2.6.1: Update the Storm Drain Master Plan to comply with NPDES requirements and to address current efficiencies in the system.

Program PF-2.6.2: Implement the storm drain recommendations contained in the Capital Improvement Plan (CIP) and update the CIP as necessary.

Program PF-2.6.3: Continue to implement, and update as needed, the Storm Drain Master Plan and the improvements itemized in the Capital Improvement Plan.

Program PF-2.6.4: Periodically adjust, as appropriate, drainage capital improvement installation fees to reflect the actual cost of providing drainage service and increasing capacity.

Policy PF-2.7 Public Buildings: Ensure that public buildings in the City are adequate to provide services for the community.

Program PF-2.7.1: Identify and map key public buildings and areas.

Program PF-2.7.2: Provide for relocation or upgrading of essential public buildings as necessary.

Policy PF-2.8 Capital Improvement Plan: Continually update the Capital Improvement Plan to ensure that it identifies capital projects necessary to maintain adequate levels of performance as well as funding sources for all phases of intended projects.

Policy PF-2.9 Schools: Work with the Fort Bragg Unified School District to ensure that the District has the means to provide a high quality education to City students.

Program PF-2.9.1: Work with the School District to address anticipated deficits between the cost of constructing necessary new schools or renovating existing schools and the revenues generated by developer fees. Where a clear nexus can be shown between the impacts of a new development and the need for new school facilities, the City shall consider the need for additional project mitigation to be provided by project developers to the degree allowed by State law.

4. CONSERVATION, OPEN SPACE, ENERGY, AND PARKS ELEMENT

A. Purpose

The Conservation, Open Space, Energy, and Parks Element of the Coastal General Plan combines two State-mandated elements, Conservation and Open Space. It also includes policies and programs addressing energy conservation, Environmentally Sensitive Habitat Areas, water quality, public access, and recreation.

Open space is defined by Government Code Section 65561 as “any area of land or water which is essentially unimproved and devoted to open space use and which is designated on local, regional or a State open space plan for the preservation of natural resources, the managed production of resources, outdoor recreation, or for public health and safety.” Fort Bragg’s open space includes lands which are publicly-owned and operated for active or passive recreational use and land which is in private ownership but is either undeveloped or managed for the protection and enhancement of natural resources. Open space in Fort Bragg provides for coastal access, recreational uses, scenic and aesthetic resources, and habitat preservation.

The City wishes to create a sustainable environment by conserving natural resources, reducing anthropogenic greenhouse gases, and encouraging its citizens to reduce their carbon footprint. The City also wishes to preserve as much open space as feasible to provide habitat for native species of plants and wildlife, reduce sprawl, and maintain the aesthetic benefits of undeveloped land, and to provide its residents with a full range of recreational opportunities. The City seeks to conserve natural resources and provide its residents with a full range of recreational opportunities. The goals, policies, and programs of this Element address these aims by establishing the framework for the protection and enhancement of natural resources, reduction of greenhouse gas emissions, protection of water quality, and enhancement of open space, and for the provision of coastal access and recreational opportunities for Fort Bragg residents and visitors.

The Draft EIR for the General Plan contains a full description of the natural resources, parks, trails, and recreational facilities existing within the Planning Area. The Draft EIR also contains a full description of natural resources occurring within the Planning Area. See Map OS-1 for a depiction of Environmentally Sensitive Habitat Areas, Map OS-2 for a depiction of Special Review Areas, Map OS-3 for a listing of existing trails, and Map OS-4 for a depiction of existing parks and recreational facilities.

B. Goals, Policies, and Programs

The following policies demarcated with the Fort Bragg City seal:  are not part of the certified LCP and do not govern the review and approval of coastal development permits: Policy OS-7.1, Policy OS-7.2, Policy OS-8.1, Policy OS-17.4, Policy OS-17.5, Policy OS-17.7, Policy OS-18.2, and Policy OS-18.3,

Environmentally Sensitive Habitat Areas and Conservation

Goal OS-1 Preserve and Enhance the City's Environmentally Sensitive Habitat Areas

Policy OS-1.1: Definition of ESHA. "Environmentally sensitive habitat area" means any area in which plant or animal life or their habitats are either rare or especially valuable because of their special nature or role in an ecosystem and which could be easily disturbed or degraded by human activities and developments.

Protection of environmentally sensitive habitat areas is one of the essential aspects of the Coastal Act. Fort Bragg has several environmentally sensitive habitat areas including, but not limited to, portions of coastal bluffs, biologically rich tide pools, nesting grounds, kelp beds, wetlands, riparian habitats, and rare, threatened, or endangered plants or plant communities.

Areas that may contain environmentally sensitive habitat areas include, but are not limited to, areas indicated by Map OS-1: Open Space and Environmentally Sensitive Habitat Areas. The environmentally sensitive habitat areas shown on Map OS-1 are based on the best information available at the time mapping was done. The boundaries of environmentally sensitive habitat areas identified in Map OS-1 are not intended to be definitive, but to identify the general location of sensitive environmental resources. Detailed locations and boundaries of these resources shall be obtained by the preparation of biological reports described in Policy OS-1.7.

Policy OS-1.2: Determination of ESHA. The determination of what constitutes ESHA shall not be limited by what is mapped and not all parcels that are mapped necessarily contain ESHA. Map OS-1 serves to identify those general areas known to potentially contain ESHA and for which a biological report is required consistent with Policy OS-1.7 to substantiate the presence or absence of ESHA on any particular parcel. Any area not designated on LUP Map OS-1 that meets the ESHA definition is ESHA and shall be accorded all the protection provided for ESHA in the LCP. All habitat maps shall include a note that states that "the maps may be updated as appropriate and may not include all areas that constitute ESHA." The following areas shall be considered ESHA:

- Any habitat area that is rare or especially valuable because of their special nature or role in an ecosystem and is easily degraded or disturbed by human activities or developments.
- Any habitat area of plant or animal species designated as rare, threatened, or endangered under State or Federal law.
- Any habitat area of species designated as Fully Protected or Species of Special Concern under State law or regulations.
- Any habitat area of plant species for which there is compelling evidence of rarity, for example, those designated 1b (Rare or endangered in California and elsewhere) or 2 (rare, threatened or endangered in California but more common elsewhere) by the California Native Plant Society.

Program OS-1.2.1: Update the mapping of environmentally sensitive habitat areas as new information becomes available.

Policy OS-1.3: Development in ESHA Wetlands: Diking, Filling, and Dredging of open coastal waters, wetlands, estuaries, and lakes shall be permitted where there is no feasible less

environmentally damaging alternative, and where feasible mitigation measures have been provided to minimize adverse environmental effects, and shall be limited to the following uses:

- a. New or expanded port, energy, and coastal-dependent industrial facilities, including commercial fishing facilities.
- b. Maintaining existing or restoring previously dredged depths in existing navigational channels, turning basins, vessel berthing and mooring areas, and boat launching ramps.
- c. New or expanded boating facilities and the placement of structural pilings for public recreational piers that provide public access and recreational opportunities.
- d. Incidental public service purposes, including but not limited to burying cables and pipes or inspection of piers and maintenance of existing intake and outfall pipelines.
- e. Restoration purposes.
- f. Nature study, aquaculture, or similar resource dependent activities.

Policy OS-1.4: The more specific permissible use provisions for wetlands identified in Policy OS-1.3 shall control over the more general permissible use provisions for other types of ESHA identified in Policy OS-1.5 and Policy OS-1.6.

Policy OS-1.5: Development in Rivers and Streams with ESHA. Channelizations, dams, or other substantial alterations of rivers and streams shall incorporate the best mitigation measures feasible, and be limited to:

- a. Necessary water supply projects,
- b. Flood control projects where no other method for protecting existing structures in the floodplain is feasible and where such protection is necessary for public safety or to protect existing development, or
- c. Developments where the primary function is the improvement of fish and wildlife habitat.

Policy OS-1.6: Development within Other Types of ESHA shall protect ESHA against any significant disruption of habitat values and shall be limited to the following uses:

- a. Resource Dependent Uses. Public nature trails within riparian ESHA are considered a resource dependent use provided that: (1) the length of the trail within the riparian corridor shall be minimized; (2) the trail crosses the stream at right angles to the maximum extent feasible; (3) the trail is kept as far up slope from the stream as possible; (4) trail development involves a minimum of slope disturbance and vegetation clearing; and (5) the trail is the minimum width necessary. Interpretive signage may be used along permissible nature trails accessible to the public to provide information about the value and need to protect sensitive resources.
- b. Restoration projects where the primary purpose is restoration of the habitat.
- c. Invasive plant eradication projects if they are designed to protect and enhance habitat values.
- d. Pipelines and utility lines installed underneath the ESHA using directional drilling techniques designed to avoid significant disruption of habitat values.

Policy OS-1.7 Development in areas adjacent to Environmentally Sensitive Habitat Areas shall be sited and designed to prevent impacts which would significantly degrade such areas, and shall be compatible with the continuance of such habitat areas.

Policy OS-1.8: Development adjacent to ESHA shall provide buffer areas to serve as transitional habitat and provide distance and physical barriers to human intrusion. The purpose of this buffer area is to provide for a sufficient area to protect environmentally sensitive habitats

from significant degradation resulting from future development. Buffers shall be of a sufficient size to ensure the biological integrity and preservation of the ESHA they are designed to protect. The width of the buffer area shall be a minimum of 100 feet, unless an applicant can demonstrate, after consultation with the California Department of Fish and Game, other relevant resource agencies, and the City, that 100 feet is not necessary to protect the resources of that particular habitat area and the adjacent upland transitional habitat function of the buffer from possible significant disruption caused by the proposed development. The buffer area shall be measured from the outside edge of the environmentally sensitive habitat areas and in no event shall be less than 30 feet in width.

Policy OS-1.9: Utilize the following criteria to establish buffer areas:

- a. Biological Significance of Adjacent Lands. Lands adjacent to a wetland, stream, or riparian habitat area vary in the degree to which they are functionally related to these habitat areas. Functional relationships may exist if species associated with such areas spend a significant portion of their life cycle on adjacent lands. The degree of significance depends upon the habitat requirements of the species in the habitat area (e.g., nesting, feeding, breeding, or resting).
Where a significant functional relationship exists, the land supporting this relationship shall also be considered to be part of the ESHA, and the buffer zone shall be measured from the edge of these lands and be sufficiently wide to protect these functional relationships. Where no significant functional relationships exist, the buffer shall be measured from the edge of the ESHA that is adjacent to the proposed development.
- b. Sensitivity of Species to Disturbance. The width of the buffer zone shall be based, in part, on the distance necessary to ensure that the most sensitive species of plants and animals will not be disturbed significantly by the permitted development. Such a determination shall be based on the following after consultation with the Department of Fish and Game or others with similar expertise:
 - (i) Nesting, feeding, breeding, resting, or other habitat requirements of both resident and migratory fish and wildlife species;
 - (ii) An assessment of the short-term and long-term adaptability of various species to human disturbance;
 - (iii) An assessment of the impact and activity levels of the proposed development on the resource.
- c. Erosion susceptibility. The width of the buffer shall be based, in part, on an assessment of the slope, soils, impervious surface coverage, runoff characteristics, erosion potential, and vegetative cover of the parcel proposed for development and adjacent lands. A sufficient buffer to allow for the interception of any additional material eroded as a result of the proposed development shall be provided.
- d. Use natural topography. Where feasible, use hills and bluffs adjacent to Environmentally Sensitive Habitat Areas, to buffer these habitat areas. Where otherwise permitted, locate development on the sides of hills away from Environmentally Sensitive Habitat Areas. Include bluff faces in the buffer area.
- e. Use existing man-made features. Where feasible, use man-made features such as roads and dikes to buffer environmentally sensitive habitat areas.
- f. Lot Configuration and Location of Existing Development. Where an existing subdivision or other development is largely built-out and the buildings are a uniform distance from a habitat area, at least that same distance shall be required as a buffer zone for any new development permitted. However, if that distance is less than one hundred (100) feet, additional mitigation measures (e.g., planting of native vegetation) shall be provided to ensure additional protection.

- g. **Type and Scale of Development Proposed.** The type and scale of the proposed development will, to a large degree, determine the size of the buffer zone necessary to protect the ESHA. Such evaluations shall be made on a case-by-case basis depending upon the resources involved, the degree to which adjacent lands are already developed, and the type of development already existing in the area.

Required buffer areas shall be measured from the following points as applicable:

- The outer edge of the canopy of riparian vegetation for riparian ESHA, or from the top of stream bank where no riparian vegetation exists.
- The upland edge of a wetland for a wetland ESHA.
- The outer edge of the plants that comprise the rare plant community for rare plant community ESHA.

Policy OS-1.10: Permitted Uses within ESHA Buffers. Development within an Environmentally Sensitive Habitat Area buffer shall be limited to the following uses:

- a. Wetland Buffer.
 - i. Uses allowed within the adjacent Wetland ESHA pursuant to Policy OS-1.3.
 - ii. Nature trails and interpretive signage designed to provide information about the value and protection of the resources
 - iii. Invasive plant eradication projects if they are designed to protect and enhance habitat values.
- b. Riparian Buffer.
 - i. Uses allowed within the adjacent River and Stream ESHA pursuant to Policy OS-1.5.
 - ii. Uses allowed within the adjacent ESHA pursuant to Policy OS-1.6.
 - iii. Buried pipelines and utility lines.
 - iv. Bridges.
 - v. Drainage and flood control facilities.
- c. Other types of ESHA Buffer.
 - i. Uses allowed within the adjacent ESHA pursuant to Policy OS-1.6.
 - ii. Buried pipelines and utility lines.
 - iii. Bridges.
 - iv. Drainage and flood control facilities.

Policy OS-1.11: Land Divisions and ESHA. Prohibit new land divisions creating new parcels located entirely within an environmentally sensitive habitat area or buffer area unless the parcel to be created is restricted at the time of its creation solely for open space, public recreation, or conservation.

Policy OS-1.12: Drainage and Erosion Control Plan. Permissible development on all properties containing environmentally sensitive habitat, including but not limited to those areas identified as ESHA Habitat Areas on Map OS-1, shall prepare a drainage and erosion control plan for approval by the City. The plan shall include measures to minimize erosion during project construction, and to minimize erosive runoff from the site after the project is completed. Any changes in runoff volume, velocity, or duration that may affect sensitive plant and animal populations, habitats, or buffer areas for those populations or habitats, shall be reviewed by a qualified biologist to ensure that there will not be adverse hydrologic or, erosion, or sedimentation impacts on sensitive species or habitats. Mitigation measures shall be identified and adopted to minimize potential adverse runoff impacts. All projects resulting in new runoff to

any streams in the City or to the ocean shall be designed to minimize the transport of pollutants from roads, parking lots, and other impermeable surfaces of the project.

Policy OS-1.13: Landscaping Adjacent to ESHA. All development located within or adjacent to environmentally sensitive habitat areas shall be conditioned to:

- a) Require all proposed plantings be obtained from local genetic stocks within Mendocino County. If documentation is provided to the review authority that demonstrates that native vegetation from local genetic stock is not available, native vegetation obtained from genetic stock outside the local area, but from within the adjacent region of the floristic province, may be used; and if local genetic stocks within the floristic province are unavailable, the Director may authorize use of a commercial native mix, provided it is clear of invasive seed. Director may also authorize use of a seed mix that is selected for rapid senescence and replacement with native stock; and
- b) Require an invasive plant monitoring and removal program; and
- c) Prohibit the planting of any plant species on the property that is (a) listed as problematic and/or invasive by the California Native Plant Society, the California Invasive Plant Council, and/or by the State of California, or (b) listed as a 'noxious weed' by the State of California or the U.S. Federal Government.

Policy OS-1.14: Vegetation Removal in ESHA. Prohibit vegetation removal in Environmentally Sensitive Habitat Areas and buffer areas except for:

- a) Vegetation removal authorized through coastal development permit approval to accommodate permissible development,
- b) Removal of trees for disease control,
- c) Vegetation removal for public safety purposes to abate a nuisance consistent with Coastal Act Section 30005, or
- d) Removal of firewood for the personal use of the property owner at his or her residence to the extent that such removal does not constitute development pursuant to Coastal Act Section 30106.

Such activities shall be subject to restrictions to protect sensitive habitat values.

Policy OS-1.15: Implement the following measures when a project involves dredging, filling or diking of open coastal waters, wetlands, estuaries, or lakes:

- a) Dredging and spoils disposal shall be planned and carried out to avoid significant disruption to marine and wildlife habitats and to water circulation to the maximum extent feasible. Avoiding significant disruption means, in part, that the functional capacity of the wetland is maintained to the maximum extent feasible.
- b) Limitations may be imposed, including but not limited to, limitations on the timing of the operation, the type of operation, the quantity of dredged material removed, and the location of the spoils site.
- c) Dredge spoils suitable for beach replenishment shall, where feasible, be transported to appropriate beaches or into suitable longshore current systems.
- d) Other mitigation measures may include opening areas to tidal action, removing dikes, improving tidal flushing, or other restoration measures.

Program OS-1.15.1: Consult with the Department of Fish and Game, California Coastal Commission, and U.S. Army Corps of Engineers, as applicable, on the review of dredging, filling and diking plans in, or adjacent to wetlands or estuaries to establish mitigating measures.

Policy OS-1.16: Biological Report Required.

- a) Permit applications for development within or adjacent to Environmentally Sensitive Habitat Areas including areas identified in Map OS-1 or other sites identified by City staff which have the possibility of containing environmentally sensitive habitat shall include a biological report prepared by a qualified biologist which identifies the resources and provides recommended measures to ensure that the requirements of the Coastal Act and the City of Fort Bragg's Local Coastal Program are fully met. The required content of the biological report is specified in the Coastal Land Use and Development Code.
- b) Submittal of Biological Reports. These biological reports shall be reviewed by the City and approving agencies. The biological reports described above shall be submitted prior to filing as complete a coastal development permit application and may also be submitted as a part of any environmental documentation required pursuant to CEQA. The selection of the professional preparing the report shall be made or approved by the City or the agency approving the permit and paid for by the applicant.
- c) Biological reports shall contain mitigating measures meeting the following minimum standards:
 - i. They are specific, implementable, and, wherever feasible, quantifiable.
 - ii. They result in the maximum feasible protection, habitat restoration and enhancement of sensitive environmental resources. Habitat restoration and enhancement shall be required wherever feasible, in addition to the applicable baseline standard of either avoiding or minimizing significant habitat disruption.
 - iii. They are incorporated into a Mitigation Monitoring Program; and
 - iv. They include substantial information and analysis to support a finding that there is no feasible, less environmentally damaging alternative.

Goal OS-2 Preserve and enhance the City's other natural resources.

Policy OS-2.1 Riparian Habitat: Prevent development from destroying riparian habitat to the maximum feasible extent. Preserve, enhance, and restore existing riparian habitat in new development unless the preservation will prevent the establishment of all permitted uses on the property.

Program OS-2.1.1: To the maximum extent feasible, preserve, protect, and restore streams and creeks to their natural state.

Program OS-2.1.2: Work with organizations and private property owners to enhance the City's watercourses for habitat preservation and recreation.

Program OS-2.1.3: Develop additional guidelines for the maintenance of watercourses to further assure that native vegetation is not unnecessarily removed and that maintenance minimizes disruption of wildlife breeding activities and wildlife movement. Incorporate these guidelines, where appropriate, into the City's maintenance procedures.

Program OS-2.1.4: Seek Federal and State funding for the repair of streambank erosion, planting of riparian vegetation to stabilize creek banks, and removal of debris obstructing waterflow.

Policy OS-2.2: Protect Aquifers: Protect groundwater aquifers.

Program OS-2.2.1: Continue to require the preparation of a hydrologic study prior to approving new wells for domestic use in the City.

Program OS-2.2.2: Prior to consideration of any new development on the Todd Point aquifer, a project-specific hydrologic design analysis shall be prepared by the project applicant to recommend specific mitigation measures to minimize runoff from the site in order to retain existing levels of groundwater recharge. (Examples of such measures include establishment of retention basins, establishment of percolation chambers, use of permeable paving materials, etc.)

If the design analysis concludes that the project will result in a net decrease in groundwater recharge from the project site, then a supplemental hydrologic analysis shall be prepared by the applicant which evaluates cumulative hydrologic impacts. The study shall establish a baseline of aquifer supply to existing residential wells on Todd Point and evaluate cumulative impacts to aquifer recharge from all projected development on Todd Point.

If the supplemental hydrologic analysis shows that the cumulative development would adversely impact existing Todd Point wells, then the study shall establish the nexus for new development, both in the City and in the County, to pay its pro rata share of the costs of extending City water service to the affected existing residences.

Prior to new development, the City will establish a program that identifies how fees will be collected to extend City water, what existing residences will be served, and when the water service would be extended.

The cost of preparing the cumulative hydrologic study will be borne by the first application received which triggers this requirement, and all future applicants for new development on Todd Point will be required to reimburse the original applicant their fair share of the hydrologic study.

Goal OS-3 Protect and preserve soil as a natural resource.

Policy OS-3.1 Soil Erosion: Minimize soil erosion to prevent loss of productive soils, prevent landslides, and maintain infiltration capacity and soil structure.

Goal OS-4 Protect and preserve Cultural Resources.

Policy OS-4.1. Preserve Archaeological Resources. New development shall be located and/or designed to avoid archaeological and paleontological resources where feasible, and where new development would adversely affect archaeological or paleontological resources, reasonable mitigation measures shall be required.

Policy OS-4.2: Archaeological Resources Report Required.

- A) Development located within areas of known or potential archaeological or paleontological resources included in (i) – (iv) shall be required to submit a report consistent with the requirements of section B below prior to approval of a building, grading, or coastal development permit for the development.
- i. Former Georgia Pacific timber mill. The entire property which comprises the former Georgia-Pacific timber mill site;
 - ii. Noyo Bay. The area located along the south side of Noyo Bay (e.g., Todd Point);
 - iii. Noyo River. All of the areas located adjacent to the north side of the Noyo River;
 - iv. North Fort Bragg Coast. All of the areas located west of Highway 1 and north of Pudding Creek;
 - v. Special Review Areas. All Special Review Areas identified on Map OS-2 in the Coastal General Plan; and
 - vi. Other areas identified by the Director. Other areas identified by the environmental review process (Chapter 18.72), or brought to the attention of the City through special studies performed after the enactment of this Section, as having the potential for containing archaeological or paleontological resources.
- B) Report required. A project specific report shall be prepared by a qualified archaeologist and shall be submitted prior to filing as complete a coastal development permit application. The permit review authority may waive the requirement for a project specific report if the Director determines that an existing report satisfies the requirements of this section. The report shall be prepared consistent with the requirements of Section 18.50.030 of the Coastal Land Use & Development Code.

Policy OS-4.3: Halt all work if archaeological resources are uncovered during construction. Require an evaluation by a qualified archaeologist before recommencing construction.

Policy OS-4.4: Locate and/or design new development to avoid archaeological resources where feasible.

Policy OS-4.5: Mitigation shall be designed in compliance with the guidelines of the State Office of Historic Preservation and the State Native American Heritage Commission.

Goal OS-5 Preserve areas with other biotic resources.

Policy OS-5.1 Native Species: Preserve native plant and animal species and their habitat.

Policy OS-5.2: To the maximum extent feasible and balanced with permitted use, require that site planning, construction, and maintenance of development preserve existing healthy trees and native vegetation on the site.

Policy OS-5.3: Require site planning and construction to maintain adequate open space to permit effective wildlife corridors for animal movement between open spaces.

Policy OS-5.4: Condition development projects, requiring discretionary approval to prohibit the planting of any species of broom, pampas grass, gorse, or other species of invasive non-native plants deemed undesirable by the City.

Program OS-5.4.1: Request that Caltrans, PG&E, and the County of Mendocino remove pampas grass and broom from their rights-of-way. The City shall strive to remove these plants from City-owned rights-of-way.

Goal OS-6 Reduce dependence on non-renewable energy and materials.

Policy OS-6.1 Energy Conservation Measures in Buildings: Continue to require structures to comply with State energy conservation standards and encourage owners of existing dwellings to retrofit with energy-saving features.

Program OS-6.1.1: Require retrofitting of energy-saving features in existing dwellings as a part of the City's Housing Rehabilitation Program by providing information, technical assistance, and other incentives.

Program OS-6.1.2: Review and revise the Zoning and Subdivision Ordinances to incorporate standards for energy-efficient development, including site orientation, building design, use of materials, landscaping, solar access, and solar space and water heating.

Policy OS-6.2 Development Review Process: Make energy conservation an important criterion in the development review process.

Program OS-6.2.1: Adopt a solar access ordinance which would require development applications to be reviewed for potential energy conservation measures and designs including site orientation, building design and use of materials, landscaping, and solar access.

Program OS-6.2.2: Include a section on energy-efficient features in the Design Review Guidelines.

Program OS-6.2.3: Obtain PG&E assistance in reviewing commercial buildings and major subdivisions during the design and approval process to incorporate energy-efficient design suggestions into the plans.

Policy OS-6.3 Alternative Energy: Encourage the development and use of alternative sources of energy such as wind, solar, and waves to meet Fort Bragg's energy needs.

Program OS-6.3.1: Revise the Coastal LUDC to allow alternative energy facilities for on-site use as a conditional use in all zones within the City. Solar energy facilities for on-site use shall be allowed as a permitted use in all zoning districts.

Goal OS-7 Improve air quality.

Policy OS-7.1 Participate in Regional Planning to Improve Air Quality: Continue to cooperate with the Mendocino County Air Quality Management District (MCAQMD) in implementing the *Regional Clean Air Plan*.

Policy OS-7.2 Air Quality Standards: Seek to comply with State and Federal standards for air quality.

Program OS-7.2.1: Adopt a plan and timelines to reduce greenhouse gas emissions for City operations through the establishment and implementation of a Greenhouse Gas Reduction Action Plan.

Program OS-7.2.2: Consider adopting a plan and timeline to eliminate emissions from the City's transportation sector by replacing internal combustion vehicles with zero emission vehicles (ZEV) to maintain compliance with AB 32, the California Global Warming Solutions Act passed in September 2006.

Program OS-7.2.3: Review new project proposals for consistency with MCAQMD regulations and guidelines.

Program OS-7.2.4: Revise the Coastal LUDC to require that all new woodburning stoves and heaters meet current EPA standards for woodburning devices. Do not allow woodburning devices in commercial or industrial development (except for use in operating the existing or an upgraded powerhouse on the Georgia-Pacific property solely for processing forest products).

Program OS-7.2.5: Work with the Mendocino County Air Quality Management District to ensure that all new industrial projects include Best Available Control Technologies (BACTs) to control emissions of air pollutants to the maximum extent permitted by law.

Program OS-7.2.6: Require that proposed new asphalt plants undergo an air quality analysis that includes analysis of emissions, dispersion modeling, risk analysis, and mitigation required to reduce pollution and risk.

Program OS-7.2.7: Include thorough dust control provisions in the Grading Ordinance.

Program OS-7.2.8: The City will prohibit unpaved driveways of more than 50 feet and unpaved roads in all new development.

Goal OS-8 Reduce, recycle, and reuse solid waste generated in the City.

Policy OS-8.1 Recycling and Reuse of Solid Waste: Comply with State requirements to reduce the volume of solid waste through recycling and reduction of solid waste.

Program OS-8.1.1: Enact ordinances requiring recycling, reuse, and waste reduction, including recycling of green waste and construction debris.

Program OS-8.1.2: Require on-site areas for recycling in commercial, office, multi-family residential developments, and all municipal facilities.

Program OS-8.1.3: Continue to participate in the County's Integrated Waste Management Plan operated by the Mendocino Solid Waste Management Authority.

C. Water Quality

Goal OS-9 Improve water quality.

Policy OS-9.1: Minimize Introduction of Pollutants. Development shall be designed and managed to minimize the introduction of pollutants into coastal waters (including the ocean, estuaries, wetlands, rivers, streams, and lakes) to the extent feasible.

Policy OS-9.2: Minimize Increases in Stormwater Runoff. Development shall be designed and managed to minimize post-project increases in stormwater runoff volume and peak runoff rate, to the extent feasible, to avoid adverse impacts to coastal waters.

Policy OS-9.3: Maintain Biological Productivity and Quality of Coastal Waters. Development shall be designed and managed to maintain, and restore where feasible, the biological productivity and quality of coastal waters, consistent with sections 30230, 30231, and other relevant sections of the California Coastal Act. The Coastal Act sections set forth below are incorporated herein as policies of the Land Use Plan:

Policy OS-9.4: Maintain, Enhance, and Restore Marine Resources. Marine resources shall be maintained, enhanced, and, where feasible, restored. Special protection shall be given to areas and species of special biological or economic significance. Uses of the marine environment shall be carried out in a manner that will sustain the biological productivity of coastal waters and that will maintain healthy populations of all species of marine organisms adequate for long-term commercial, recreational, scientific, and educational purposes.

Policy OS-9.5: Maintain and Restore Biological Productivity and Water Quality. The biological productivity and the quality of coastal waters, streams, wetlands, estuaries, and lakes appropriate to maintain optimum populations of marine organisms and for the protection of human health shall be maintained and, where feasible, restored through, among other means, minimizing adverse effects of waste water discharges and entrainment, controlling runoff, preventing depletion of ground water supplies and substantial interference with surface water flow, encouraging waste water reclamation, maintaining natural vegetation buffer areas that protect riparian habitats, and minimizing alteration of natural streams.

Goal OS-10 Improve water quality through the Selection and Design of Appropriate Best Management Practices (BMPs)

Policy OS-10.1: Construction-phase Stormwater Runoff Plan. All development that requires a grading permit shall submit a construction-phase erosion, sedimentation, and polluted runoff control plan. This plan shall evaluate potential construction-phase impacts to water quality and coastal waters, and shall specify temporary Best Management Practices (BMPs) that will be implemented to minimize erosion and sedimentation during construction, and prevent contamination of runoff by construction chemicals and materials.

Source: City of Fort Bragg
July, 2008

Scale 1" = 2300' (approximate)
For Schematic purposes only

Policy OS-10.2: Post-Construction Stormwater Runoff Plan. All development that has the potential to adversely affect water quality shall submit a post-construction polluted runoff control plan ("Runoff Mitigation Plan"). This plan shall specify long-term Site Design, Source Control, and, if necessary, Treatment Control BMPs that will be implemented to minimize stormwater pollution and erosive runoff after construction, and shall include the monitoring and maintenance plans for these BMPs.

Policy OS-10.3: Emphasize Site Design and Source Control BMPs. Long-term post-construction Best Management Practices (BMPs) that protect water quality and control runoff flow shall be incorporated in the project design of development that has the potential to adversely impact water quality in the following order of emphasis:

- A) Site Design BMPs: Any project design feature that reduces the creation or severity of potential pollutant sources, or reduces the alteration of the project site's natural flow regime. Examples include minimizing impervious surfaces, and minimizing grading.
- B) Source Control BMPs: Any schedules of activities, prohibitions of practices, maintenance procedures, managerial practices, or operational practices that aim to prevent stormwater pollution by reducing the potential for contamination at the source of pollution. Examples include covering outdoor storage areas, use of efficient irrigation, and minimizing the use of landscaping chemicals.
- C) Treatment Control BMPs: Any engineered system designed to remove pollutants by simple gravity settling of particulate pollutants, filtration, biological uptake, media adsorption, or any other physical, biological, or chemical process. Examples include vegetated swales, and storm drain inserts.

Site Design BMPs may reduce a development's need for Source and/or Treatment Control BMPs, and Source Control BMPs may reduce the need for Treatment Control BMPs. Therefore, all development that has the potential to adversely affect water quality shall incorporate effective post-construction Site Design and Source Control BMPs, where applicable and feasible, to minimize adverse impacts to water quality and coastal waters resulting from the development. Site Design and Source Control BMPs may include, but are not limited to, those outlined in the City's Storm Water Management program.

Policy OS-10.4: Incorporate Treatment Control BMPs if Necessary. If the combination of Site Design and Source Control BMPs is not sufficient to protect water quality and coastal waters consistent with Policy OS-9.3, as determined by the review authority, development shall also incorporate post-construction Treatment Control BMPs. Projects of Special Water Quality Concern (see Policy OS-12.1) are presumed to require Treatment Control BMPs to meet the requirements of OS-9.3. Treatment Control BMPs may include, but are not limited to, those outlined in the City's Storm Water Management program, including biofilters (e.g., vegetated swales or grass filter strips), bioretention, infiltration trenches or basins, retention ponds or constructed wetlands, detention basins, filtration systems, storm drain inserts, wet vaults, or hydrodynamic separator systems.

Policy OS-10.5: Guidance on BMP Selection and Design. Where BMPs, are required, BMPs shall be selected that have been shown to be effective in reducing the pollutants typically generated by the proposed land use. The strategy for selection of appropriate BMPs to protect

water quality and coastal waters shall be guided by Chapter 18.64.070, Tables 1-3, of the Land Use & Development Code, or equivalent tables which list pollutants of concern for each type of development or land use.

The design of BMPs shall be guided by the California Stormwater Quality Association (CASQA) Stormwater BMP Handbooks dated January 2003 (or the current edition), or an equivalent BMP manual that describes the type, location, size, implementation, and maintenance of BMPs suitable to address the pollutants generated by the development. Caltrans' 2007 "Storm Water Quality Handbook: Project Planning and Design Guide" (or the current edition) may also be used to guide design of construction-phase BMPs.

Policy OS-10.6: Water Quality Checklist. A water quality checklist shall be developed and used in the permit review process to evaluate a proposed development's potential impacts to water quality and coastal waters, and proposed mitigation measures.

Goal OS-11 Improve water quality through Site Design and Source Control BMPs

Development shall be sited and designed to protect water quality and minimize impacts to coastal waters by incorporating BMPs designed to ensure the following:

Policy OS-11.1: Use Integrated Management Practices in Site Design. The city shall require, where appropriate and feasible, the use of small-scale integrated management practices (e.g., Low Impact Development techniques) designed to maintain the site's natural hydrology by minimizing impervious surfaces and infiltrating stormwater close to its source (e.g., vegetated swales, permeable pavements, and infiltration of rooftop runoff).

Policy OS-11.2: Preserve Functions of Natural Drainage Systems. Development shall be sited and designed to preserve the infiltration, purification, detention, and retention functions of natural drainage systems that exist on the site, where appropriate and feasible. Drainage shall be conveyed from the developed area of the site in a non-erosive manner.

Policy OS-11.3: Minimize Impervious Surfaces. Development shall minimize the creation of impervious surfaces (including pavement, sidewalks, driveways, patios, parking areas, streets, and roof-tops), especially directly connected impervious areas, where feasible. Redevelopment shall reduce the impervious surface site coverage, where feasible. Directly connected impervious areas include areas covered by a building, impermeable pavement, and/or other impervious surfaces, which drain directly into the storm drain system without first flowing across permeable land areas (e.g., lawns).

Policy OS-11.4: Infiltrate Stormwater Runoff. Development shall maximize on-site infiltration of stormwater runoff, where appropriate and feasible, to preserve natural hydrologic conditions, recharge groundwater, attenuate runoff flow, and minimize transport of pollutants. Alternative management practices shall be substituted where the review authority has determined that infiltration BMPs may result in adverse impacts, including but not limited to where saturated soils may lead to geologic instability, where infiltration may contribute to flooding, or where regulations to protect groundwater may be violated.

Policy OS-11.5: Divert Stormwater Runoff into Permeable Areas. Development that creates new impervious surfaces shall divert stormwater runoff flowing from these surfaces into permeable areas, where appropriate and feasible, to enhance on-site stormwater infiltration capacity.

Policy OS-11.6: Use Permeable Pavement Materials. To enhance stormwater infiltration capacity, development shall use permeable pavement materials and techniques (e.g., paving blocks, porous asphalt, permeable concrete, and reinforced grass or gravel), where appropriate and feasible. Permeable pavements shall be designed so that stormwater infiltrates into the underlying soil, to enhance groundwater recharge and provide filtration of pollutants. All permeable pavement that is not effective in infiltrating as designed will be replaced with effective stormwater detention and infiltration methods.

Policy OS-11.7: Avoid Steep Slopes with Highly Erodible Soil. Where feasible, development shall be sited and designed to avoid areas on steep slopes (i.e., 12% or greater) with highly erodible soil. Developments on these hillside areas are considered Developments of Special Water Quality Concern, and are subject to additional requirements (see Policies OS-12.1 and OS-12.2).

Policy OS-11.8: Landscape with Native Plant Species. The City shall encourage development to use drought-resistant native plant species for landscaping, to reduce the need for irrigation and landscaping chemicals (e.g., pesticides and fertilizers).

Policy OS-11.9: Provide Storm Drain Inlet Markers. Markers or stenciling shall be required for all storm drain inlets constructed or modified by development, to discourage dumping and other illicit discharges into the storm drain system.

Policy OS-11.10: Continue Operation and Maintenance of Post-Construction BMPs. Permittees shall be required to continue the operation, inspection, and maintenance of all post-construction BMPs as necessary to ensure their effective operation for the life of the development.

Goal OS-12 Improve water quality through additional requirements for Developments of Special Water Quality Concern

Policy OS-12.1: Developments of Special Water Quality Concern. The categories of development listed below have the potential for greater adverse coastal water quality impacts, due to the development size, type of land use, impervious site coverage, or proximity to coastal waters. A development in one or more of the following categories shall be considered a "Development of Special Water Quality Concern," and shall be subject to additional requirements set forth in Policy OS-12.2 below to protect coastal water quality. Developments of Special Water Quality Concern include the following:

- a) Housing developments of ten or more dwelling units.
- b) Hillside developments on slopes greater than 12 percent, located in areas with highly erodible soil.
- c) Developments that result in the creation, addition, or replacement of 10,000 square feet or more of impervious surface area.
- d) Parking lots with 5,000 square feet or more of impervious surface area, potentially exposed to stormwater runoff.
- e) Heavy industrial developments.
- f) Vehicle service facilities (including retail gasoline outlets, service stations, commercial car washes, and vehicle repair facilities).
- g) Commercial or industrial outdoor storage areas of 5,000 square feet or more, or as determined by the review authority based on the use of the storage area, where used for storage of materials that may contribute pollutants to the storm drain system or waterbodies.

- h) All developments within 125 feet of the ocean or a coastal waterbody (including estuaries, wetlands, rivers, streams, and lakes), or that discharge directly to the ocean or a waterbody, if such development results in the creation, addition, or replacement of 2,500 square feet or more of impervious surface area.
 - a. "Discharge directly to" the ocean or a waterbody means outflow from a drainage conveyance system that is composed entirely of flows from the subject development or redevelopment site, and not commingled with flows from adjacent lands.
- i) Any other development determined by the review authority to be a Development of Special Water Quality Concern.

Policy OS-12.2: Additional Requirements for Developments of Special Water Quality Concern. All Developments of Special Water Quality Concern (as identified in Policy OS-12.1, above) shall be subject to the following four additional requirements to protect coastal water quality:

- 1) Water Quality Management Plan. The applicant for a Development of Special Water Quality Concern shall be required to submit for approval a Water Quality Management Plan (WQMP), prepared by a qualified licensed professional, which supplements the Runoff Mitigation Plan required for all development. The WQMP shall include hydrologic calculations per City standards that estimate increases in pollutant loads and runoff flows resulting from the proposed development, and specify the BMPs that will be implemented to minimize post-construction water quality impacts.
- 2) Selection of Structural Treatment Control BMPs. As set forth in Policy OS-10.4, if the review authority determines that the combination of Site Design and Source Control BMPs is not sufficient to protect water quality and coastal waters as required by Policy OS-9.3, structural Treatment Control BMPs shall also be required. The WQMP for a Development of Special Water Quality Concern shall describe the selection of Treatment Controls BMPs, and applicants shall first consider the BMP, or combination of BMPs, that is most effective at removing the pollutant(s) of concern, or provide a justification if that BMP is determined to be infeasible.
- 3) 85th Percentile Design Standard for Treatment Control BMPs. For post-construction treatment of runoff in Developments of Special Water Quality Concern, Treatment Control BMPs (or suites of BMPs) shall be sized and designed to treat, infiltrate, or filter the amount of stormwater runoff produced by all storms up to and including the 85th percentile, 24-hour storm event for volume-based BMPs, and/or the 85th percentile, 1-hour storm event (with an appropriate safety factor of 2 or greater) for flow-based BMPs.
- 4) Goal for Runoff Reduction. In Developments of Special Water Quality Concern, the post-development peak stormwater runoff discharge rate shall not exceed the estimated pre-development rate for developments where an increased discharge rate will result in increased potential for downstream erosion or other adverse habitat impacts.

Goal OS-13 Improve water quality through Municipal Activities to Protect Water Quality

Policy OS-13.1: Municipal Activities to Protect and Restore Water Quality. The City shall promote both the protection and restoration of water quality and coastal waters. Water quality degradation can result from a variety of factors, including but not limited to the introduction of

pollutants, increases in runoff volume and rate, generation of non-stormwater runoff, and alteration of physical, chemical, or biological features of the landscape.

Program OS-13.1.1: Water Quality Public Education and Outreach. The City shall continue to encourage public outreach and education about the water quality impacts of development. The City shall continue to coordinate with other agencies in the watershed area, as feasible, to develop public education programs on urban runoff issues and the appropriate roles of individuals, businesses, and government in the implementation of BMPs for pollution prevention.

Program OS-13.1.2: BMPS for Municipal Maintenance Activities. The City shall ensure that municipal maintenance activities and other public projects not requiring a Coastal Development Permit also integrate appropriate BMPs to protect water quality and coastal waters.

Goal OS-14 Improve water quality through Construction-Phase Pollution Control

Policy OS-14.1: Minimize Polluted Runoff and Pollution from Construction. All development shall minimize erosion, sedimentation, and the discharge of other polluted runoff (e.g., chemicals, vehicle fluids, concrete truck wash-out, and litter) from construction activities, to the extent feasible.

Policy OS-14.2: Minimize Land Disturbance During Construction. Land disturbance activities during construction (e.g., clearing, grading, and cut-and-fill) shall be minimized, to the extent feasible, to avoid increased erosion and sedimentation. Soil compaction due to construction activities shall be minimized, to the extent feasible, to retain the natural stormwater infiltration capacity of the soil.

Policy OS-14.3: Minimize Disturbance of Natural Vegetation. Construction shall minimize the disturbance of natural vegetation (including significant trees, native vegetation, and root structures), which are important for preventing erosion and sedimentation.

Policy OS-14.4: Stabilize Soil Promptly. Development shall implement soil stabilization BMPs (including, but not limited to, re-vegetation) on graded or disturbed areas as soon as feasible.

Policy OS-14.5: Grading During Rainy Season. Grading is prohibited during the rainy season (from November 1 to March 30), except in response to emergencies, unless the review authority determines that soil conditions at the project site are suitable, and adequate erosion and sedimentation control measures will be in place during all grading operations.

D. Open Space

There are three categories of open space in the Fort Bragg Planning Area: 1) publicly-owned land, such as Ocean Front Park, Pomo Bluffs Park, and MacKerricher State Park, 2) dedicated land, which is privately-owned and maintained and has a recorded open space or conservation easement, and 3) land which has a trail easement permitting public use.

Goal OS-15 Conserve and enhance a variety of open space features including creeks, wildlife habitats, scenic view corridors, and other amenities.

Policy OS-15.1: Open Space: Plan for and condition new development to implement the City's priorities for open space. Refer to the Community Design Element for specific policies and programs dealing with scenic view corridors.

Program OS-15.1.1: Use conservation easements wherever possible to protect environmentally sensitive open space areas.

Program OS-15.1.2: Continue to work with local and regional agencies and interest groups, in conjunction with the Mendocino Coast Recreation and Park District Master Plan, to develop an open space preservation strategy.

Program OS-15.1.3: Develop additional standards in the Coastal LUDC for further public access to open space areas.

Policy OS-15.2 Protect and Restore Open Space: During the development review process, protect and restore open space areas such as wildlife habitats, view corridors, coastal areas, and watercourses as open and natural.

Program OS-15.2.1: Require that projects on parcels 5 acres or larger, requesting a rezoning to a higher density, include dedications for open space or parkland as needed.

Program OS-15.2.2: Maintain an inventory of vacant parcels that could potentially be purchased and developed as public open space.

Policy OS-15.3 Trails in Open Space: Wherever feasible, plan and construct trails through the greenbelts and open space that connect to the City's trail system and that of Mendocino Coast Recreation Park District (MCRPD) as defined in its Master Plan.

E. Public Access and Recreation

Public access to the shoreline is guaranteed by the California Constitution and is further defined by standards established by the Coastal Act to recognize the shoreline as a public resource which is available for viewing, recreation, and scientific research at the water's edge and along tidal rivers.

As development in the Fort Bragg area and elsewhere increases, there will be an increased need for public access. Access to the coastline is dependent on the right of the public to cross public and private land. Access across private land generally is obtained through purchase of an easement, or obtained as a condition of development approval.

Goal OS-16 Maximize public access to and along the coast consistent with sound resources and conservation principles and constitutionally protected rights of private property owners.

Policy OS-16.1 Coastal Access: Maximum access and recreational opportunities shall be provided consistent with public safety needs and the need to protect public rights, rights of private property owners, and natural resource areas from overuse. Provide public open space

and shoreline access in the Coastal Zone. Acquisitions for coastal access shall not preclude the potential development of necessary infrastructure to support coastal-dependent uses.

Program OS-16.1.1: Provide shoreline access in the Coastal Zone along the vertical and lateral access routes as described in Table OS-2 and Map OS-3.

Program OS-16.1.2: Acquire additional public access to the shoreline by:

- a) accepting Offers To Dedicate (OTDs) that will increase opportunities for public access and recreation;
- b) actively seeking public agency, community non-profit, or other private offers of dedication and offers to assume the liability and maintenance responsibilities; and
- c) requiring public access as a condition of development consistent with the Coastal Act, the Coastal Commission's Statewide Interpretive Guidelines, and the findings required to support an Offer to Dedicate (OTD); and
- d) creating a partnership with the State Coastal Conservancy and other funding agencies to purchase and develop public access to and along the coast, with the City assuming responsibility for management and maintenance of the public open space.

Program OS-16.1.3: Work with the California Coastal Conservancy to assure that the proposed access improvements and public facilities identified in the Noyo Harbor Plan are provided on the banks of the Noyo River.

Program OS-16.1.4: Work with the appropriate State agencies to preserve and improve the existing coastal access north of Airport Road (i.e., Access "Q" on Map OS-3). Parking or recreational facilities shall not be required on the west side of Highway One in this area due to the fragile nature of the coastal terrace prairie habitat.

Program OS-16.1.5: Acquisitions of coastal land and easements for public access purposes shall not preclude the potential development of necessary infrastructure to support coastal-dependent uses.

Policy OS-16.2 Right of Public Access: Development in the Coastal Zone shall not interfere with the public's right of access to the sea where acquired through use or legislative authorization, including, but not limited to, the use of dry sand and rocky coastal beaches to the first line of terrestrial vegetation. Public prescriptive rights must be protected wherever they exist.

Policy OS-16.3: Unless a landowner chooses to adjudicate any existing prescriptive rights issue, where there is substantial evidence that prescriptive rights of access to the beach exist on a parcel, development on that parcel must be designed, or conditions must be imposed, to avoid interference with the prescriptive rights that may exist or to provide alternative, equivalent access.

Policy OS-16.4 New Development: Require public access from the nearest public roadway to the shoreline and along the coast in new development except where:

- a) it is inconsistent with public safety, military security needs, or the protection of fragile coastal resources;
- b) adequate access exists within 500 feet of the site; or

- c) access at the site would be inconsistent with other LCP policies, including but not limited to, expanded or new coastal-dependent industry or the protection of environmentally sensitive resources.

TABLE OS-1: COASTAL ZONE PUBLIC ACCESS

Map Key	Access Point/Area	Description of Proposed Access and Related Programs
A	Pudding Creek sand bar – Vertical Access	Existing access from Highway One to the sand bar located at the northern bank of Pudding Creek where it joins the ocean.
B	Old Haul Road	Existing lateral access from the Pudding Creek Trestle to northern City Limits.
C	Bluff Access on the South Bluff of the Mouth of Pudding Creek	Lateral access shall be provided on the south bluff of the mouth of Pudding Creek. Bluff top access as indicated in Map OS-3 shall be required as a condition of permit approval from Glass Beach Drive westerly to the point above the mouth of the river, and then southwesterly to Glass Beach. Other General Plan policies regarding protection of environmentally sensitive areas shall apply to the development of bluff access in this area.
D	Glass Beach - Vertical Access	Vertical access from west end of Elm Street to Glass Beach shall be required as a condition of permit approval. Funding shall be sought by a public agency or private association for additional parking at the end of Elm Street and for directional signs at the site and on Main Street. Directional signs that may tend to increase utilization at the site shall be provided only after additional parking is provided.
E	Glass Beach	Beach and bluff lateral access to the area shall be required as a condition of permit approval on this site.
F	Glass Beach South	Public access south of Glass Beach shall be permitted in a manner that does not adversely impact environmentally sensitive areas.
G	South Side of Noyo Bridge – Vertical Access	Vertical access shall be required as mapped as a condition of permit approval. Minor signing and path improvements shall be accomplished by a public agency or private association.
H	South Side of Noyo Bridge - Lateral Access	Lateral access along the south bank of the Noyo River within the City Limits shall be acquired. This access shall be connected to the trail system leading from the southern bluff of the Noyo Headlands to South Harbor Drive as indicated in Map OS-3.
I	North Harbor Drive – Vertical Access	A vertical access from the bottom of North Harbor Drive to the proposed lateral access along the north bank of the Noyo River shall be required as a condition of permit approval.

Note: The Map Key refers to the letter code indicating the general location of the public access on Map OS-3: Coastal Land Use and Environment.

Map Key	Access Point/Area	Description of Proposed Access and Related Programs
J	North Bank of the Noyo – Lateral Access	Require public access along the entire length of the City's frontage on the north bank of the Noyo River as a condition of permit approval, except where physical conditions make access infeasible due to topography and/or safety considerations.
K	South Street – Vertical Access	Require a vertical access from the end of South Street to the north bank of the Noyo River as a condition of permit approval. This access may be in conjunction with any street required for access to development. Public parking may be provided by a public agency or private association.
L	Pomo Bluffs Overlook	Develop signage and trails to accommodate public use of the Noyo Bluffs Overlook park for passive recreation.
M	North Shore of Noyo Bay	Rights for access and recreation shall be required as a condition of approval or through acquisition by a public or private organization for the north shore of the Noyo Bay, west of the Bridge, labeled "Open Space" as indicated on Map OS-3.
N	Cypress Street - Vertical Access	Require a vertical access from the end of Cypress Street to the north bank of the Noyo River as a condition of permit approval. This access may be in conjunction with any street required for access to development. If the area is developed, then public parking may be provided by a public agency or private association.
O	Highway One and MacKerricher State Park – Vertical Access	A vertical access between Highway One and MacKerricher State Park.
P	Todd Point	Recognize that prescriptive rights may exist on the portion of Todd Point labeled "PD" on Map OS-3. Require public access as a condition of permit approval in this area. Soil and vegetation restoration work shall be part of any acquisition and a paved parking area shall be developed.
Q	Airport Road/Highway One	Acquire and improve the current unimproved dirt trail to the coast. Major parking facilities and restrooms are not recommended due to the fragile nature of the coastal bluffs.
R	Central Business District to Glass Beach Parking area	Proposed vertical access to start at Pine Street, along railroad right-of-way to Glass Beach
S	Pine Street to Bluff edge	Proposed vertical access from Pine Street to Glass Beach

Note: The Map Key refers to the letter code indicating the general location of the public access on Map OS-3: Coastal Land Use and Environment.

Policy OS-16.6: Easement Requirements. In order to avoid or offset a project's significant adverse impacts on public access, and consistent with the provisions of Section 18.56.070, the City shall require a 25-foot-wide easement along all trails designated on Map OS-3 "Coastal Zone, Coastal Access, and City Trail System," as a condition of approval to mitigate impacts of development that requires a coastal development permit where such impacts cannot be avoided. For any project where such mitigation is required, the preferred implementation should be through a recorded grant of easement to the City or to a designated private nonprofit association acceptable to the City who is willing to accept the easement and willing to operate and maintain the public accessway or trail. Where grants of easement are not feasible because neither the City nor private nonprofit association is willing to accept, maintain and operate the accessway, implementation of required access mitigation shall be implemented through a recorded Offer to Dedicate (OTD) an easement to a public agency or a designated private nonprofit association acceptable to the City. Offers of dedication shall last for a period of 21 years from the date of recordation of the offer.

Policy OS-16.7: Mitigation measures required for impacts to public access and recreational opportunities shall be implemented prior to or concurrent with construction of the approved development. Mitigation shall not substitute for implementation of a feasible project alternative that would avoid impacts to public access.

Policy OS-16.8: Public Access as a Permitted Use. Public accessways and trails to the shoreline and public parklands shall be a permitted use in all land use and zoning designations. Where there is an existing, but unaccepted and/or unopened public access Offer to Dedicate (OTD), easement, or deed restriction for lateral, vertical or trail access or related support facilities (e.g. parking), construction of necessary access improvements shall be permitted to be constructed, opened and operated for its intended public use.

Policy OS-16.9: Review new development to prevent siting of structures that encroach on coastal access routes where prescriptive easements may exist so as to provide the opportunity to acquire the access through a conservation easement, adjudication, or other means, as appropriate.

Policy OS-16.10: Require, as a condition of development for projects which create significant adverse impacts on public access and where discretionary approval by the City is required, lateral access along the bluffs of the Georgia-Pacific property and adjacent properties, north of the Noyo Harbor area to Pudding Creek as indicated in Map OS-3.

Program OS-16.10.1: Consider the establishment of an ocean front park connecting to bicycle trails and rest areas from Hare Creek to MacKerricher State Park.

Policy OS-16.11 Use of Public Accesses: Dedicated accesses shall not be required to be opened for public use until a public agency or private association agrees to accept responsibility for maintenance and liability of the access.

Policy OS-16.12: Open the Easement. For all grants of easement to the City, the City shall open the easement to the public as soon as is feasible, and shall be responsible for operating and maintaining the accessway, or the City shall grant the easement to a private nonprofit association that is willing to accept, maintain and operate the accessway.

Policy OS-16.12: Easements to Non Profits. For all grants of easement from the City to a private non-profit association, the Executive Director of the Commission must review and approve a management plan submitted by the private non-profit association that indicates that the association will open, operate, and maintain the easement in accordance with terms of the recorded grant of easement, and that the association will open the easement to the public as soon as is feasible.

Program OS-16.12.1: Work with the Coastal Conservancy and other organizations to accept liability for and maintain public accesses.

Program OS-16.12.2: Facilitate the acceptance of Offers to Dedicate (OTDs) as a means of obtaining additional public access.

Policy OS-16.13: Offers to Dedicate. Any government agency may accept an offer to dedicate an easement if the agency is willing to operate and maintain the easement. For all offers to dedicate an easement that are required as conditions of Coastal Development Permits approved by the City, the Executive Director of the Commission must approve any private non-profit association that seeks to accept the offer. In order for the Executive Director of the Commission to approve any private association, the non-profit association must submit a management plan that indicates that the association will open, operate, and maintain the easement in accordance with terms of the recorded offer to dedicate the easement.

Policy OS-16.14: Acquire OTDs for access easements for all areas designated on Map OS-3 in conjunction with new development which will adversely impact public access; unless other sites exist within 500 feet which provide sufficient access, parking, and other related facilities.

Policy OS-16.15: In coordination with the Executive Director of the Coastal Commission, the City shall establish a procedure for acceptance of OTDs and management of public accesses prior to their expiration.

Policy OS-16.16 Priority to Beach Rather than Bluff Access North of Glass Beach: Where public access to both beach and blufftop areas is feasible, give a higher priority to public use of the beaches rather than to the bluffs in the design and development of accesses and the location and placement of directional signs. This policy applies to bluffs north of Glass Beach to the mouth of Pudding Creek and then easterly to the Pudding Creek Trestle.

Policy OS-16.17 Coastal Trails: Develop a continuous trail system throughout the City which connects to the California Coastal Trail system.

Program OS-16.17.1: Ensure that City trails connect with the California Coastal Trails system, as shown on Map OS-3. Acquire rights-of-way through Offers to Dedicate; easements; land transfers; and land acquisition, as appropriate.

Program OS-16.17.2. California Coastal Trail (CCT)

1. The City shall strive to complete the links in the California Coastal Trail (CCT) by participating and consulting with the National Park Service, the State Department of Parks & Recreation, the State Coastal Conservancy, Mendocino County, and other appropriate public and private entities and interested parties in designing, locating, funding, acquiring, and implementing the Fort Bragg California Coastal Trail (CCT)

segment, including opening trails for vertical access designated on Map OS-3, "Coastal Zone, Coastal Access, and City Trail System."

- a) The CCT shall be identified and defined as a continuous trail system traversing the length of the state's coastline and designed and sited as a continuous lateral trail traversing the length of the City's Coastal Zone and connecting with contiguous trail links in adjacent Coastal jurisdictions (Mendocino County).
- b) The CCT shall be designed and implemented to achieve the following objectives:
 - Provide a continuous walking and hiking trail as close to the ocean as possible;
 - Provide maximum access for a variety of non-motorized uses by utilizing alternative trail segments where feasible;
 - Maximize connections to existing and proposed local trail systems;
 - Ensure that all segments of the trail have vertical access connections at reasonable intervals;
 - Maximize ocean views and scenic coastal vistas;
 - Provide an educational experience where feasible through interpretive facilities.
- c) Ensure that shoreline and blufftop trail segments that may not be passable at all times provide inland alternative routes.

2. CCT Siting and Design Standards:

- a) The trail should be sited and designed to be located along or as close to the shoreline where physically and aesthetically feasible. Where it is not feasible to locate the trail along the shoreline due to natural landforms or legally authorized development that prevents passage at all times, inland bypass trail segments located as close to the shoreline as possible should be utilized. Shoreline and blufftop trail segments that may not be passable at all times shall provide inland alternative routes.
- b) Where gaps are identified in the trail, interim segments should be identified to ensure a continuous coastal trail. Interim segments should be noted as such, with provisions that as opportunities arise, the trail shall be realigned for ideal siting. Interim trail segments should meet as many of the CCT objectives and standards as possible.
- c) The CCT should be designed and located to minimize impacts to environmentally sensitive habitat areas to the maximum extent feasible. Where appropriate, trail access should be limited to pass and repass. Where necessary to prevent disturbance of nesting birds, sections of the trail may be closed on a seasonal basis. Alternative trail segments shall be provided where feasible.
- d) The CCT should be located to incorporate existing oceanfront trails and paths and support facilities of public shoreline parks and beaches to the maximum extent feasible.
- e) To provide a continuously identifiable trail along the base and shoreline of Mendocino County, the trail should be integrated with the CCT in Mendocino County which borders the City.
- f) The CCT should be designed to avoid being located on roads with motorized vehicle traffic where feasible. In locations where it is not possible to avoid siting the trail along a roadway, the trail should be located off of the pavement and within the public right-of-way, and separated from traffic by a safe

Source: City of Fort Bragg
July, 2008

Scale 1" = 2300' (approximate)
For Schematic purposes only

Map OS-4 identifies the general area where new parks should be located. The actual park site acquired and developed would be in the approximate vicinity of the areas identified on Map OS-4.

distance. In locations where the trail must cross a roadway, appropriate directional and traffic warning signing should be provided.

3. CCT Acquisition and Management:

- a) Trail easements should be obtained by encouraging private donation of land, by public purchase, or by dedication of trail easements. Trail easement dedications shall be required as a condition of approval of a Coastal Development Permit for development on property located on the CCT route or on designated vertical accessways to the route, when the dedication will mitigate adverse impacts on public access and/or recreation by the project.
- b) The CCT plan should identify the appropriate management agency(s) to take responsibility for trail maintenance.

4. CCT Signage Program Standards:

- a) The trail should provide adequate signage at all access points, trailheads, parking lots, road crossings, and linkages or intersections with other trails or roads which incorporate the CCT logo (to be designed).
- b) The trail should provide adequate safety signage, including but not limited to, road crossing signs and yield/warning signs on multi-use trail segments. Where appropriate signs should be developed in coordination with Caltrans and/or City and County Public Works Departments and any other applicable public agencies.
- c) Signs shall be posted in Spanish and in English.

5. CCT Support Facilities:

- a) To maximize access to the CCT, adequate parking and trailhead facilities should be provided.

6. CCT Mapping:

- a) The final CCT map shall identify all planned or secured segments, including existing segments, all access linkages and planned staging areas, public and private lands, existing easements, deed restricted sections and sections subject to an Offer-to-Dedicate (OTD). The map shall be updated on a regular basis.
- b) The CCT shall be identified on all applicable City Trail Maps contained in the LCP Access Component.

7. Inclusion of CCT in LCP:

- a) The LCP shall be amended to incorporate all plans and designs for locating and implementing the CCT within the City including the final mapped alignment.

Policy OS-16.18 General Standards: Require that all public access easements offered for dedication to public use be a minimum of 25 feet wide. The area where public access is allowed within the easement may be reduced to the minimum necessary to avoid:

- a) adverse impacts on sensitive environmental areas;
- b) encroachment closer than 20 feet from an existing residence; and/or
- c) hazardous topographic conditions.

Policy OS-16.19 Standards for Lateral Shoreline Access Easements: Lateral shoreline access easements shall extend landward 25 feet from mean high tide to the toe of the bluff or the first line of terrestrial vegetation if the width of the beach is greater than 25 feet. Lateral blufftop easements shall be at least 25 feet in width. The area where public access is allowed within the easement may be reduced consistent with Policy OS-16.18 above. The average annual bluff retreat (erosion) shall be taken into account when planning lateral accesses. Shoreline and blufftop trail segments that may not be passable at all times shall provide inland alternative routes.

Policy OS-16.20 Visitor Accommodations and Services: In order to avoid or offset a project's significant adverse impacts on public access and consistent with the provisions of Section 18.56.070, require public access to the blufftop and/or shoreline for visitor serving uses, as a condition of permit approval, or by other methods such as OTDs, specified by the City. Access shall be available to the public at large as well as to guests.

Policy OS-16.21 Safety and Environmental Protection: Permanent closure of any existing public accessway shall require an amendment to the Local Coastal Program.

Policy OS-16.22: Unless immediate action by a person or a public agency performing a public service is required to protect life and property from imminent danger, the City shall not close, abandon, or render unusable by the public any existing accessway which the City owns, operates, maintains, or is otherwise responsible for, without first obtaining a Coastal Development Permit. Any accessway which the City or any other managing agency or organization determines cannot be maintained or operated in a condition suitable for public use shall be offered to another public agency or qualified private association that agrees to open and maintain the accessway for public use.

Program OS-16.22.1: Request the California Department of Fish and Game monitor public accesses adjoining or near sensitive environmental resources such as wetlands, dunes, tide pools, and other sensitive wildlife habitats to determine whether they are being adversely impacted or degraded. Request that regulations governing use of accesses be implemented and posted as needed. Limit public use, as needed, to allow resource recovery and restoration.

F. Parks and Recreation

Goal OS-17 Provide an attractive system of parks and recreation facilities throughout the City to meet the needs of all age groups and capabilities.

Policy OS-17.1 Parkland Standard: Use the standard of three acres of parkland per 1,000 residents for the acquisition of additional parkland pursuant to the provisions of the Quimby Act (Government Code Section 66477).

Program OS-17.1.1: Establish a parkland dedication ordinance that provides standards and a process for dedication of parkland and/or payment of in-lieu fees.

Program OS-17.1.2: Establish a Park and Open Space Trust Fund as required by the Quimby Act and Government Code Sections 66000-66011.

Policy OS-17.2 Neighborhood Parks: Acquire and develop new neighborhood parks, in concert with other local recreation agencies, to meet the needs of the existing population and consistent with growth of the City's population.

Program OS-17.2.1: Acquire and develop additional neighborhood parks as shown on Map OS-4.

Policy OS-17.3 Recreational Facilities: Provide recreational facilities to meet the needs of all Fort Bragg citizens, especially children and teenagers.

Program OS-17.3.1: Consider teen recreation needs when planning new or redesigned parks.

Program OS-17.3.2: Consider building a skateboard facility in an existing or newly developed park as deemed feasible.

Program OS-17.3.3: Work with other agencies to develop an inventory of recreational facilities and programs available to young people. Seek to implement joint programs and identify additional facilities that are necessary to meet the recreational needs of youth.

Policy OS-17.4 Playground Facilities: Add or upgrade playground facilities at existing neighborhood parks.

Program OS-17.4.2: Provide additional playground facilities and basketball courts at appropriate locations within neighborhoods.

Policy OS-17.5 Ballfields: Develop additional baseball, softball, and other ballfields.

Program OS-17.5.1: Work with the School District and other agencies to develop additional sports field facilities.

Policy OS-17.6 Prioritize Park Acquisitions: Use the following criteria to prioritize acquisition of parkland and open space:

- a) distribution of neighborhood parks/playground facilities and ballfields on a neighborhood basis;
- b) scenic beauty;
- c) relationship to the existing and proposed trail systems and parks; and
- d) natural resource protection.
- e) appropriateness (physical characteristics) of the site to meet specific recreational needs.

Program OS-17.6.1: Consider the acquisition of strategically located vacant lots for the development of neighborhood parks using the criteria listed in Policy OS-17.6.

Program OS-17.6.2: Adopt a management plan that analyzes geoseismic and other related potential hazards before City acceptance of dedications of land for park or open space. Identified hazards shall be fully repaired and/or financial protection provided to the City for liability before acceptance of land. The management plan shall also specify funding for ongoing maintenance.

Policy OS-17.7 Financing Parks: Consider methods of increasing revenues for the acquisition and development of parkland and open space areas and supporting recreational facilities.

Program OS-17.7.1: Consider the following potential funding sources for the acquisition of park and trails and development of recreation facilities:

- a) Establish a Park Improvement Fee pursuant to Government Code Section 66000;
- b) Place an advisory measure on the ballot for a tax proposal or assessment; and/or
- c) Pursue available grants.

Program OS-17.7.2: Include in the Capital Improvement Program the schedule and costs of expanding and improving the City's parks and recreation facilities as deemed appropriate by the City Council.

Goal OS-18 Develop park and recreation facilities with the coordination of other agencies and the public.

Policy OS-18.1 Coordinate with Other Agencies: Coordinate with other governmental entities to procure and develop additional park and recreational facilities.

Program OS-18.1.1: Consider establishing joint powers agreements with the Mendocino Coast Recreation and Parks District (MCRPD), Fort Bragg Unified School District (FBUSD), and Mendocino County to coordinate planning and development of recreation facilities.

Program OS-18.1.2: Continue to coordinate with State Department of Parks and Recreation regarding development adjacent to MacKerricher State Park.

Program OS-18.1.3: In reviewing development applications adjacent to MacKerricher State Park, the City shall confer with the State Department of Parks and Recreation to determine if additional mitigation measures regarding access to the park, or protection of park resources, are warranted. If feasible, these additional measures will be required.

Program OS-18.1.4: Support public acquisition of land along the eastern boundary of MacKerricher State Park as indicated in Map OS-3: Coastal Zone, Coastal Access, and City Trail System which would be donated to the State Parks.

Policy OS-18.2 City/School/Recreation District Cooperation: Continue to encourage City/School/Recreation District cooperation in developing and maintaining park and recreation facilities.

Program OS-18.2.1: Develop joint use agreements with the School District.

Program OS-18.2.2: Continue to cooperate with the FBUSD, MCRPD, and Timberwolf Stadium to develop playfield improvements and maintenance programs.

Policy OS-18.3 Public Participation: Actively solicit public participation in the selection, design, and facilities planning for existing and future park sites.

Program OS-18.3.1: Utilize local volunteer efforts and fund-raising to cover the "match" costs needed to secure rehabilitation or purchase grants for public parks.

Goal OS-19 Provide a comprehensive trail system in Fort Bragg.

Policy OS-19.1 Multiple Use Trail System: Develop a multiple use trail system.

Program OS-19.1.1: Identify potential additions to the trail system which increase access to rivers and the coastline with cross linkages through to the eastern parts of Fort Bragg. Work with the MCRPD to seek funding and to acquire rights-of-way.

Program OS-19.1.2: Establish an integrated trail system serving both inland hiking and trail needs as well as the coastal trail programs as shown on Map OS-3 utilizing existing rights-of-way, City streets, and river front property.

Policy OS-19.2: Review development applications and require a trail easement dedication for locations where trails are shown on Map OS-3 where an appropriate nexus is established consistent with the provisions of Chapter 18.56 (Public Access) of the Coastal Land Use & Development Code.

Policy OS-19.3: Require new development to provide direct pedestrian connections, such as sidewalks, trails, and other rights-of-way to the existing and planned network of parks and trails wherever feasible.

Program OS-19.3.1: Consider the access needs of a variety of users, including school-age children, the elderly, and those with handicaps or disabilities when developing trails and recreation facilities.

Program OS-19.3.2: Support efforts to extend the existing trail from the end of Cypress Street east adjacent to the Georgia-Pacific haul road.

5. CIRCULATION ELEMENT

A. Purpose

Government Code Section 65302[b] requires that every General Plan include a Circulation Element which consists of "the general location and extent of existing and proposed major thoroughfares, transportation routes, terminals, and other local public utilities and facilities, all correlated with the Land Use Element of the Plan."

The Circulation Element discusses transportation issues for the Fort Bragg Planning Area; it briefly describes the existing circulation system and travel characteristics and projects future traffic based on the land uses and growth projections described in the Land Use Element. Policies and programs contained in this element provide a guide for decisions regarding transportation system improvements to accommodate Fort Bragg's anticipated growth. Detailed description and analysis of Fort Bragg's transportation system are contained in the Draft EIR.

The main objectives of the Circulation Element are to:

- Ensure that Fort Bragg's circulation network is sufficient to accommodate anticipated development;
- Minimize the intrusion of through-traffic onto local streets;
- Encourage public transportation, bicycle, and pedestrian movement, and other alternatives to the single-occupant vehicle; and
- Provide improvements to the transportation system which complement and support the other goals of this Coastal General Plan.

B. Existing Conditions

1. Roadway Classifications

The street system in Fort Bragg is laid out in a grid pattern with Main Street (Highway One) functioning as the primary north-south roadway. Franklin Street is located one block east of Main Street and provides access along the main commercial corridor. A number of streets, including Cypress Street, Chestnut Street, Oak Street, Redwood Avenue, Pine Street, and Elm Street provide east-west connections. Streets in Fort Bragg are classified according to their function as defined and shown in Table C-1 and Map C-1: Existing Roadway System.

The Roadway Classification System

Highway:	A high-speed, limited access roadway serving primarily regional and county-wide travel. California State Department of Transportation (Caltrans) controls the design, operation, and maintenance of highways. Fort Bragg does not have any limited access roadways.
Arterial:	A medium-speed, medium capacity roadway that provides travel and access within the City and access to highways. Main Street (Highway One) and Highway 20 are considered arterial roadways.
Major Collector:	A relatively low-speed, street that provides access within and between neighborhoods. Major Collectors usually serve short trips and are intended for collecting trips from local streets and distributing them to Arterial streets.
Minor Collector:	A relatively low-speed street that provides a connection between Arterials and Major Collectors and direct access to parcels. They handle a lower volume of traffic than Major Collectors.
Local Street:	A low-speed, low-volume street that provides access to adjacent land. Local streets are designed for trips within neighborhoods and to Collector and Arterial streets, and not to serve through-traffic.

**Table C-1
Fort Bragg Roadway Classification**

Roadway Classification	Location
Arterials	
Main Street	Full Length
Highway 20	Full Length
Major Collectors	
Chestnut Street	Main Street to Franklin Street
Franklin Street	Full Length
Redwood Avenue	Main Street to Harold Street
Oak Street	Alley West of Main Street to Harold Street
Minor Collectors	
Chestnut Street	Franklin Street to Dana Street
Maple Street	Main Street to Lincoln Street
Alder Street	Main Street to Harold Street
Laurel Street	Block West of Main Street to Harold Street
Pine Street	Stewart Street to Harold Street
Fir Street	Stewart Street to Harold Street
Elm Street	Glass Beach Drive to Franklin Street
McPherson Street	Chestnut Street to Bush Street
Harrison Street	Walnut Street to Bush Street
Harold Street	Maple Street to Fir Street
Lincoln Street	Chestnut Street to Willow Street
Sanderson Way	Chestnut Street to Oak Street
Dana Street	Chestnut Street to Oak Street
Cypress Street	Full Length
South Harbor Drive	Full Length
South Street	Main Street to River Drive
Local Streets	
All remaining streets will be considered local streets.	

Map C-1 EXISTING ROADWAY SYSTEM

2. Level of Service Standards

Level of Service (LOS) standards provide a qualitative indicator based on a quantitative analysis of the functional capacity of a roadway or intersection. LOS standards describe the relative ease or congestion of traffic movement on a roadway or at an intersection. LOS "A" represents free flow conditions and LOS "F" represents jammed conditions where traffic flow is at or over the capacity of the roadway and consequently moves very slowly. Table C-2 below explains in more detail the LOS concept. LOS is normally used to describe peak-hour conditions.

Table C-2
Level of Service Definitions

Level of Service	Description	V/C Ratio*
Free Flowing LOS A	Relatively free-flow. No restrictions to vehicle maneuverability or speed. Very slight delay.	0.00-0.60
Minimal Delays LOS B	Stable Flow. Some slight reduction in maneuverability and speed. Vehicle platoons form. This is a suitable level of operation for rural design. Slight delay	0.61-0.70
Acceptable Delays LOS C	Stable flow operation. Higher volumes. More restrictions on maneuverability and speed. Acceptable delay.	0.71-0.80
Tolerable Delays LOS D	Approaching unstable flow operation. Queues develop. Little freedom to maneuver. Tolerable delays for short periods.	0.81-0.90
Significant Delays LOS E	Unstable flow or operation. Low operating speed; momentary stoppages. This condition is not uncommon in peak hours. Congestion and intolerable delays.	0.91-1.00
Excessive Delays LOS F	Forced flow or operation. There are many stoppages. The highway acts as a vehicle storage area. Jammed. Gridlock.	1.00+

Source: Highway Capacity Manual, HRB Special Report 87.

C. Existing and Projected Traffic Patterns

Fort Bragg is built along Highway One which is also called Main Street within the City. Highway One is the only continuous north-south road serving the north coast of Mendocino County, providing a local transportation corridor for many communities and the primary access route for visitors. Traffic volumes on this roadway have increased steadily over the years.

Traffic into and out of Fort Bragg is constrained by the capacity of two bridges: Hare Creek and Pudding Creek, and by the two-lane (i.e., one through lane in each direction) roadway sections along Highway One. The Hare Creek and Pudding Creek bridges are limited to one lane of traffic in each direction.

The most congested street in the City is Main Street between the northbound merge area located just south of Laurel Street through Elm Street. The northbound section of this road currently operates at LOS D to LOS E during peak hours.

Caltrans recently replaced the Noyo River Bridge with a four lane bridge, a center lane for emergency vehicles, and a sidewalk on both sides. The new bridge provides improved access at the south end of the City and to Highway 20 and operates at LOS A.

Although the volume of traffic on Main Street has increased over the past few years, intersections with traffic signals – Highway 20, Ocean View Drive, Cypress Street, Chestnut Street, Oak Street, Elm Street, and Redwood Avenue - are operating at LOS B or better. The side street stop sign controlled intersections with Main Street are also operating at LOS B or better for traffic traveling on Main Street, although traffic turning onto Main Street from some side streets can experience LOS D, E, or F during peak hours.

D. Projected Traffic Volumes

Land use and transportation must be coordinated so that the capacity of the transportation system will accommodate the traffic generated by the development of the community. To understand the relationship between land use and transportation, the new traffic that would be generated by the 10-year buildout projections listed in Table LU-1 and Table LU-2 of the Land Use Element was added to existing traffic volumes on major streets. See the Draft EIR for the General Plan for a full description of the trip generation and trip assignment methods that were used.

The traffic projections take into account the type and intensity of existing and future development, areas of vacant developable land, and the policies established by the Coastal General Plan. The traffic projections estimate how much traffic will be generated by new development, what traffic problems will occur, and what roadway improvements would relieve traffic congestion. This projected traffic increase would be generated by development within the City and its Sphere of Influence, new development in the County, and tourist traffic which will continue to increase in Fort Bragg and the coastal areas of Mendocino County.

The traffic projections include the existing roadway network as shown in Map C-1.

Tables C-3 and C-4 summarize the Levels of Service for roadway segments and intersections for a summer Friday mid-day peak hour when traffic is generally the most congested. These tables show the projected LOS with and without the roadway improvements recommended in this element.

E. Roadway Deficiencies

Traffic projections in Tables C-3 and C-4 indicate that, without intersection signalization and roadway widening, Levels of Service will decline at several intersections and roadway segments below the standards established by the General Plan. The recommended transportation improvements recognize that it may not be feasible to accommodate all of the projected traffic at established LOS standards. This would require extensive street widening on Main Street between the northbound merge area (south of Laurel Street) and Elm Street where there is limited right-of-way. Roadway widening in this area could have adverse impacts on businesses fronting Main Street due to the loss of on-street parking.

F. Alternatives to the Automobile

Effective alternatives to automobile use are needed. These include:

- Better public transit;
- Expansion of bicycle routes;
- Provision of safe sidewalks throughout the City; and
- Land use designations which reduce the need to drive from home to work, schools, and/or commercial outlets.

By improving alternative modes of transit, the City best serves those individuals who lack access to a vehicle and those who would prefer to use alternate modes of transport to conserve energy, reduce air and noise pollution, and/or reduce the costs of constructing and maintaining roads and parking facilities.

Table C-3

**INTERSECTION LEVEL OF SERVICE
(FRIDAY PM PEAK HOUR IN AUGUST)**

Intersection	Existing (August 2001)	Year 2006	Year 2011
Highway One/Hwy. 20 (Signal)	B-17.3 ⁽¹⁾	B-18.9	C-21.0

G. Goals, Policies and Programs

The following policies demarcated with the Fort Bragg City seal:  are not part of the certified LCP and do not govern the review and approval of coastal development permits: Policy C-2.11, Policy C-9.4, Policy C-9.7, Policy C-12.1, Policy C-12.1, Policy C-12.3, Policy C-13.1, and Policy C-15.1.

1. Transportation Planning

Goal C-1 Coordinate land use and transportation planning.

Policy C-1.1 Level of Service Standards: Establish the following Level of Service (LOS) standards:

Signalized and All-Way-Stop Intersections Along Highway One	LOS D
Side Street Stop Sign Controlled Intersections Along Highway One (Side Street Approach)	LOS D, or LOS F if there are less than 15 vehicles/hour left turns plus through movements from the side street and the volumes do not exceed Caltrans rural peak hour signal warrant criteria levels.
Signalized and All-Way Stop Intersections Not Along Highway One	LOS C
Side Street Stop Sign Controlled Intersections Not Along Highway One (Side Street Approach)	LOS C, or LOS E if there are less than 15 vehicles/hour left turns plus through movements from the side street and the volumes do not exceed Caltrans rural peak hour signal warrant criteria levels.

- If volumes at an unsignalized intersection are increased to meet or exceed Caltrans rural peak hour signal Warrant #11 criteria levels and the intersection is operating at an unacceptable level of service, then signalization of the intersection is warranted.
- LOS E for Main Street (Highway One) between the northbound lane merge area and Manzanita Street.
- LOS D for Main Street south of the northbound merge lane and north of Manzanita Street and other City-designated arterials and collectors.
- LOS C on all City-designated local streets.
- The maximum allowable LOS standards for Main Street apply to the p.m. peak hour weekdays during the summer and to the p.m. peak hour on weekdays and weekends during the remainder of the year. They do not apply to p.m. peak hours on weekends and holidays during the summer. During the p.m. peak hours on summer weekends and holidays, Main Street can operate at LOS F.

Policy C-1.2 Coordinate Land Use and Transportation: Ensure that the amount and phasing of development can be adequately served by transportation facilities.

Program C-1.2.1: Review development proposals for their direct and cumulative effects on roadway Level of Service standards. During the development review process, City staff will determine whether traffic studies need to be carried out and the scope of such studies.

Policy C-1.3: Do not permit new development that would result in the exceedance of roadway and intersection Levels of Service standards unless one of the following conditions is met:

- a) Revisions are incorporated in the proposed development project which prevent the Level of Service from deteriorating below the adopted Level of Service standards; or
- b) Funding of prorata share of the cost of circulation improvements and/or the construction of roadway improvements needed to maintain the established Level of Service is included as a condition or development standard of project approval.

Policy C-1.4: Include specific time frames for the funding and completion of roadway improvements for projects which cause adopted roadway and intersection Level of Service standards to be exceeded. Require security, bonding or other means acceptable to the City to ensure the timely implementation of roadway mitigations.

Policy C-1.5: Traffic Impact Fees. When traffic impact fees are collected, establish a schedule from the date of collection of said fee for the expenditure of funds to construct roadway improvements that meets project needs. Where a project would cause a roadway or intersection to operate below the adopted traffic Level of Service standards, the roadway or intersection improvements should be completed in a timely manner but no later than five years after project completion.

2. Recommended Roadway Improvements

Goal C-2 Develop and manage a roadway system that accommodates future growth and maintains acceptable Levels of Service while considering the other policies and programs of the Coastal General Plan.

Policy C-2.1 Roadway Improvements: In coordination with Caltrans and Mendocino County, plan for and seek funding for on-going improvements to the local and regional road system to ensure that the roadway system operates safely and efficiently and to ensure that Highway 1 in rural areas outside the Mendocino County urban/rural boundary will remain a scenic two-lane road consistent with Section 30254 of the Coastal Act. Project applicants are fiscally responsible for their fair share of roadway improvements necessary to serve their projects.

Policy C-2.2: Improvements to major road intersections for public safety or increased vehicle capacity shall be permitted, as necessary, in existing developed areas and where such improvements are sited and designed to be consistent with all policies of the LCP.

Policy C-2.3: Design Roadways to Protect Scenic Views. In scenic areas, roadway improvements, including culverts, bridges or overpasses, shall be designed and constructed to

protect public views and avoid or minimize visual impacts and to blend in with the natural setting to the maximum extent feasible.

Program C-2.3.1: When a traffic analysis of levels of service and/or safety hazards indicates the need, construct the following roadway improvements where such roadway improvements are found to be consistent with all applicable policies of the LCP including, but not limited to, the wetland, environmentally sensitive habitat area, public access, and visual protection policies:

- a) Signalize the Main Street/Pudding Creek Road intersection;
- b) Signalize the Franklin Street/Oak Street intersection;
- c) Widen the section of Main Street from the Pudding Creek Bridge to the northern City Limits to three lanes, adding a center turn lane;
- d) Reconstruct the Main Street/Ocean View Drive intersection at time of development of the property between the College of the Redwoods and Main Street. Require a traffic engineering analysis of the intersection to determine appropriate geometrics and signal timing. Construct turning lane mitigations as needed.
- e) Signalize the Main Street/Laurel Street intersection or provide some other improvement to provide for pedestrian safety;
- f) Signalize the Main Street/Pine Street intersection;
- g) Construct bicycle lane and pedestrian improvements on Chestnut Street and Oak Street;
- h) Consider extending Harrison Street south from Walnut Street to Cypress Street.
- i) Continue the two northbound through lanes on Main Street from Oak Street to just north of Laurel Street. Stripe the curb lane as a right turn only lane between Redwood Avenue and Laurel Street. This improvement shall only be implemented if there are no other feasible circulation improvements that would result in the street operating at a LOS E or better.
- j) Construct a second southbound through travel lane on Main Street from Elm Street to Laurel Street. This improvement shall only be implemented if there are no other feasible circulation improvements that would result in the street operating at a LOS E or better.

Policy C-2.4 Roadway Standards: Continue to provide consistent standards for the City's street system.

Program C-2.4.1: Establish standards for public streets, which allow for the following:

- a) traffic "calming" measures;
- b) sidewalks with curbs, gutters, and a planting strip between the sidewalk and the roadway;
- c) rounded street corners with "bulb-outs" at key intersections;
- d) continuation of the grid street system; and
- e) standards for radius returns for local, collector, and arterial streets.

Program C-2.4.1.2: Adopt standards for alleyways which address parking restrictions, shared access, lighting, and maintenance.

Policy C-2.5: Continue to prohibit the establishment of private roads.

Policy C-2.6: Traffic Studies for High Trip Generating Uses: Traffic studies shall be required for all major development proposals, including but not limited to, drive-through facilities, fast food outlets, convenience markets, major tourist accommodations, shopping centers, commercial development, residential subdivisions, and other generators of high traffic volumes that would affect a Level of Service. Traffic studies shall identify, at a minimum:

- (a) the amount of traffic to be added to the street system by the proposed development;
- (b) other known and foreseeable projects and their effects on the street system;
- (c) the direct, indirect, and cumulative adverse impacts of project traffic on street system operations, safety, and public access to the coast;
- (d) mitigation measures necessary to provide for project traffic while maintaining City Level of Service standards;
- (e) the responsibility of the developer to provide improvements; and
- (f) the timing of all improvements.

Policy C-2.7: Consider Impacts to Roads for LCP Amendments. Direct, indirect, and cumulative adverse impacts to Highway 1 capacity in the rural areas surrounding Fort Bragg shall be considered during the review of proposed LCP amendments that would increase density or change land use classifications to ensure that Highway 1 in rural areas outside the Mendocino County urban/rural boundary remains a scenic two-lane road consistent with Section 30254 of the Coastal Act.

Policy C-2.8 Continuation of Streets: Require the continuation of streets and bicycle and pedestrian paths through new developments wherever possible.

Policy C-2.9: Facilitate Street Connections. Review site plans for new development to facilitate the continuation of streets to improve local circulation. Priority shall be given to providing pedestrian and bicycle trails that establish connections to streets wherever possible.

Policy C-2.10 Continue Grid System onto Mill Site: Ensure that the grid street system and a north/south arterial on the Mill Site be designed to ensure the maximum benefit to local traffic, pedestrian, and bicycle circulation and to provide maximum public access to the coast.

Policy C-2.11 Right-of-Way Acquisition: Require right-of-way acquisition for new development to meet the City's roadway width standards.

Policy C-2.12 Roadway Safety: Improve the safety of the roadway system. All safety improvements shall be consistent with the applicable policies of the LCP including, but not limited to, the wetlands, environmentally sensitive habitat area, public access, and visual protection policies.

Program C-2.12.1: Periodically analyze the locations of traffic accidents to identify problems and use this information to set priorities for improvements as a part of the City's Capital Improvement Program.

3. Residential Areas

The City's residential neighborhoods need to be protected from excessive through-traffic. When Main Street and other arterial streets become congested, drivers may seek alternate routes to their destination, often taking local streets through residential areas.

Excessive traffic on local streets has an impact on the quality of life. Through-traffic can generate excessive noise and present potential safety hazards to children. The goals, policies, and programs below are intended to address this issue.

Goal C-3 Preserve the peace and quiet of residential areas.

Policy C-3.1 Reduce Through-Traffic on Local Streets: Reduce through-traffic on local streets to preserve the peace and quiet of residential areas.

Program C-3.1.1: Develop measures to limit through-traffic on residential streets when traffic studies indicate that traffic volumes on such streets exceed the adopted Levels of Service and/or safety concerns warrant such measures.

Program C-3.1.2: Consider the following measures, as appropriate, to reduce through-traffic from using local streets in residential areas:

- a) narrow and landscape the street entrances to residential areas that experience heavy traffic;
- b) restrict turning movements into residential areas; and
- c) use traffic calming measures such as permitting wider sidewalks, additional on-street parking, and landscape strips between the sidewalk and the road.

Policy C-3.2 Additional Connector Streets: Establish additional connectors between residential streets to improve emergency access, particularly on dead-end streets south of Chestnut Street.

4. Main Street Corridor

Transportation improvements to Main Street and principal streets in the Central Business District will enhance the character, sense of place and economic well-being of this area. However, the need to accommodate traffic flow through the City should be considered in the context of the community's desire to preserve and enhance the historic character of Fort Bragg's Central Business District.

Goal C-4 Regard the quality of life in Fort Bragg and maintaining community identity as more important than accommodating through-traffic.

Policy C-4.1 Community Priorities for Transportation Improvements: Place a higher priority on maintaining a sense of place and enhancing the attractiveness of the Central Business District than on efficient traffic flow and movement. (The adopted Level of Service Standards make an exception for Main Street between the northbound lane merge area, currently located just south of Laurel Street, to Manzanita Streets, to prevent street widening and/or elimination of on-street parking which would require acquisition of the right-of-way, and consequently change the character of the City's historic downtown. Widening this segment of Main Street would require acquisition of right-of-way and reduction in on-street parking, thereby changing the intimate, pedestrian-oriented downtown the City wishes to preserve and enhance.)

Program C-4.1.1: Consider traffic safety, the ease and safety of pedestrian movement across Main Street, and adequacy of on-street parking as key factors in evaluation of proposed roadway improvements along Main Street.

Program C-4.1.2: Ensure that property and business owners in the Central Business District are informed and actively involved in planning future improvements to Main Street and other nearby streets.

Program C-4.1.4: Consider signalizing the intersection of Pine Street and Main Street to provide adequate pedestrian safety.

Program C-4.1.5: Consider options for increasing the capacity of Main Street north of the northbound lane merge area south of Laurel Street that do not require elimination of parking.

5. Parking

Adequate off-street parking is essential for Central Business District businesses¹. Fort Bragg has implemented an in-lieu fee to build additional off-street parking facilities. Providing additional off-street parking facilities in the Central Business District will have a community-wide benefit.

Goal C-5 Provide additional parking spaces in the Central Business District.

Policy C-5.1 Additional Off-Street Parking: Continue to construct additional off-street parking spaces in the Central Business District.

Program C-5.1.1: Continue, and update, as needed, the City's parking in-lieu fee program for the Central Business District.

Program C-5.1.2: Define priorities for the acquisition of property and the construction of additional parking facilities.

Program C-5.1.3: Encourage the use of reciprocal access agreements and interconnecting off-street parking and circulation between adjacent commercial uses.

Program C-5.1.4: Revise the Coastal LUDC to allow shared parking and driveways for commercial uses having day/night activity patterns.

Program C-5.1.5: Develop a comprehensive signage program within the Central Business District to direct vehicles to off-street parking areas.

Program C-5.1.6: Develop incentives for employers and employees to park off-street in the Central Business District.

Program C-5.1.7: Continue enforcing parking restrictions in alleyways to ensure access for emergency and delivery vehicles.

Program C-5.1.8: Review building setback standards from alleyways to ensure adequate emergency vehicle access.

¹ Refer to the Downtown Parking Study, City of Fort Bragg, 1999.

6. Additional Access to Noyo Harbor

Currently, access to the north side of Noyo Harbor is limited to North Harbor Drive. Another access is required to improve traffic circulation and to ensure that emergency vehicles can reach Noyo Harbor in the event North Harbor Drive is obstructed. Improved access to the Noyo Harbor would be considered if and when the City annexes the harbor.

Goal C-6 Improve access to the North Part of the Noyo Harbor.

Policy C-6.1 Provide Additional Access Routes to Noyo Harbor: Consider constructing a new access route from the west side of Main Street to the north side of the Noyo Harbor. Any new access route to the north side of the Noyo Harbor shall be consistent with all applicable policies of the LCP including, but not limited to, the wetland, environmentally sensitive habitat area, public access, and visual protection policies.

Program C-6.1.1: Evaluate the economic and environmental feasibility of acquiring an access route to Noyo Harbor using existing road alignments extended onto the Georgia-Pacific site.

Policy C-6.2 Improve Existing North Harbor Drive: Consider improvements to North Harbor Drive to increase capacity and safety for vehicles and pedestrians. Any improvements to North Harbor Drive shall be consistent with all applicable policies of the LCP including, but not limited to, the wetland, environmentally sensitive habitat area, public access, and visual protection policies.

Program C-6.2.1: Develop a plan to improve North Harbor Drive by enlarging lane widths and constructing a sidewalk along one side of the street.

7. Additional Eastern Emergency Route

The City needs to establish an emergency route to the east for emergency vehicles and for evacuation in the event bridges are blocked or destroyed.

Goal C-7 Improve emergency access to the City.

Policy C-7.1 Emergency Access: Establish an access route out of Fort Bragg that could be used in the event of damage to the Noyo River and Pudding Creek Bridges.

Program C-7.1.1: Work with the Georgia-Pacific Corporation to obtain temporary use, in the event of an emergency, of the logging road that begins on Cypress Street and provides access to Highway 20, east of Fort Bragg.

Program C-7.1.2: Prepare an emergency evacuation route plan for the City.

8. Public Transit

Fort Bragg is served by the Mendocino Transit Authority (MTA). MTA provides daily bus service (the "65 CC Rider") between Fort Bragg, Willits, Ukiah, and Santa Rosa. A separate bus route (the "60 The Coaster") provides weekday service between Fort Bragg, Mendocino, and the Navarro River.

MTA has a fixed-route weekday bus service (the "5 BraggAbout") in Fort Bragg with seven fixed stops that connect the College of the Redwoods, shopping centers, the Central Business District, and the hospital. Local trips within the Fort Bragg area are also provided by MTA's dial-a-ride service where riders can call to be picked up and delivered to their destination Monday through Saturday. In addition, the Redwood Senior Center provides transportation services for seniors in the community.

Goal C-8 Provide better public transportation.

Policy C-8.1: Encourage Transit Use.

Program C-8.1.1: Continue to support the expansion of transit services provided by MTA and other public transit providers.

Policy C-8.2: Bus Shelters: Encourage attractive, well-lighted, and comfortable bus shelters placed in convenient locations.

Program C-8.2.1: Continue to require the provision of bus stops, bus shelters, benches, turnouts, and related facilities in all major new commercial, industrial, residential, and institutional developments, and identify, in collaboration with MTA, additional locations for bus stops and shelters.

Policy C-8.3: Transit Facilities in New Development. Continue to require the provision of bus stops, bus shelters, benches, turnouts, and related facilities in all major new commercial, industrial, residential, and institutional developments.

9. Pedestrian Facilities

Most areas of Fort Bragg have sidewalks for pedestrians. There are, however, a number of residential streets which lack sidewalks, and substandard sidewalk facilities exist throughout the City. Better pedestrian access across Fort Bragg's bridges and along Main Street from the Noyo Bridge to the southern City limits and from Elm Street north is needed. New development must be served by adequate pedestrian facilities. In addition to the policies and programs listed below, see the Conservation, Open Space, and Parks Element regarding policies and programs recommended for increasing and improving the trail system within the Planning Area.

Goal C-9 Make it easier and safer for people to walk in Fort Bragg.

Policy C-9.1: Provide Continuous Sidewalks: Provide a continuous system of sidewalks throughout the City.

Policy C-9.2: Require Sidewalks. Require a sidewalk on both sides of all collector and arterial streets and on at least one side of local streets as a condition of approval for new development.

Program C-9.2.1: Consider implementing the following funding sources for the purpose of installing sidewalks in existing developed areas of the City:

- a) special benefit assessment districts; and/or
- b) a low-interest revolving loan fund.

Program C-9.2.2: Work with the Mendocino Council of Governments and Caltrans to construct pedestrian walkways over the Hare Creek and Pudding Creek Bridges. These facilities may qualify for Transportation Enhancement Activities (TEA) funding available through Mendocino Council of Governments (MCOG).

Policy C-9.3: Where feasible, incorporate pedestrian facilities into the design and construction of all road improvements.

Program C-9.3.1: Incorporate additional sidewalks from the Noyo Bridge to Ocean View Drive in the Capital Improvement Program.

Policy C-9.4: Sidewalk Maintenance: Ensure that property owners maintain sidewalks in a safe manner.

Program C-9.4.1: Continue to implement City regulations that require sidewalks to be maintained by property owners. Carry out regular inspections, notification, and enforcement of this requirement.

Program C-9.4.2: Financial Concerns: Consider the financial ability of property owners when establishing proposed sidewalk assessment districts.

Program C-9.4.3: Seek available funding from grants and other funding sources for the construction of sidewalks in existing developed areas.

Program C-9.4.4: Consider deferring payment for sidewalk installations for property owners with low incomes and/or on fixed incomes.

Policy C-9.5 Pedestrian Paths: Develop a series of continuous pedestrian walkways throughout the commercial districts and residential neighborhoods.

Program C-9.5.1: Allow asphalt or other approved surface pedestrian paths in very low density single-family residential areas where sidewalks are not required.

Program C-9.5.2: Revise the Subdivision and Coastal Program to allow approved surface pedestrian paths within developments to create pedestrian connections to nearby streets, community facilities, and adjacent developments as a part of on- and off-site improvements.

Policy C-9.6: Ensure that pedestrian paths are sited to avoid wetlands and other environmentally sensitive areas.

Policy C-9.7: Improve Pedestrian Safety.

Program C-9.7.1: Continue to provide traffic controls and well-lit intersections in areas with a high volume of pedestrian movement.

Program C-9.7.2: Consider expanded use of illuminated crosswalks.

10. Bikeways

With better facilities and trails, bicycling can become a more significant part of the transportation system and an alternative to automobile use. Fort Bragg has few constraints to bicycling: most of the City is flat, the weather is mild, and the City is compact with relatively short distances between residential areas, schools, parks, and commercial centers.

The California Street and Highway Code has established three categories of bicycle trails based on the physical conditions of the right-of-way.

Class 1 Bikeway - Bike Path or Bike Trail: These facilities are constructed on a separate right-of-way, are completely separated from street traffic, and have minimal cross flows of automobile traffic. The State standard for minimum paved width of a two-way bike trail is eight feet.

Class 2 Bikeway - Bike Lane: A restricted right-of-way for the exclusive use of bicycles with vehicle parking and cross flow by pedestrians and motorists permitted. Bike lanes are normally striped within paved areas of highways and are one-directional with a minimum standard width of five feet.

Class 3 Bikeway - Bike Route: A route for bicyclists designated by signs or other markings and shared with pedestrians and motorists. Bike routes are typically designated to provide linkages to the bikeway system where Class 1 or 2 Bikeways cannot be provided.

The following local bikeway projects are identified as high priority by Mendocino County's *2000 Regional Bikeway Plan*. A full description of recommended improvements is included in that Plan.

- The Pudding Creek Trestle to Otis Johnson Park Bikeway would provide a link between a park in northeast Fort Bragg and the beach at the mouth of Pudding Creek. It would also connect with the Old Haul Road, which travels north through MacKerricher State Park. As indicated on Map C-2, this path would serve Fort Bragg Middle School and neighborhoods in the northwest area of the City through a combination of Class 2 and 3 Bikeways. New Class 3 segments would be required from the Pudding Creek Trestle to Elm Street. Class 3 improvements would be constructed on Elm Street, Franklin Street, and Laurel Street.
- The Otis Johnson Park/Dana Street Bikeway would provide a north-south link within central Fort Bragg. This bicycle route would connect Fort Bragg Middle School and Fort Bragg High School. The proposed bike route would use existing bikeways and a section of the proposed bikeway improvement listed above for Laurel Street. It would consist of Class 3 Bikeway improvements on Oak Street and Class 1 Bikeway improvements on Dana Street.
- The Dana Gray School to Maple Street Bikeway would provide east-west access between Dana Gray School and an existing bikeway on Maple Street. Class 3 Bikeways would be constructed on S. Sanderson Way, Willow Street, and Lincoln Street.

Goal C-10 Make it easier and safer for people to travel by bicycle.

Policy C-10.1 Comprehensive Bikeway System: Establish a comprehensive and safe system of bikeways connecting all parts of Fort Bragg.

Program C-10.1.1: Complete the bikeway system as indicated in Map C-2: Bicycle Paths. Make the completion of the Pudding Creek Trestle/Glass Beach to Otis Johnson Park a high priority.

Program C-10.1.2: Incorporate bicycle and pedestrian facilities into the design and construction of all road improvements as feasible.

Program C-10.1.3: Continue to participate in MCOG's *Regional Bikeway Plan* to qualify for State Bicycle Lane Account funds.

Program C-10.1.4: Utilize parking-in-lieu funds, dedications, grant funding, traffic impact fees, and other means, as appropriate, to acquire rights-of-way needed for a comprehensive bikeway system as indicated in Map C-2.

Program C-10.1.5: Maintain bikeways to ensure that they are free of debris and other obstacles. Consider increasing the number of trash receptacles, solar-powered emergency telephones, and increased lighting along bicycle trails.

Policy C-10.2: Require Bikeways. Require new development to provide on-site connections to existing and proposed bikeways, as appropriate.

Policy C-10.3: Require that streets linking residential areas with school facilities be designed to include bikeways.

Policy C-10.4: Consider bicycle operating characteristics in the design of intersections and traffic control systems.

Policy C-10.5 Bicycle Parking: Provide adequate and secure bicycle parking at public transit facilities, park and ride lots, schools, the library, parks, City offices, and commercial areas.

Program C-10.5.1: Revise the Coastal LUDC parking standards to require larger commercial and multi-family residential projects, public buildings, and transit facilities to provide secure bicycle parking.

Program C-10.5.2: Continue the bicycle safety program conducted by the Police Department.

11. Access for the Mobility Impaired

Providing transportation facilities accessible to persons who are mobility-impaired is essential. Approximately three percent of the population in Fort Bragg cannot use conventional public transit due to a disability. The Federal Americans with Disabilities Act of 1990 contains many requirements regarding removal of barriers for persons with disabilities.

Goal C-11 Provide mobility-impaired persons with access to transportation.

Policy C-11.1: Regulations for Disabled Persons: Enforce Federal and State regulations regarding access for persons with disabilities.

Policy C-11.2: Handicapped Access. In conformance with State and Federal regulations, continue to review all projects for handicapped access and require the installation of curb cuts, ramps, and other improvements facilitating handicapped access.

Program C-11.2.1: Assist organizations, such as the Senior Center, which provide transit service to the elderly and the mobility-impaired, in identifying and obtaining funding.

Policy C-11.3 Support Improved Access: Support improved access to public transportation and pedestrian facilities for people with disabilities.

Program C-11.3.1: Continue to apply for grants for ADA-related projects from MCOG and other sources.

Program C-11.3.2: Consider funding to implement the City's ADA Access and Transportation Plan through the City's Capital Improvement Plan (CIP), grants, and State and Federal transportation funds.

12. Train Service

The Sierra Railroad, known as the Skunk Line, operates a rail system between Willits and Fort Bragg. It is the only railroad in the region that has maintained passenger service on a regular basis since its founding. Train service is offered daily (approximately eleven months per year), and handles approximately 80,000 passengers annually. Freight service is provided on request.

The Skunk Depot, located at Laurel Street in the Central Business District, has been recently renovated, including additional parking facilities. It provides access to MTA's local and regional buses. The railroad not only benefits from the extensive tourist traffic on the Mendocino Coast, it is also a major generator of visitors to the Willits and Fort Bragg areas.

Although the use of the Skunk Line for freight transportation has decreased in recent years, it continues to provide freight service. If the rail lines were upgraded to carry heavier loads, it could serve as an incentive to increase freight loads.

Goal C-12 Increase use of the Skunk Line for transportation of people and freight.

Policy C-12.1 Skunk Train: Encourage increased use of the Skunk Train.

Program C-12.1.1: Continue to work with the Skunk Train Company to improve and expand facilities at the Skunk Depot.

Program C-12.1.2: Work with the Mendocino Council of Governments to facilitate increased use of the Skunk Line as an alternative to automobile transportation between Fort Bragg and Willits.

13. Coordinate Regional Transportation Planning

Traffic congestion along Fort Bragg's Main Street is connected to development in unincorporated areas to the north and south of the City. Main Street is Highway One which is the primary north-south route for all communities on the coast. Land use decisions made by the County of Mendocino have a significant impact on transportation in the Fort Bragg area. The City works closely with the regional agencies described below:

- County of Mendocino: maintains and plans the county road system.
- Mendocino Council of Governments (MCOG): prepares and carries out a Regional Transportation Plan, establishes priorities for Federal and State funding, and funds studies of transportation corridors.
- Mendocino Transit Authority, (MTA): operates several transit routes serving the City and the region. It is a county-wide authority created through a joint powers agreement among cities and the County.

Goal C-13 Coordinate regional traffic planning.

Policy C-13.1 Regional Transportation Efforts: Participate in regional transportation planning efforts.

Program C-13.1.1: Continue to provide City Council and staff representation on regional transportation planning agencies.

Program C-13.1.2: Work with the MCOG and Caltrans to coordinate transportation planning and to identify funding for necessary transportation improvements.

Program C-13.1.3: Continue to ensure that MCOG's Regional Transportation Plan (RTP), the State Transportation Improvement Program (STIP) and the State Highway Systems Operation and Protection Plan (SHOPP) include needed improvements to Highway One and Highway 20 in the Fort Bragg Planning area. Such improvements shall be designed to ensure that Highway One in rural areas outside the Mendocino County urban/rural boundary remains a scenic two-lane road consistent with Section 30254 of the Coastal Act.

14. Funding Transportation Improvements

Funding transportation improvements is predominantly a Federal, State, and regional responsibility. For many years the road system has received the largest proportion of public expenditures for transportation. Although increased funding for alternative modes of transportation has significant environmental and social benefits, roadway funding will continue to receive the highest priority. Fort Bragg remains a relatively isolated coastal community and depends on the road system for the majority of its transportation needs.

A significant amount of the traffic in Fort Bragg is through-traffic (trips that originate or have destinations outside of the City). The logging industry, tourist travel, and people coming to Fort Bragg from around the region for shopping, educational, medical, and other services generate much of the traffic.

It is necessary that funding mechanisms be expanded to ensure effective coordination among different government jurisdictions. The goals, policies, and programs below complement those

in the Land Use and Public Facilities Elements requiring new development to pay for its fair share of maintaining the City's infrastructure and service levels.

Goal C-14 Promote balanced funding for transportation.

Policy C-14.1 Development to Pay Its Fair Share: Require new development to pay its fair share of transportation improvements to maintain levels of service and traffic safety in the City.

Program C-14.1.1: Develop a City-wide Traffic Mitigation Fee Program.

Program C-14.1.2: Work with the County of Mendocino and MCOG to develop traffic mitigation fees for the Fort Bragg Sphere of Influence. Consider adopting a memorandum of understanding between the City of Fort Bragg and the County regarding traffic mitigation fees.

Program C-14.1.3: Work with MCOG to ensure that the standards and requirements contained in the joint City and County Traffic Mitigation Program between Fort Bragg and the County are incorporated into the Regional Transportation Plan.

Program C-14.1.4: Include in the Traffic Mitigation Fee Program mitigation fees for new development with primary access to Highway One and Highway 20. Utilize the funds collected as a local match to encourage Caltrans to raise the priority of Highway One and Highway 20 improvements.

Program C-14.1.5: Ensure that the City's Pavement Management System obtains funding from the Traffic Mitigation Fee Program, as deemed appropriate by the traffic impact fee nexus study and applicable State law.

Program C-14.1.6: Carry out an ongoing inventory of transportation system needs to be included in the City's Capital Improvement Plan.

6. COMMUNITY DESIGN ELEMENT

A. Purpose

The Community Design Element is concerned primarily with the protection of the visual resources and quality in the Coastal Zone and the City, or what residents and visitors see. The City's appearance is essential to the quality of life in Fort Bragg. Visual quality and amenities go hand-in-hand with long-term economic development strategies, and strengthen the stability and desirability of the community. To be attractive to residents, visitors, and businesses, the City must be concerned about its appearance, physical character, and livability. Existing residential real estate values and the desirability of businesses that depend on tourism are closely tied to the visual character of the community.

This element contains sections addressing Visual Analyses for development in the Coastal Zone, Design Review, the Central Business District, historic preservation, and public art and spaces.

The Community Design Element also establishes goals, policies, and programs to preserve and enhance Fort Bragg's authentic, small town character. The community is defined in part by its isolated location on the magnificent coastline of Mendocino County. Its sense of place derives from its heritage as a regional center for the timber and fishing industries. As the economy evolves to a more tourism and service-based economy, the community has acknowledged the importance of maintaining the historic identity of downtown and the integrity of the residential neighborhoods, while enhancing views and access to the coastline and planning for continued growth and development.

B. Community Design and the Coastal Act

Protection of visual resources is called for by the Coastal Act. Section 30251 of the Coastal Act states that the scenic and visual qualities of coastal areas shall be considered and protected as a resource of public importance. Permitted development shall be sited and designed to protect views to and along the ocean and scenic coastal areas to minimize alteration of natural land forms, to be visually compatible with the character of surrounding areas, and, where feasible, to restore and enhance visual quality in visually degraded areas. The Local Coastal Program Background Report contains an inventory of scenic views.

Fort Bragg has many valuable visual resources in the Coastal Zone, including high bluffs, jutting headlands, wetlands, serene river estuaries, beaches, and dunes. The mature trees that front the west side of Main Street between the North Cliff Hotel and Maple Street provide an important visual resource. Scenic resources attract many visitors to these areas and provide the basis for the City's tourist industry. Visual resources can be readily degraded through poorly-designed and located structures, roads, signs, and utility lines that block coastal views, alter natural landforms, and detract from the small town character of the community.

In addition, Section 30253 of the Coastal Act states that new development shall, where appropriate, protect special communities and neighborhoods which, because of their unique characteristics, are popular visitor destination points for recreational uses.

C. Design Review

Most new development in the City is subject to a design review process which is intended to ensure that it preserves and enhances the aesthetic character of its setting. This Element and the City's recently adopted Citywide Design Guidelines assist property owners, business owners, and developers to design projects which fit with the City. This element and the Citywide Design Guidelines also assist decision-makers with the evaluation of proposed development.

The Citywide Design Guidelines are intended to be flexible and to encourage innovative and creative designs. For this reason, the Guidelines are generally qualitative statements rather than quantitative standards, and there are many acceptable ways to meet each of the Guidelines. Design Review approval requirements do not replace, supersede or otherwise modify the independent requirement for a coastal development permit approved pursuant to the applicable policies and standards of the certified LCP.

D. Historic Preservation

Much of Fort Bragg was built during the first half of the twentieth century, and the built environment in the Central Business District and many of the neighborhoods reflects the architectural heritage of the community. Fort Bragg's architecturally significant buildings and structures convey a sense of the community's history, providing a link to the past and strengthening the City's identity. From the Sherwood Pomo who lived in the area for over 5,000 years to the more recent European settlers seeking lumber, fish, and fur, the landscape has seen remarkable transformations.

The City has a Historic Building Inventory that identifies buildings, sites, structures, and objects of cultural and historical importance. The purpose of the Inventory is to preserve the community's heritage by facilitating use of the State of California's Historic Building Code. To be included in the Historic Building Inventory, a structure must be at least 40 years old and meet other criteria related to its design and history. The Inventory is not a comprehensive description of all historically or culturally significant buildings or sites in the community, and a property is listed at the owner's request.

E. The Central Business District

The Central Business District (CBD) is the heart of the community's commercial, civic, historic, and cultural life. It is the area with the largest concentration of historic buildings such as the Skunk Train Depot, the Guest House Museum, the Old Fort Building, Town Hall, City Hall, and numerous commercial and residential structures. The combined efforts of government and property owners will ensure that the attractiveness of the downtown will be preserved and enhanced. Increasing pedestrian activity, improving street lighting, parking, and amenities, and ensuring that renovations and new construction maintain the historic scale and character of this area will foster the continued vitality of the CBD.

Old Fort Building, 430 Franklin Street

F. Goals, Policies, and Programs

The following policies demarcated with the Fort Bragg City seal:  are not part of the certified LCP and do not govern the review and approval of coastal development permits: Policy CD-2.6, Policy CD-3.3, Policy CD-7.3, and Policy CD-8.1.

Goal CD-1 Preserve and enhance scenic views.

Policy CD-1.1: Visual Resources: Permitted development shall be designed and sited to protect views to and along the ocean and scenic coastal areas, to minimize the alteration of natural landforms, to be visually compatible with the character of surrounding areas, and, where feasible, to restore and enhance scenic views in visually degraded areas.

Program CD-1.1.1: Require Design Review of new development or significant expansion to existing development¹ located in areas designated "Potential Scenic Views Toward the Ocean or the Noyo River" on Map CD-1: Scenic Views in the Coastal Zone.

Policy CD-1.2: The large trees fronting the west side of Highway One between the North Cliff Hotel and Cypress Street shall be retained as far as feasible; trees may be removed if they are dead or damaged or pose a public safety hazard, or to provide driveways or new public streets. The forested area north of the Georgia-Pacific nursery and south of Maple Street shall be maintained as a sensitive natural habitat and scenic resource, and it shall not be developed.

Policy CD-1.3: Visual Analysis Required. A Visual Analysis shall be required for all development located in areas designated "Potential Scenic Views Toward the Ocean or the Noyo River" on Map CD-1 except development listed in below. Development exempt from Visual Analysis includes the following:

¹ For purposes of Design Review, Significant expansion of existing development is defined as an increase equal to or over 25 percent of the existing floor area of a structure.

1. The replacement of any structure, other than a public works facility, destroyed by a disaster. The replacement structure shall conform to applicable existing zoning requirements, shall be for the same use as the destroyed structure, shall not exceed either the floor area, height, or bulk of the destroyed structure by more than 10 percent, and shall be sited in the same location on the affected property as the destroyed structure.
2. The demolition and reconstruction of a single-family residence; provided, that the reconstructed residence shall not exceed either the floor area, height or bulk of the former structure by more than 10 percent, and that the reconstructed residence shall be sited in the same location on the affected property as the former structure.
3. Improvements to any structure which do not change the intensity of its use, which do not increase either the floor area, height, or bulk of the structure by more than 10 percent, which do not block or impede public access, and which do not result in a seaward encroachment by the structure.
4. The reconstruction or repair of any seawall; provided, however, that the reconstructed or repaired seawall is not seaward of the location of the former structure.
5. Any repair or maintenance activity for which the Director determines has no potential for impacts to visual resources.

Definitions as used in this subsection:

1. "Disaster" means any situation in which the force or forces which destroyed the structure to be replaced were beyond the control of its owner.
2. "Bulk" means total interior cubic volume as measured from the exterior surface of the structure.
3. "Structure" includes landscaping and any erosion control structure or device which is similar to that which existed prior to the occurrence of the disaster.

Policy CD-1.4: New development shall be sited and designed to minimize adverse impacts on scenic areas visible from scenic roads or public viewing areas to the maximum feasible extent.

Policy CD-1.5: All new development shall be sited and designed to minimize alteration of natural landforms by:

1. Conforming to the natural topography.
2. Preventing substantial grading or reconfiguration of the project site.
3. Minimizing flat building pads on slopes. Building pads on sloping sites shall utilize split level or stepped-pad designs.
4. Requiring that man-made contours mimic the natural contours.
5. Ensuring that graded slopes blend with the existing terrain of the site and surrounding area.
6. Minimizing grading permitted outside of the building footprint.
7. Clustering structures to minimize site disturbance and to minimize development area.
8. Minimizing height and length of cut and fill slopes.
9. Minimizing the height and length of retaining walls.

Map CD-1
SCENIC VIEWS IN THE
COASTAL ZONE

- - - City Boundary
- Potential scenic views toward the ocean or the Noyo River
- The protection and enhancement of scenic views on the former Mill Site will be addressed in a Specific Plan.

Source: City of Fort Bragg
July, 2008
Scale 1" = 2300' (approximate)
For Schematic purposes only

10. Cut and fill operations may be balanced on-site, where the grading does not substantially alter the existing topography and blends with the surrounding area. Export of cut material may be required to preserve the natural topography.

Policy CD-1.6: Fences, walls, and landscaping shall minimize blockage of scenic areas from roads, parks, beaches, and other public viewing areas.

Policy CD-1.7: Bluff Face and Bluff Retreat Setback Development. Development on the bluff face and within the bluff retreat setback shall be limited to the following uses with a conditional use permit where there is no feasible less environmentally damaging alternative, feasible mitigation measures have been provided to minimize all adverse environmental impacts, and allowable structures are designed be visually compatible with the surrounding area to the maximum extent feasible.

- (a) engineered accessways or staircases to beaches, boardwalks, viewing platforms, and trail alignments for public access purposes,
- (b) pipelines to serve coastal dependent industry,
- (c) habitat restoration,
- (d) hazardous materials remediation, and
- (e) landform alterations where such alterations re-establish natural landforms and drainage patterns that have been eliminated by previous development activities.

Policy CD-1.8: Blufftop development shall incorporate a setback from the edge of the bluff that avoids and minimizes visual impacts from the beach and ocean below. The blufftop setback necessary to protect visual resources may be in excess of the setback necessary to ensure that risk from geologic hazards are minimized for the life of the structure, as detailed in Policy SF-B.

Policy CD-1.9: Exterior lighting (except traffic lights, navigational lights, and other similar safety lighting) shall be minimized, restricted to low intensity fixtures, and shielded so that no light shines beyond the boundary of the property.

Policy CD-1.10: All proposed divisions of land and boundary line adjustments shall be analyzed for consistency of potential future development with the visual resource protection policies of the LCP, and no division of land or boundary line adjustment shall be approved if development of resulting parcel(s) would be inconsistent with these policies.

Policy CD-1.11: New development shall minimize removal of natural vegetation. Existing native trees and plants shall be preserved on the site to the maximum extent feasible.

Program CD.1.11.1: Consider amending the Coastal LUDC to adopt additional design standards to protect scenic resources.

Policy CD-1.12 Maintain Unobstructed Views of the Ocean: Require new development north of Pudding Creek to leave unblocked views to the ocean from Highway One.

Policy CD-1.13: Retain Views North of Pudding Creek. New development north of Pudding Creek and west of Main Street on parcels with total frontage of more than 135 feet, on either the Haul Road or Main Street as determined by the Planning Commission, shall be required to leave a minimum of 30 percent of the project's total parcel frontage free of view-blocking development. The area free of view-blocking development shall not include narrow passageways between buildings on the site, and shall be concentrated.

Policy CD-1.14 All new development (including decks and balconies) north of Pudding Creek shall be set back at least 30 feet from the edge of the Old Haul Road and shall be consistent with all other applicable LCP setback requirements.

Goal CD-2: Ensure that new development demonstrates excellence of design and sensitivity to the character of the surrounding neighborhood.

Policy CD-2.1 Design Review: All development that has the potential to affect visual resources shall be subject to Design Review, unless otherwise exempt from Design Review pursuant to Coastal Land Use & Development Code Section 18.71.050. Design Review approval requirements shall not replace, supersede or otherwise modify the independent requirement for a coastal development permit approved pursuant to the applicable policies and standards of the certified LCP. Ensure that development is constructed in a manner consistent with the Citywide Design Guidelines.

Program CD-2.1.1: Establish a procedure for property owners to request that the City adopt additional Citywide Design – Guidelines and/or measures for the preservation of historic structures within their neighborhood or commercial area.

Policy CD-2.2 Large Commercial Development: Ensure that large commercial development, such as shopping centers, big box retail, and mixed use development, fits harmoniously with the scale and design of existing buildings and streetscape of the City.

Policy CD-2.3 Second Dwelling Units and Manufactured Units and Single-Family Residential Development: Ensure that second dwelling units, manufactured units, and single-family residences are sited and constructed in a manner harmonious with surrounding development.

Policy CD-2.4 Discourage Sameness and Repetitive Residential Designs.

Policy CD-2.5 Scenic Views and Resource Areas: Ensure that development does not adversely impact scenic views and resources as seen from a road and other public rights-of-way.

Program CD-2.5.1: Adopt additional Citywide Design – Guidelines for scenic views and resources identified in Map CD-1. Consider including, at a minimum, the following guidelines:

- a) Discourage continuous buildings that block scenic views and require view corridors providing unobstructed views of the shoreline and/or the sea from public rights-of-way.
- b) Require bluff setbacks for development adjacent to or near public areas along the shoreline.
- c) Cluster development to avoid blocking viewsheds to the maximum extent feasible.
- d) Minimize the size of advertising, business identification, and directional signs to ensure scenic views are not obstructed.
- e) Design night lighting of buildings to be indirect with no source of light visible, and lighting should not intrude on adjacent property or cause glare.
- f) Prohibit or require screening of the following uses in scenic view corridors: signs and fencing which block the scenic views, mechanical

equipment, refuse containers such as dumpsters, and the outdoor storage of materials.

Policy CD-2.6 Property Maintenance and Nuisances: Ensure that properties are well maintained and nuisances are abated.

Program CD-2.6.1: Continue to implement and enforce the City's nuisance abatement ordinance, and update it, as necessary, to ensure that property values are maintained throughout the City.

Program CD-2.6.2: Consider adopting regulations in the Municipal Code requiring that alleyways in residential areas be kept free of obstructions to ensure unimpeded access at all times.

Program CD-2.6.3: Provide Code enforcement for immediate health and safety violations in conjunction with the building inspection process.

Policy CD-2.7 Landscaping: Encourage attractive native and drought-tolerant landscaping in residential and commercial developments.

Policy CD-2.8 Strip Development: Discourage further strip development along Main Street. Strip development is typically characterized by street frontage parking lots serving individual or strips of stores or restaurants, with no provisions for pedestrian access between individual uses and buildings arranged linearly.

Program CD-2.8.1: Establish standards regarding site access, separation of vehicular and pedestrian movements, signage, landscaping and night-lighting for automobile-dependent businesses such as drive-through restaurants and automobile service stations.

Goal CD-3 Preserve the Central Business District as the commercial, civic, historic, and cultural center of the community.

Policy CD-3.1 Adaptive Reuse: Facilitate the adaptive reuse of existing older buildings in the Central Business District.

Program CD-3.1.1: Consider establishing a low-interest revolving loan fund for the renovation and upgrading of older buildings in the Central Business District, with incentives for the reuse of vacant or underutilized upper floors for housing.

Policy CD-3.2 Pedestrian Activity: Encourage increased pedestrian movement and activity in the Central Business District.

Program CD-3.2.1: Implement streetscape improvements such as pedestrian lighting, street trees, additional crosswalks, benches, intersection bulb-outs, and other amenities that improve the safety and ambiance of the Central Business District.

Program CD-3.2.2: Continue to support the operation of a Farmer's Market and a multitude of street fairs and promotional activities in the Central Business District.

Policy CD-3.3 Economic Vitality: Continue to support the economic diversity and vitality of downtown businesses.

Program CD-3.3.1: Consider establishing a Business Improvement District (BID) to stimulate increased business activity and revenues by helping to fund public improvements and loans and/or grants for private improvements in the Central Business District.

Program CD-3.3.2: Consider amendments to the building height regulations in the Coastal LUDC to allow for additional height for well designed structures in the Central Business District that do not obstruct scenic views and which are compatible with existing development on adjoining properties.

Policy CD-3.4 Parking: Improve the availability of public parking facilities in the Central Business District and other commercial areas.

Program CD-3.4.1: Implement the recommendations of the Downtown Parking Study to provide better signage for off-street parking facilities and to increase the availability of on-street parking spaces by changing the time limits.

Program CD-3.4.2: Implement shared parking agreements wherever feasible. Utilize, as appropriate, development agreements, conditions of approval, easements, and other means to assure shared parking arrangements.

Program CD-3.4.3: Consider reduced and/or flexible parking requirements in the Coastal LUDC for mixed use developments.

Program CD-3.4.4: Consider establishing a parking assessment district for the Central Business District to help finance the acquisition of property for additional off-street parking lots.

Program CD-3.4.5: Periodically update the Central Business District parking in-lieu fee program to ensure that it presents a fair and equitable alternative to the provision of on-site parking.

Policy CD-3.5 Strengthen the Distinctive Identity of the Central Business District: Strengthen the distinctive identity and unique sense of place of the Central Business District.

Program CD-3.5.1: Consider establishing a sign program for the Central Business District, with distinctive signs at the entryways to and within the Central Business District.

Program CD-3.5.2: Consider installing street lighting in the Central Business District which reflects the historic character of the area, for example, cast-iron standards, lower-intensity, warm light fixtures, and spot lighting for key historical buildings.

Program CD-3.5.3: Locate an area where a pocket park or a small plaza could be established for public gatherings, street fairs, concerts, and similar outdoor public events.

Goal CD-4 Create attractive entryways to the City.

Policy CD-4.1 Entryways: Clearly define the points of entry to the City through the use of distinctive signs, lighting, and landscaping.

Program CD-4.1: Maintain, distinctive signs placed in a landscaped area at the south entryway at Highway 20/Highway One and at the north entryway on Highway One at the City Limits.

Oceanfront Park and entrance to Noyo Harbor

Goal CD-5 Improve the appearance and effectiveness of parking facilities.

Policy CD-5.1 Parking Location: Wherever feasible, locate parking facilities to the rear of the development so that the building facade is contiguous with the street frontage, and parking areas are hidden from the street.

Program CD-5.1.1: Consider adopting the following standards for parking facilities:

- a) establish standards for shade tree planting;
- b) establish an appropriately-scaled landscaped perimeter around parking areas;
- c) provide bicycle and motorcycle parking in all new parking facilities that include more than ten spaces.

Goal CD-6 Use lighting to create a sense of security and to provide cohesion to the physical structure of the community.

Policy CD-6.1: Security: Establish standards to ensure that on-site lighting is adequate to provide security while not producing excessive glare.

Policy CD-6.2: Lighting Design Guidelines: Apply lighting design guidelines contained in the Citywide Design Guidelines.

Goal CD-7 Preserve cultural and historic resources.

Policy CD-7.1 Protect and Preserve Buildings and Sites with Historic and Cultural Significance to the Community.

Trestle at Pudding Creek: A historically significant structure at MacKerricher State Park

Program CD-7.1.1: Update the Historic Building Inventory to include a wider and more comprehensive list of culturally and historically significant sites and buildings. Encourage property owners to list their buildings in the Historic Building Inventory.

Program CD-7.1.2: Consider approval of building permits using the State Historic Building Code, as appropriate.

Program CD-7.1.3: Include regulations in the Coastal LUDC which define historic resources, historic structure, and building styles and which establish procedures to evaluate, protect, and preserve sites, buildings, structures, districts, and objects that reflect significant elements of Fort Bragg's cultural, social, economic, and architectural heritage.

Program CD-7.1.4: Establish incentives for the preservation and restoration of historic buildings and sites. Consider the following incentives: low interest loans for rehabilitation consistent with the original character of historic buildings, tax incentives for the preservation of historic structures, including the use of Mills Act preservation

contracts, and awards or grants for the preservation and protection of historic buildings and those with cultural significance.

Program CD-7.1.5: Consider adopting an “Affirmative Maintenance” ordinance for buildings in commercial land use designations.

Program CD-7.1.6: Establish a procedure whereby property owners may initiate a program for preservation of historic structures within their neighborhood.

Policy CD-7.2 Discourage Demolitions: Discourage the demolition of historic buildings.

Program CD-7.2.1: Require archival research be carried out determining the cultural and historic significance of buildings proposed for demolition, paid for by the project proponent.

Program CD-7.2.2: Revise the City’s Coastal Land Use & Development Code to require the preparation of drawings and/or photographic records and the salvaging or preservation of architectural fixtures of historic structures that are demolished.

Policy CD-7.3 Public Awareness: Increase public awareness and appreciation of the City’s cultural and historic resources.

Program CD-7.3.1: Work with the Fort Bragg-Mendocino Coast Historical Society to increase public awareness concerning the importance of historic preservation and the location of significant and protected structures in the City.

Program CD-7.3.2: Prepare a public information package describing available programs for property owners to restore and rehabilitate historic structures, including information on tax incentives.

Program CD-7.3.3: Support the activities of the Fort Bragg-Mendocino Coast Historical Society.

Guest House Museum, Main Street

The Skunk Train Circa 1940

Goal CD-8 Support Public Art and Open Space.

Policy CD-8.1 Public Art: Encourage the provision of murals, fountains, sculptures, and other forms of public art in public spaces and parks.

Program CD-8.1.1: Consider adopting a One-Percent for Art Program which would require one percent of the cost of construction of new public buildings and facilities to be allocated for public art.

Program CD-8.1.2: Consider implementing an ongoing outdoor sculpture exhibit adjacent to City Hall and/or in other locations, with an emphasis on supporting and showcasing local artists and reflecting the cultural life of the community.

Policy CD-8.2 Provide Public Open Spaces: Encourage the development of public open spaces for gatherings and fairs in commercial areas of the City.

Program CD-8.2.1: Consider the purchase of appropriate locations for public open space and the enhancement of existing public spaces to accommodate community gatherings.

Program CD-8.2.2: Encourage the inclusion of public open spaces in new commercial development that is sufficiently large to accommodate such uses.

7. SAFETY ELEMENT

A. Purpose

The Safety Element, pursuant to Government Code Section 65302(g), deals with the protection of the community from unreasonable risks associated with the effects of earthquakes, landslides, slope instability, subsidence, other geologic hazards, flood, and fire. Maps identifying earthquake hazards, unstable soil hazards, landslide hazards, and flood zones are included in this element.

The geology, topography, soils, hydrology, and fire risk of Fort Bragg pose numerous constraints on future development. This element guides land use planning and policy decisions in order to achieve an acceptable level of public protection.

B. Seismic Safety and Geologic Hazards

There are no active earthquake faults in the City. However, the San Andreas fault is located approximately 9 miles to the west, and the Maacama fault is 22 miles to the east. Major earthquakes can occur on these faults. Seismic activities can cause major disruptions of the City's transportation and emergency services network. Should the Pudding Creek, Noyo River, and/or Hare Creek Bridges become unusable following a seismic event, people may not be able to evacuate, and emergency access would be blocked. Potential hazards associated with earthquakes include: rupture of the ground surface by displacement along faults, shaking of the ground caused by the passage of seismic waves through the earth, ground failure induced by shaking, such as landslides, liquefaction and subsidence of unstable ground, and tsunamis.

Non-seismic geologic hazards include the presence of unstable soils on steep slopes and expansive soils which, in the presence of moisture, will swell and shrink when returning to a dry condition. Map SF-1: Geologic Hazards identifies areas of potential landslides.

C. Flooding

Portions of the City have areas subject to potential flooding during severe storms. Because of the generally flat terrain in the Fort Bragg area, a 100-year storm could exceed the ability of the City's infrastructure to move runoff water from the City to outfalls into natural drainageways and the ocean. This drainage overload may result in standing water in low areas. High tides and severe storms may also cause flooding in low-lying areas near creeks and drainages.

Map SF-2: Flood Hazards shows areas within the 100-year floodplain. Within floodplains established by the Federal Emergency Management Agency (FEMA), property owners may be required to obtain flood insurance as a condition of mortgage approval. The areas subject to flooding are shown on maps called the Flood Insurance Rate Maps (FIRM) that are prepared by FEMA. The City participates in the FEMA flood insurance program, which allows property owners to obtain subsidized insurance rates.

FEMA also requires the City to establish development standards for construction in the 100-year floodplain. Typically the standards developed by a city or county can range from limits on the intensity of development to requirements to raise the "habitable floor" of the structure to at least one foot above the 100-year flood peak elevation. The majority of the City is situated in "Zone X" which is above both the 100-year and the 500-year floodplains.

D. Fire Protection

In 1991, the City of Fort Bragg and the Fort Bragg Rural Fire District entered into an agreement creating the Fort Bragg Fire Protection Authority. The Authority has primary fire protection responsibility within the City limits and/or developed lands within the District (the District includes all of the City's Sphere of Influence). In addition to normal fire calls, the Fort Bragg Fire Protection Authority has increasingly been called to assist with accidents, hazardous material spills, medical calls, and to provide personnel and equipment for large wildfires outside of the area. The California Department of Forestry and Fire Protection (CDFFP) has responsibility for wildland fires within the Planning Area. The Draft EIR presents a complete description of staffing, response time, calls for assistance, and other factors related to the Fire Protection Authority. The primary constraints or issues involving the Fire Protection Authority concern adequate staffing, adequate equipment, and adequate fireflow to structures.

E. Police Protection

Within the City, the Fort Bragg Police Department has primary responsibility for police response. The constraint to providing adequate police response involves the need to ensure that the City hires sufficient staff to meet the response needs of both the existing and future population.

F. Emergency Preparedness

California State Law requires that all cities and counties adopt an Emergency Plan. The purpose of this plan is to outline policies and procedures with respect to significant events occurring within or threatening the community which would require the deployment of extraordinary resources for the protection of life and property.

The City has an adopted *Emergency Operations Plan*. The purpose of this plan is to ensure that the City will be prepared to respond effectively in the event of emergencies to save lives, restore and protect property, repair and restore essential public services, and provide for the storage and distribution of medical, food, water, shelter sites, and other vital supplies to maintain the continuity of government.

The Mendocino Emergency Services Authority (MESA), a joint powers organization that includes the County of Mendocino and the incorporated cities within the county, serves as the coordinating agency for mutual aid services provided by fire departments, law enforcement agencies, and emergency medical service providers throughout the county. In addition, MESA reviews and makes recommendations regarding emergency operation plans for public and private institutions where pre-planning for emergency procedures is advisable. Coordination of emergency services and planning guidelines is provided for situations including flood, wildland fires, structure fires, explosions, hazardous material spills, severe weather, and earthquakes.

Map SF-1
GEOLOGIC HAZARDS

Map SF-2 Flood Hazards

G. Other Hazards

1. Hazardous Materials

Various types of chemicals and other potentially hazardous materials are used by Fort Bragg industries and businesses. Other hazardous substances are transported to and through Fort Bragg. Finally, residents use various hazardous materials for landscaping, cleaning, and other residential uses. Improper transport, storage, or use of these substances can result in releases to the environment with consequent impacts on human health and the environment.

The Mendocino Solid Waste Management Authority operates a hazmobile that serves the City. The Fire Protection Authority maintains a hazardous materials unit behind the main fire station. This unit is used to respond to hazardous waste spills.

2. Electromagnetic Radiation

The potentially adverse health effects of electromagnetic fields (EMF) from electrical transmission lines, substations, and appliances have been documented in many studies. However, there is no consensus in the scientific community regarding the degree of risk posed by EMFs. It is not known what levels of exposure to EMFs are safe. The approach taken to this potential health hazard is one of prudent avoidance – establishing reasonable regulation before electrical transmission lines are built and discouraging sensitive development from encroaching in or near electrical transmission line rights-of-way.

3. Air Quality

Emissions of pollutants from motor vehicles, industrial uses, and other sources can be injurious to people's health. Policies and programs to protect the City's air quality are included in the Conservation, Open Space, and Parks Element.

H. Goals, Policies, and Programs

The following policies demarcated with the Fort Bragg City seal:  are not part of the certified LCP and do not govern the review and approval of coastal development permits: Policy SF-4.2, Policy SF-5.3, Policy SF-5.4, Policy SF-6.1, Policy SF-6.2, Policy SF-7.1, Policy SF-7.2, Policy SF-9.1, and Policy SF-9.2.

Goal SF-1 Reduce and minimize impacts of development on bluffs and shoreline features.

Policy SF-1.1 Minimize Hazards: New development shall: (a) Minimize risks to life and property in areas of high geologic, flood, and fire hazard; and (b) Assure stability and structural integrity, and neither create nor contribute significantly to erosion, geologic instability, or destruction of the site or surrounding area or in any way require the construction of protective devices that would substantially alter natural landforms along bluffs and cliffs.

Policy SF-1.2: All ocean-front and blufftop development shall be sized, sited and designed to minimize risk from wave run-up, flooding, and beach and bluff erosion hazards, and avoid the need for a shoreline protective structure at any time during the life of the development.

Policy SF-1.3: Geotechnical report required. Applications for development located in or near an area subject to geologic hazards, including but not limited to areas of geologic hazard shown on Map SF-1, shall be required to submit a geologic/soils/geotechnical study that identifies all potential geologic hazards affecting the proposed project site, all necessary mitigation measures, and demonstrates that the project site is suitable for the proposed development and that the development will be safe from geologic hazard. Such study shall be conducted by a licensed Certified Engineering Geologist (CEG) or Geotechnical Engineer (GE) and shall be prepared consistent with the requirements of Section 18.54.040(C) of the Coastal Land Use and Development Code. *Refer to Map SF-1: Geologic Hazards. Refer to the General Plan Glossary for definitions of these terms.*

Policy SF-1.4: Blufftop Setback. All development located on a blufftop shall be setback from the bluff edge a sufficient distance to ensure that it will be stable for a projected 100-year economic life. Stability shall be defined as maintaining a minimum factor of safety against sliding of 1.5 (static) or 1.1 (pseudostatic), as described in Section 18.54.040(F) of the Coastal Land Use and Development Code. This requirement shall apply to the principal structure and accessory or ancillary structures. Slope stability analyses and erosion rate estimates shall be performed by a licensed Certified Engineering Geologist or Geotechnical Engineer.

Policy SF-1.5: Siting and design of new blufftop development and shoreline protective devices shall take into account anticipated future changes in sea level. In particular, an acceleration of the historic rate of sea level rise shall be considered. Development shall be set back a sufficient distance landward and elevated to a sufficient foundation height to eliminate or minimize to the maximum extent feasible hazards associated with anticipated sea level rise over the expected 100-year economic life of the structure.

Policy SF-1.6: Land divisions, including subdivisions, lot splits, lot line adjustments, and conditional certificates of compliance which create new shoreline or blufftop lots, shall not be permitted unless the subdivision can be shown to create lots which can be developed without requiring a current or future bluff or shoreline protection structure. No new lots shall be created that could require shoreline protection or bluff stabilization structures at any time.

Policy SF-1.7 Alterations to Landforms: Minimize, to the maximum feasible extent, alterations to cliffs, bluff tops, faces or bases, and other natural land forms in the Coastal Zone. Permit alteration in landforms only if erosion/runoff is controlled and either there exists no other feasible environmentally superior alternative or where such alterations re-establish natural landforms and drainage patterns that have been eliminated by previous development activities.

Program SF-1.7.1: Establish standards in the Coastal LUDC or Grading Ordinance for the alteration and grading of natural landforms taking into account site characteristics, the resulting habitat disturbance, drainage modification, or erosion and sedimentation resulting from vegetation removal.

Policy SF-1.8 Floodplain Development: Limit new development in floodplains in the Coastal Zone, including but not limited to those floodplain areas shown on Map SF-2, to those uses allowed in the Open Space land use designation consistent with all other applicable requirements of the LCP.

Policy SF-1.9 Bluff Face and Bluff Retreat Setback: Prohibit development on the bluff face and within the bluff retreat setback because of the fragility of this environment and the potential for resultant increase in bluff and beach erosion due to poorly-sited development—except that the following uses may be allowed with a conditional use permit:

- (1) engineered accessways or staircases to beaches, boardwalks, viewing platforms, and trail alignments for public access purposes;
- (2) pipelines to serve coastal dependent industry;
- (3) habitat restoration;
- (4) hazardous materials remediation; and
- (5) landform alterations where such alterations re-establish natural landforms and drainage patterns that have been eliminated by previous development activities.

Findings shall be made that no feasible, less environmentally damaging, alternative is available and that feasible mitigation measures have been provided to minimize all adverse environmental impacts. Require as a part of the conditional use permit, a full environmental, geological, and engineering study as specified in Policy LC-6.1. Such structures shall be constructed and designed so as to neither create nor contribute to erosion of the bluff face and to be visually compatible with the surrounding area to the maximum extent feasible.

Policy SF-1.10 Seawalls, Breakwaters and Other Shoreline Structures: Prohibit construction of seawalls, breakwaters, revetments, groins, harbor channels, retaining walls, and other structures altering the natural shoreline processes unless a finding is made that such structures are required: (1) to serve coastal-dependent uses; or (2) to protect public beaches in danger from erosion; or (3) to protect existing structures that were legally constructed prior to the effective date of the Coastal Act; or (4) that were legally permitted prior to the effective date of this Coastal General Plan provided that the CDP did not contain a waiver of the right to a future shoreline or bluff protection structure; or (5) for a development consistent with Section 30233(a) of the Coastal Act and only when it can be demonstrated that said existing structures are at risk from identified hazards if no feasible or less environmentally damaging alternative is available and the structure has been designed to eliminate or mitigate adverse environmental impacts, including impacts upon local shoreline sand supply. The design and construction of allowed protective structures shall respect natural landforms and provide for lateral beach access.

“Existing structures” for purposes of Policy LC-6.5 shall consist only of a principle structure, e.g. residential dwelling, required garage, or second residential unit, and shall not include accessory or ancillary structures such as decks, patios, stairs, landscaping, etc.

Goal SF-2 Reduce seismic and geologic-related hazards.

Policy SF-2.1 Seismic Hazards: Reduce the risk of loss of life, personal injury, and damage to property resulting from seismic hazards.

Program SF-2.1.1: Continue to comply with the provisions of the State Alquist-Priolo Act.

Program SF-2.1.2: Require measures to mitigate potential seismic hazards for structures as conditions of project approval.

Program SF-2.1.3: Monitor and review existing critical, high priority buildings to ensure structural compliance with seismic safety standards.

Program SF-2.1.4: Provide information to the public on ways to reinforce buildings to reduce damage from earthquakes and what to do in the event of an earthquake.

Program SF-2.1.5: Provide information to educate the public about the availability and the benefits of obtaining earthquake insurance.

Program SF-2.1.6: Encourage residents to consider earthquake insurance for their homes and businesses.

Program SF-2.1.7: Continue to comply with State law regarding reinforcement of unreinforced masonry structures.

Policy SF-2.2: Require professional inspection of foundations and excavations, earthwork, and other geotechnical aspects of site development during construction on those sites specified in soils, geologic, and geotechnical studies as being prone to moderate or high levels of seismic hazard.

Policy SF-2.3: Development on Slopes: Require that development in areas with identified slope stability constraints as shown on Map SF-1 or other areas where City staff determines there is potential slope stability issues be supervised and certified by a geologist, geotechnical engineer, or engineering geologist.

Program SF-2.3.1: Require repair, stabilization, or avoidance of active or potentially active landslides, areas of soil creep, or areas with possible debris flow as a condition of project approval.

Policy SF-2.4 Tsunami: Minimize development in areas subject to tsunami.

Program SF-2.4.1: Request FEMA conduct the necessary studies to accurately map areas within the City that are subject to tsunamis.

Policy SF-2.5: Review development proposals to ensure that new development is not in an area subject to tsunami damage and if such development is otherwise allowable that it is designed to withstand tsunami damage.

Program SF-2.5.1: Review local- and distant-source tsunami inundation maps for Fort Bragg and adjacent coastal communities as they are developed to identify susceptible areas, plan evacuation routes or locations suitable for vertical evacuation and make evacuation plans available to all emergency responders and other appropriate parties.

Program SF-2.5.2: Identify and map potential tsunami inundation zones for land use planning. Maps should identify generalized tsunami inundation zones on a probabilistic basis (e.g., 100-year event).

Program SF-2.5.3: Review and update tsunami preparation response policies/practices to reflect current inundation maps and design standards, and submit these updated policies to the Coastal Commission for certification.

Policy SF-2.6: Avoid siting new critical facilities, including fire and police stations and hospitals in tsunami inundation zones to the maximum extent feasible. If it is necessary to site such facilities in tsunami inundation zones to provide adequate population protection, new critical

facilities shall be located and configured to be functional immediately after a 100-year tsunami event.

Program SF-2.6.1: Develop a local response plan and/or participate in any regional effort to develop and implement workable response plans for distribution of information on tsunami alerts, watches, and warnings, to appropriate emergency responders and City personnel.

Program SF-2.6.2: Include tsunami evacuation route information as part of any overall evacuation route sign program implemented in the City. Evacuation routes shall be clearly posted. An evacuation route traffic monitoring system that provides real-time information on the traffic flow at critical roadways should be considered.

Program SF-2.6.3: Develop and implement a tsunami educational program for residents, visitors, and people who work in the susceptible areas.

Policy SF-2.7: Require that overnight visitor-serving facilities in susceptible areas provide tsunami information and evacuation plans.

Goal SF-3 Reduce the risks from flooding.

Policy SF-3.1 Flood Hazards: Ensure adequate standards for development in the 100-year floodplain. (Refer to Map SF-2: Flood Hazards which shows areas prone to flooding.)

Program SF-3.1.1: Maintain and update as necessary the zoning and building code standards and restrictions for development in identified floodplains and areas subject to inundation by a 100-year flood. Use the Federal Emergency Management Agency's Flood Insurance Rate Map (FIRM) in the review of development proposals.

Program SF-3.1.2: Ensure all development in flood prone areas meet Federal, State, and local requirements.

Policy SF-3.2 Storm Drainage: Continue to maintain effective flood drainage systems and regulate construction to minimize flood hazards.

Program SF-3.2.1: Update the City's Storm Drain Master Plan.

Policy SF-3.3.2: Require, as determined by City staff, analysis of the cumulative effects of development upon runoff, discharge into natural watercourses, and increased volumes and velocities in watercourses and their impacts on downstream properties. Include clear and comprehensive mitigation measures as part of project approvals to ensure that new development does not cause downstream flooding of other properties.

Policy SF-3.4: Require development to pay for the costs of drainage facilities needed to drain project-generated runoff. Develop a City-wide drainage policy to assist staff to identify drainage improvements or impact fees required for development.

Policy SF-3.5: Require, where necessary, the construction of siltation/detention basins to be incorporated into the design of development projects.

Goal SF-4 Ensure emergency preparedness.

Policy SF-4.1 Coordinate with County: Continue coordination with the Mendocino County Emergency Services Authority.

Policy SF-4.2 Maintain an Updated Emergency Plan: Update the City's *Emergency Operations Plan* as needed to take into account the requirements of the California Emergency Management Systems (SEMS).

Program SF-4.2.1: Establish an emergency evacuation route system that includes standards for street identification, street widths, and grade standards for the evacuation route system.

Goal SF-5 Reduce fire hazards.

Policy SF-5.1 Minimize Fire Risk in New Development: Review all development proposals for fire risk and require mitigation measures to reduce the probability of fire.

Program SF-5.1.1: Continue to consult the Fort Bragg Fire Protection Authority in the review of development proposals to identify the projected demand for fire protection services and implement measures to maintain adequate fire protection services. Mitigation measures may include levying fire protection impact fees for capital facilities, if warranted.

Policy SF-5.2 Maintain a High Level of Fire Protection: Work with the Fire Protection Authority to ensure a continued high level of fire protection.

Program SF-5.2.1: Prepare a cost-benefit assessment of using paid firefighters within the Fort Bragg Fire Protection Authority and determine the appropriate ratio of paid-to-volunteer staff.

Program SF-5.2.2: Continue to use the City's Municipal Code to require automatic sprinkler systems in commercial and industrial development.

Program SF-5.2.3: Increase water main sizes or loop existing water mains where necessary to provide adequate flows for fire protection. The standard for water flow for fire protection purposes should be a minimum of 1,000 gallons per minute for 2 hours with 20 pounds per square inch residual pressure.

Program SF-5.2.4: Develop a plan to provide sprinklers for commercial structures in the Central Business District. The plan shall include consideration of City funding to construct risers for this area.

Program SF-5.2.5: Work with the Fort Bragg Fire Protection Authority to establish a regular schedule for periodic inspections of commercial and industrial premises by the Fire Prevention Officer.

Policy SF-5.3 Mutual Aid Agreements: Continue to maintain mutual aid agreements.

Program SF-5.3.1: Coordinate equipment use and purchase and inter-agency communications.

Program SF-5.3.2: Continue to coordinate with the Incident Command System (ICS) of Mendocino County.

Policy SF-5.4 Fire Protection Authority Needs: Anticipate the needs of the Fort Bragg Fire Protection Authority.

Program SF-5.4.1: Work with the Fort Bragg Fire Protection Authority to review its long-term fire plan on an annual basis to identify needed capital equipment and staff.

Policy SF-5.5 Vegetation Management: Continue to implement an effective and environmentally sound vegetation management and weed abatement program.

Program SF-5.5.1: Require a landscaping zone system for defensible space around buildings in high fire risk areas.

Program SF-5.5.2: Continue to require weed abatement to reduce the risk of fire. Use mechanical rather than chemical methods wherever possible.

Goal SF-6 Maintain effective police services.

Policy SF-6.1 Demand for Police Services: Review development proposals for their demand for police services and implement measures to maintain adequate police services.

Program SF-6.1.1: Consider the impacts on the level of police services of large development proposals in the environmental review and planning process.¹

Policy SF-6.2 Shared Resources: Utilize shared resources to improve police response.

Program SF-6.2.1: Periodically review shared use of resources such as communication facilities and joint use of personnel where feasible with the County Sheriff's Department.

Goal SF-7 Maintain an effective medical emergency response system.

Policy SF-7.1 Emergency Medical Response: Ensure that the Fire Protection Authority and the Mendocino Coast District Hospital continue to maintain a high level of emergency medical response.

Program SF-7.1.1: Periodically review the emergency medical response system.

¹ If warranted, mitigation measures may be required that may include the levying of police impact fees for capital facilities, purchasing equipment, and dedication of land for new facilities.

Policy SF-7.2 Maintain Mendocino Coast District Hospital's Emergency Facilities: Continue to encourage the Mendocino Coast District Hospital to maintain its emergency department and acute care facilities.

Program SF-7.2.1: Maintain ongoing communication with Mendocino Coast District Hospital to identify actions the City can implement to support the Hospital's Emergency Department.

Goal SF-8 Reduce hazards of transportation, storage, and disposal of hazardous materials and wastes.

Policy SF-8.1 Protection from Hazardous Waste and Materials: Provide measures to protect the public health from the hazards associated with the transportation, storage, and disposal of hazardous wastes (TSD Facilities).

Program SF-8.1.1: Continue to ensure that use, transportation, and disposal of hazardous materials are in accordance with the local, State, and Federal safety standards.²

Program SF-8.1.2: Continue to support and participate in Mendocino County's Hazardous Materials Business Plan which requires all businesses using hazardous materials to list the types, quantities, and locations of hazardous materials with the County's Department of Environmental Health.³

Program SF-8.1.3: Require, as a condition of City approvals of non-residential projects, that the Fire Protection Authority be notified of all hazardous substances that are transported, stored, treated, or could be released accidentally into the environment.

Program SF-8.1.4: Require that applications for discretionary development projects that will generate hazardous waste or utilize hazardous materials include detailed information on hazardous waste reduction, recycling, transportation, and storage, and prepare a plan for emergency response to a release or threatened release of a hazardous material.

Program SF-8.1.5: Revise the Coastal LUDC to require secondary containment facilities and a buffer zone adequate to protect public health and safety on properties with hazardous materials storage and/or processing activities.

Policy SF-8.2 Support Environmental Review of Hazardous Waste Transportation, Storage and Disposal Facilities: Support a thorough environmental review for Hazardous Waste Transportation, Storage and Disposal (TSD) Facilities, including waste to energy projects, proposed in the Fort Bragg area.

² Implementation of this program is the responsibility of the Fire Protection Authority

³ Chapter 6.95 of the California Health and Safety Code requires businesses with more than 50 gallons, 500 pounds or 200 cubic feet of hazardous materials to maintain a current Hazardous Materials Business Plan (HMBP). The law provides for the collection of fees to fund the program.

Program SF-8.2.1: Require that the environmental review of proposed Hazardous Waste TSD Facilities shall, at a minimum, contain the following analysis and information:

- a) A worst-case generic description, estimating the number, type, scale, scope, location, and operating characteristics of proposed TSD Facility(ies) based on the projected volumes and types of hazardous waste. Data from existing facilities regarding the probability of accidents, spills, and explosions should be documented and included;
- b) An assessment of risk resulting from the accidental release, fire, and explosion of hazardous waste. This assessment should take into account all phases of operation including transport, storage, and treatment. The assessment of risk should include the probability of occurrence and magnitude of impact;
- c) Quantify estimates of air emissions, by applying emissions rates of existing facilities to the future volumes of hazardous waste and identifying emissions for incinerator facilities under worst case circumstances;
- d) An assessment of non-incineration alternatives for hazardous waste treatment such as chemical dechlorination for the detoxification of PCBs, dioxins, solvents, and pesticides; photolysis; and biological treatment; and
- e) Review of the operating characteristics of proposed TSD Facilities, taking into account maintenance and operating procedures, emissions monitoring, and safety devices to assure the ongoing enforceability of the mitigating measures that are required.

Goal SF-9 Minimize community exposure to electromagnetic fields (EMFs).

Policy SF-9.1 Consider EMFs in Land Use Decisions: Consider information regarding EMF radiation from existing and new electrical transmission lines and substations in making land use decisions.

Program SF-9.1.1: Request that PG&E or other electrical energy distributors provide information on renovation to existing and proposed new electrical transmission lines and substations. Request that information on the EMF radiation levels for proposed new facilities be provided.

Program SF-9.1.2: Request that PG&E or any other electrical energy distributor provide a full and public disclosure of existing electrical transmission lines and existing and proposed facilities with their anticipated EMF levels within the Fort Bragg Planning Area.

Program SF-9.1.3: Require that all new electrical transmission projects and facilities have an EMF mitigation plan as part of the project's environmental review.

Policy SF-9.2 Siting of Schools and Other Sensitive Uses: Minimize and reduce EMF radiation levels near sensitive uses such as schools, hospitals, and playgrounds.

Program SF-9.2.1: Work with the School District to continue enforcement of California State Board of Education regulations requiring that new schools be sited at least 100 feet from the edge of the right-of-way of 100-110 kV lines; 150 feet from 220-230 kV lines; and 250 feet away from 345 kV lines.

8. NOISE ELEMENT

The policies of the Noise Element are not part of the City of Fort Bragg certified Local Coastal Program and do not govern the review and approval of coastal development permits.

A. Purpose

The purpose of the Noise Element is to protect the health and welfare of the community by promoting development which is compatible with established noise standards. This element has been prepared in conformance with Government Code Section 65302(f) and the guidelines adopted by the State Office of Noise Control, pursuant to Health and Safety Code Section 46050.1. Existing and future noise problems in the Planning Area are identified. Policies and implementation programs are provided to reduce the community's exposure to excessive noise levels. Accomplishing this task requires an evaluation of the noise generation from sources such as roads, highways, and stationary sources such as industrial facilities.

B. Noise Characteristics

Noise is defined as unwanted sound. Airborne sound is a rapid fluctuation of air pressure above and below atmospheric pressure. Sound levels are usually measured and expressed in decibels (dB) with 0 dB corresponding roughly to the threshold of hearing. Decibels and other technical terms are defined in Table N-1.

Most of the sounds which we hear in the environment do not consist of a single frequency, but rather a broad band of frequencies, with each frequency differing in sound level. The intensities of each frequency add together to generate a sound. The method commonly used to quantify environmental sounds consists of evaluating all of the frequencies of a sound in accordance with a weighting that reflects the fact that human hearing is less sensitive at low frequencies and extreme high frequencies than in the mid-range frequency. This method is called weighting, and the decibel level so measured is called the A-weighted sound level (dBA). In practice, the level of a sound source is conveniently measured using a sound level meter that includes an electrical filter corresponding to the A-weighting curve.

Although the A-weighted noise level may adequately indicate the level of environmental noise at any instant in time, community noise levels vary continuously. Most environmental noise includes a conglomeration of noise from distant sources which create a relatively steady background noise, often called ambient noise, in which no particular source is identifiable. To describe the time-varying character of environmental noise, the statistical noise descriptors, L_{10} , L_{50} , and L_{90} , are commonly used. They are the A-weighted noise levels equaled or exceeded during 10 percent, 50 percent, and 90 percent of a stated time period. A single number descriptor called the L_{eq} is now also widely used. The L_{eq} is the average A-weighted noise level during a stated period of time.

In determining the daily level of environmental noise, it is important to account for the difference in response of people to daytime and nighttime noises. During the nighttime, exterior background noises are generally lower than the daytime levels. However, most household noise also decreases at night and exterior noise becomes very noticeable. Further, sensitivity to noise increases when

people sleep at night. To account for human sensitivity to nighttime noise levels, a descriptor, the L_{dn} (day/night average sound level) was developed. The L_{dn} divides the 24-hour day into the daytime of 7:00 AM to 10:00 PM and the nighttime of 10:00 PM to 7:00 AM. The nighttime noise level is weighted 10 dB higher than the daytime noise level.

TABLE N-1
DEFINITION OF ACOUSTICAL TERMS

Term	Definition
Decibel (dB)	A unit describing the amplitude of sound, equal to 20 times the logarithm to the base 10 of the ratio of the pressure of the sound measured to the reference pressure, which is 20 micropascals (20 micronewtons per square meter).
Frequency (Hz)	The number of complete pressure fluctuations per second above and below the atmospheric pressure.
A-Weighed Sound Level (dBA)	The sound pressure level in decibels as measured on a sound level meter using the A-weighting filter network. The A-weighting filter de-emphasizes the very low and very high frequency components of the sound in a manner similar to the frequency response of the human ear and correlates well with subjective reactions to noise.
L_{01} , L_{10} , L_{50} , L_{90}	The A-weighted noise levels that are exceeded by 1%, 10%, 50% and 90% of the time during the measurement period.
Equivalent Noise Level (L_{eq})	The average A-weighted noise level during the measurement period.
L_{dn}	The average A-weighted noise level during a 24-hour day, obtained after addition of 10 decibels to levels measured in the night between 10:00 PM and 7:00 AM.
L_{max} , L_{min}	The maximum and minimum A-weighted noise level during the measurement period.
Ambient Noise Level	The composite of noise from all sources near and far. The normal or existing level of environmental noise at a given location.
Intrusive	That noise which intrudes over and above the existing ambient noise at a given location. The relative intrusiveness of a sound depends upon its amplitude, duration, frequency, and time of occurrence and tonal or informational content as well as the prevailing ambient noise level.

C. The Existing and Future Noise Environment

Fort Bragg experiences noise from autos and trucks on Highway One, Highway 20, local arterials, the railroad, and several industrial uses, including the Georgia-Pacific operations and the Baxman aggregate processing facility. Existing and year 2011 traffic noise (L_{dn}) contour distances from major thoroughfares are shown on Tables N-2 and N-3.

**TABLE N-2
EXISTING TRAFFIC NOISE (L_{dn}) CONTOUR DISTANCES**

Roadway	Noise Level 50 ft. from Centerline (L_{dn})	Contour Distances (in feet from Centerline)		
		70 L_{dn}	65 L_{dn}	60 L_{dn}
Hwy. One (Ocean View Drive to Hwy. 20)	72	65	140	305

Source: Illingworth & Rodkin, Inc., February, 2002

Noise from traffic on local roadways, distant industrial activities, and neighborhood activities are the most significant sources of community noise in the majority of the City.

Noise from industrial uses was audible during the evening and nighttime hours at most noise sites that were monitored. Background noise levels in the areas of Fort Bragg which generally contain noise sensitive land uses would be considered to be moderately quiet and compatible with the City's noise exposure standards.

The principal areas that are affected by excessive noise are along both sides on Highway One throughout the City (ranging from 160-350 feet on either side of the highway) and along Franklin Street and several east-west arterials (ranging from 35-70 feet from the road edge). See the Draft EIR for a more detailed discussion of the existing and projected noise environment in the City.

D. Noise and Land Use Compatibility Standards

The standards listed in Table N-4 shall be used to evaluate the compatibility between land uses and future noise in Fort Bragg.

TABLE N-4
NOISE AND LAND USE COMPATIBILITY STANDARDS

Land Use Category	Exterior Noise Exposure L _{dn} dB					
	55	60	65	70	75	80
Residential, Hotels and Motels						
Outdoor Sports and Recreation, Neighborhood Parks and Playgrounds						
"Noise Sensitive" - Schools, Libraries, Museums, Hospitals, Personal Care, Meeting Halls, Churches						
Office Buildings, Business Commercial and Professional						
Auditoriums, Concert Halls, Amphitheaters						

Normally Acceptable

Specified land use is satisfactory, based upon the assumption that any buildings involved are of normal, conventional construction, without any special insulation requirements.

Conditionally Acceptable

Specified land use may be permitted only after a detailed analysis of the noise reduction requirements and needed noise insulation features included in the design.

Unacceptable

New construction or development should generally not be undertaken because mitigation is usually not feasible to comply with noise element policies.

Source: Illingworth & Rodkin, Inc., March, 2002

E. Explanation of Table N-4: Land Use Compatibility for Community Noise

1. Noise Source Characteristics

Table N-4 shows the ranges of exterior noise exposure which are considered acceptable, conditionally acceptable, or unacceptable for the specified land use. Table N-4 is used to determine whether the noise exposure requires mitigation in order to achieve a compatible noise environment.

Where the noise exposure is acceptable for the intended land use, new development may occur without requiring an evaluation of the noise environment.

Where the noise exposure would be conditionally acceptable, a specified land use may be permitted only after a detailed analysis is made of the noise impacts, and the needed noise insulation features are included in the design to protect people from exposure to excessive noise. Such noise insulation features may include measures to protect noise sensitive outdoor activity areas (e.g. at residences, schools, or parks) or may include building sound insulation treatments such as sound-rated windows to protect interior spaces in residences, schools, hospitals, or other buildings which are sensitive to noise. Noise reduction measures should be focused on reducing noise where it would have an adverse effect for the specified land use, outdoors and/or indoors depending upon the land use.

For areas where the existing noise environment is unacceptable, new development should generally not be undertaken, because there may not be sufficient noise reduction measures to bring the development into compliance with the noise policies of this Element.

Sensitive receptors are land uses which are sensitive to noise such as hospitals, convalescent homes, schools, and libraries.

2. Acceptable Noise Environments

Another consideration, which in some communities is an overriding factor, is the desire for an acceptable outdoor noise environment. When this is the case, more restrictive standards for land use compatibility, typically below the maximum considered normally acceptable for that land use category, may be appropriate.

The following are the Noise and Land Use Compatibility Standards for noise exposure:

1. The standard for maximum outdoor noise level permitted in residential areas is a L_{dn} of 60 dB. This standard is applied where outdoor use is a major consideration, such as backyards in single-family housing developments and recreation areas in multi-family developments. This standard should not be applied to outdoor areas such as small decks and balconies typically associated with multi-family residential developments, which can have a higher exposure of 65 dB L_{dn} .
2. The maximum acceptable interior noise level in new multi-family residential development required by the State of California Noise Insulation Standards is a L_{dn} of 45 dB. This standard is also applied to single-family and all other residential development.
3. For projects occurring within noise environments that are conditionally acceptable, studies must be conducted to show how noise levels will be reduced in the areas that people use (which is generally the interior of offices, stores, industrial buildings, auditoriums, etc.). For

Map N-1 Sensitive Noise Receptors

non-residential projects, no maximum outdoor standard is established other than the exterior environment cannot exceed the lower limit of the unacceptable range, since noise mitigation is not feasible at these noise exposure levels. Building construction will incorporate noise reduction measures recommended by an acoustic engineer to reduce interior noise levels to an acceptable level. For non-residential projects, the interior noise level is what is important. The conditionally acceptable noise levels indicate that interior noise levels can be reduced to an acceptable level given noise reduction implementation. Non-residential projects may be allowed even if the exterior noise environment is within the conditionally acceptable range. No standards are established for industrial uses since the exterior noise environment is not important for such uses.

- 4 Sensitive receptors are land uses that are sensitive to noise such as hospitals, convalescent homes, schools, and libraries. Exterior noise levels for these types of uses where the uses include outdoor use locations (e.g., such as schools) should not exceed those allowed as normally acceptable in Table N-4. For those uses where the use areas are within buildings (e.g., hospitals, halls, and churches), interior noise levels should be reduced as described under No. 3 above, but projects can be permitted with exterior noise levels within the conditionally acceptable range. Map N-1: Noise Sensitive Receptors shows the location of some noise sensitive uses in the City.
5. These standards are not intended to be applied reciprocally. In other words, if an area is currently below the desired noise standard, a project that causes an increase in noise up to the maximum should not necessarily be permitted. The impact of a proposed project on existing land use should be evaluated in terms of the potential for adverse community response, based on existing community noise levels, regardless of the compatibility standards.
6. The Noise and Land Use Compatibility Standards should be reviewed in relation to the specific source of noise. These standards are based on measurement systems which average noise over a 24-hour period and do not take into account single-event noise sources. Different noise sources yielding the same composite noise exposure do not necessarily create the same environment. Additional standards may be applied on a case-by-case basis where supported by acoustical analysis to assess the effects of single-event noise sources.

F. Goals, Policies and Programs

The policies of the Noise Element are not part of the City of Fort Bragg certified Local Coastal Program and do not govern the review and approval of coastal development permits.

Goal N-1 Protect City residents from harmful and annoying effects of exposure to excessive noise.

Policy N-1.1 General Noise Levels: The maximum allowable noise levels are established in this Element.

Policy N-1.2 Reduce Noise Impacts: Avoid or reduce noise impacts first through site planning and project design. Barriers and structural changes may be used as mitigation techniques only when planning and design prove insufficient.

Program N-1.2.1: Adopt and use a Noise Ordinance in environmental review of all development proposals and incorporate project design measures to reduce noise to allowable limits. The Noise Ordinance should include the noise standards described in this Element as well as consider other noise concerns, including but not limited to, allowable hours for grading and construction, allowable noise levels for electronic sound devices (e.g., radios, stereos, etc.), time restrictions on the use of mechanical devices (e.g., leafblowers and other power equipment), and requirements for the placement of fixed equipment (e.g., air conditioners and condensers).

Program N-1.2.2: Consider requiring an acoustical study and mitigation measures for projects that would cause a “substantial increase” in noise as defined by the following criteria or would generate unusual noise which could cause significant adverse community response:

- a) cause the L_{dn} in existing residential areas to increase by 3 dB or more;
- b) cause the L_{dn} in existing residential areas to increase by 2 dB or more if the L_{dn} would exceed 70 dB; or
- c) cause the L_{dn} resulting exclusively from project-generated traffic to exceed an L_{dn} of 60 dB at any existing residence.

Program N-1.2.3: Consider requiring an acoustical study and mitigation measures for proposed projects that City staff finds may generate unusual noise that would cause significant adverse community response, such as, but not limited to, night-time, single-event noise or recurring impulse noise.

Policy N-1.3 Noise and Land Use Compatibility Standards: Ensure that all new noise sensitive development proposals be reviewed with respect to Table N-4: Noise and Land Use Compatibility Standards. Noise exposure shall be determined through actual on-site noise measurements.

Policy N-1.4 Residential and Noise Sensitive Land Use Standards: Require a standard of 45 L_{dn} for indoor noise level for all new residential development including hotels and motels, and a standard of 60 L_{dn} for outdoor noise at residences. These limits shall be reduced by 5 dB for senior housing and residential care facilities.

Program N-1.4.1: Use the standards in Policy N-1.2.2 to determine the need for noise studies and require new developments to provide noise attenuation features as a condition of approving new projects.

Program N-1.4.2: Require an acoustical study for all new residential projects with a future L_{dn} noise exposure of 60 L_{dn} or greater. The study shall describe how the project will comply with the Noise and Land Use Compatibility Standards. The studies shall also satisfy the requirements set forth in Title 24, part 2 of the California Code of Regulations, Noise Insulation Standards, for multi-family attached dwellings, hotels, motels, etc. regulated by Title 24.

Policy N-1.5 Non-Transportation Noise Generation: For new non-transportation noise generators, Table N-5 describes the maximum noise level at the nearest residential property line:

TABLE N-5
NOISE LEVEL PERFORMANCE STANDARDS FOR NEW PROJECTS AFFECTED BY OR INCLUDING
NON-TRANSPORTATION NOISE SOURCES

Noise Level Descriptor	Daytime (7 A.M. to 10 P.M.)	Nighttime (10 P.M. to 7 A.M.)
Hourly Leq dB	55	45
Maximum level, dB	75	65

Note: These noise levels apply to the residential property line nearest the project. Each of the noise levels shall be lowered by five dB for simple tone noises, noises consisting primarily of speech or music, or for recurring impulsive noises. These noise level standards do not apply to residential units established in conjunction with industrial or commercial uses (e.g., caretaker dwellings).

 **Policy N-1.6** Mitigate Noise Impacts: Mitigate noise impacts to the maximum feasible extent.

Program N-1.6.1: Require acoustical studies and noise reduction measures, when warranted, for new developments and roadway improvements which affect noise sensitive uses such as residences, schools, hospitals, libraries, and convalescent homes.

Program N-1.6.2: Require acoustical studies and noise reduction measures for any project that would potentially generate non-transportation noise levels in a residential area such that noise levels would exceed the planning standards set forth in Program N-1.2.2 and/or Table N-5.

Program N-1.6.3: Work with Caltrans to ensure that adequate noise studies are prepared and alternative noise mitigation measures are considered when State and Federal funds are available.

Program N-1.6.4: Consider and carefully evaluate the noise impacts of all street, highway, and other transportation projects.

Program N-1.6.5: Recommend acoustical studies and noise reduction measures for all projects that would be exposed to noise levels in excess of those deemed normally acceptable, as defined in Table N-4.

Program N-1.6.6: Consider developing an ordinance that regulates the allowable hours of construction activities.

Program N-1.6.7: Consider requiring post-construction testing and sign-off by an acoustical engineer for residential projects exposed to an L_{dn} in excess of 65 dB to ensure compliance with applicable exterior and interior standards in the Noise and Land Use Compatibility Standards.

Program N-1.6.8: Restrict truck traffic to designated routes.

9. HOUSING ELEMENT

A. Purpose

The Housing Element is a statement of Fort Bragg's vision regarding existing and future housing needs. The City's Housing Element was originally adopted by the City Council in 1993 and was certified by the State Department of Housing and Community Development (HCD). This revised Housing Element consists of two sections. Section I contains the goals, policies and implementation programs. Section II contains an analysis of the housing needs of all economic segments of the community. The goals and policies are based on needs identified in Section II.

An essential goal of the Fort Bragg Housing Element is to achieve an adequate supply of safe, decent housing for all residents of Fort Bragg. In order to achieve this goal, the policies and programs of the Housing Element address several major issues:

- Maintaining and preserving the existing housing stock;
- Retaining the character of Fort Bragg's residential neighborhoods;
- Meeting the City's regional housing needs allocations; and
- Providing additional affordable housing, particularly for senior citizens.

The City has a commitment to Fort Bragg residents to maintain the identity and quality of the residential neighborhoods. At the same time, the City also recognizes that it should meet its share of regional housing needs. The Housing Element articulates Fort Bragg's housing goals and establishes policies and programs to guide decision-makers to meet the community's housing needs.

B. Relationship of the Housing Element to the General Plan

Consistency of the Housing Element with the other elements of the Coastal General Plan is essential to having a complete and legally adequate General Plan. This updated Housing Element has been prepared in conjunction with a comprehensive revision of the City's Coastal General Plan.

The Housing Element is one of seven required general plan elements and is an integral part of the Coastal General Plan. Since the majority of Fort Bragg's land is developed with housing, the Housing Element is a key component of the City's future plans.

State law provides direction on how cities can maintain the General Plan as a policy guide by requiring the Community Development Department to report annually to the City Council on "the status of the plan and progress in its implementation" (Government Code Section 65400 [b]). State law further provides that the housing element shall be revised periodically.

The analysis section of the Housing Element takes a 10-year perspective, whereas the policies and programs are based on a five-year time frame. In this fashion, a review of actual results of the previous housing goals, policies and programs can be developed by the City every five years.

C. Summary of Findings

Listed below are several principal findings from Section II: Housing Background of this Element:

- Assuming a two percent growth rate, the 2000 population of 7,026 residents will increase to approximately 8,563 residents in 2010 in the City.
- The average household size in Fort Bragg is 2.38 persons per household. This is smaller than the Countywide average of 2.57 persons per household and the Statewide average of 2.81 persons per household. This reflects the substantial number of elderly residents in the City and the aging population.
- The median household income in Mendocino County was \$41,500.00 in 2002.
- Approximately 29 percent of Fort Bragg's households are very-low income and approximately 14 percent are low income.
- Groups with special housing needs include elderly residents, physically and/or mentally disabled persons, and single-parent households.
- In the past 12 years (1995-2007), a total of 303 dwelling units were constructed in the City. Based on the regional housing needs allocation of 452 units identified in the 1993 Housing Element, there remains an unmet housing need for 70 very-low income, 40 low-income, and 72 moderate-income units.
- The existing housing stock in Fort Bragg includes 1,886 single-family residences; 811 multiple family units; and 138 mobile homes.
- The City of Fort Bragg contains approximately 103.75 acres of residentially zoned vacant land and a number of mixed use, infill parcels located in commercially zoned areas, which could accommodate a maximum of 1,192 more dwelling units.

D. Format and Organization of the Housing Element

The format of the goals and policies of the Housing Element differs from the rest of the General Plan, in large measure to meet the requirements of State Housing Law.

For every goal there are several policies – each with one or more implementation programs that contain the following information:

- A concise statement of the specific City actions that will be taken to implement the program;
- The City department or other agency responsible for implementation; and
- The schedule for completion.

Quantified objectives are summarized in Appendix A of the Housing Element.

E. Goals, Policies, and Programs

1. Housing Goals

The following policies demarcated with the Fort Bragg City seal:  are not part of the certified LCP and do not govern the review and approval of coastal development permits: Policy H-1.1, Policy H-2.3, Policy H-2.8, Policy H-3.1, Policy H-3.3, Policy H-3.7, Policy H-3.9, Policy H-3.10, Policy H-3.11, Policy H-4.1, Policy H-4.2, Policy H-5.1, and Policy H-5.2.

Goal H-1 **Conserve and improve the existing housing supply to provide adequate, safe, and decent housing for all Fort Bragg residents.**

 **Policy H-1.1** Housing Rehabilitation: Continue and expand the City's housing rehabilitation and preservation programs.

Program H-1.1.1 Funding Housing Rehabilitation: Seek funding through the Community Development Block Grant program and other State and/or Federal programs to assist in the rehabilitation and conservation of existing residential units.

Responsibility: Community Development Department
Financing: City
Scheduling: Annually as an ongoing program

Program H-1.1.2 Target Areas: Continue to identify target areas and specific properties where housing rehabilitation is most needed.

Responsibility: Community Development Department
Financing: City
Scheduling: Annually as an ongoing program

Program H-1.1.3 Rehabilitation/Preservation Program: Continue the City's housing rehabilitation program which provides low interest loans for the rehabilitation of homes owned or occupied by very-low to moderate-income households. Facilitate citizen awareness of this rehabilitation loan program by a) making pamphlets on this program available at City Hall and at the public library, b) contacting neighborhood groups in older residential areas with this information, and c) continuing building code enforcement in cooperation with the Building Department.

Responsibility: Community Development Department
Financing: City, State and Federal funds
Scheduling: Ongoing

Program H-1.1.4 Housing Rehabilitation in Non-Residential Areas: Continue to permit substantial rehabilitation¹ of, and additions to, existing housing located in zones where it is a nonconforming use consistent with the limitations of Chapter 18.90 (Nonconforming Uses, Structures and Parcels) of the coastal Land Use and Development Code. Coastal development permits are required for all development not otherwise exempt from permit

¹ Substantial rehabilitation or renovation occurs when 25 percent or more of the floor area is added to a structure and/or a building permit for construction valued at 50 percent or more of the assessed value of the building is required. A case-by-case review of nonconforming residential uses assures the health, safety, and welfare of the community, maintains the neighborhood character, and encourages mixed use developments.

requirements pursuant to Chapter 18.71.040 and Section 30610 of the Coastal Act. require a conditional use permit and Design Review approval for substantial renovations.

Responsibility: Community Development Department
Financing: City
Scheduling: Ongoing

Program H-1.1.5 Capital Improvement Program: Provide for consideration of capital improvement projects necessary to maintain the community's older neighborhoods as part of the City Council's annual review the Capital Improvement Program.

Responsibility: Community Development and Public Works Departments
Financing: City
Scheduling: Annually as an ongoing program

Program H-1.1.6 Standards for Rehabilitation of Buildings: Consider adopting all, or portions of, the Uniform Code of Building Conservation establishing standards which encourage the rehabilitation of older buildings in the community, and making it less burdensome for property owners to perform building maintenance.

Responsibility: Community Development and Public Works Departments
Financing: City
Scheduling: Complete Coastal LUDC revisions, 2008

Policy H-1.2 Discourage Conversion of Residential Units: Discourage the conversion of residential units to other uses.

Program H-1.2.1 Residential Conversions: Consider revising the Very High Density Residential (RVH) and Medium Density Residential (RM) zones to eliminate or reduce potential conversion of residential properties to commercial uses, except as home occupations in conjunction with residential uses.

Responsibility: Community Development and Public Works Departments
Financing: City
Scheduling: Complete Coastal LUDC revisions, 2008

Policy H-1.3 Energy Conservation Improvements: Promote energy conservation improvements for existing and proposed residential units.

Program H-1.3.1 Energy Conservation Program: Provide energy conservation information for public distribution.

Responsibility: Community Development Department
Financing: City
Scheduling: Complete public information by 2009

Program H-1.3.2 Green Building Program: Provide expedited plan review for green building projects and provide green building information for the public.

Goal H-2 Provide a range of housing, including single-family homes, townhouses, apartments, and other housing types to meet the housing needs of all economic segments of the community.

Policy H-2.1 Regional Housing Needs: Ensure that adequate residentially-zoned land is available to accommodate the City's Regional Housing Needs Determinations as described in Section II.

Program H-2.1.1 Identification of Infill Sites: Develop and maintain an inventory of vacant and underdeveloped residentially designated land. Provide copies of the inventory for public distribution.

Responsibility: Community Development Department
Financing: City
Scheduling: Ongoing

Policy H-2.2 Mixed-Use Development: Encourage the development of residential uses in conjunction with commercial enterprises in commercial zones, where the viability of the commercial activities and visitor-serving uses would not be adversely affected.

Program H-2.2.1 Mixed Use in the Central Business District: Continue to permit multiple family residential units above the ground floor after Design Review in the Central Business District (CBD).

Responsibility: Community Development Department
Financing: City
Scheduling: Complete Coastal LUDC revisions, 2008

Program H-2.2.2 Coastal LUDC Revisions: Consider the following Coastal LUDC amendments to provide additional housing development opportunities:

- revise the CO and the CG zoning districts to include a maximum allowable residential density of 24 units per acre with a conditional use permit;
- revise the Highway Visitor Commercial CH District to allow residential uses at a density of 24 units per acre with a conditional use permit²; and
- revise the Central Business District to allow a residential density of up to 40 units per acre as a permitted use above the ground floor.
- establish a procedure which allows for flexibility in applying development standards pertaining to roadways, setbacks, minimum lot standards, and parking requirements for affordable housing developments with continuing affordability requirements.

Responsibility: Community Development Department
Financing: City
Scheduling: Complete Coastal LUDC revisions, 2008

Program H-2.2.3 Adopt revised parking standards to reduce and/or provide flexible on-site parking standards for residential uses, in existing residential areas which have significant on-street parking capacity that is not needed to serve coastal access use, to provide for more effective and affordable development of second/granny units.

Responsibility: Community Development Department
Financing: City
Scheduling: Complete Coastal LUDC revisions, 2008

² The conditional use permit requirement is established to ensure the compatibility of multi-family residential uses in the Highway Visitor Commercial (CH) District with surrounding land uses, namely that the proposed residential development is sited and designed in a manner that ensures the residential uses are adequately protected from noise, glare, dust, and odors which may occur in commercial districts. Although most of the vacant and underutilized parcels in the CH District would be suitable for multi-family mixed use developments, the conditional use permit process would discourage such development on the few parcels in this district not suited for this land use, or ensure that they are approved with conditions ensuring overall compatibility of mixed use development.

Policy H-2.3 Limited Equity Cooperatives: Encourage limited equity residential cooperatives and other non-profit enterprises such as sweat-equity projects designed to provide affordable housing, consistent with the City's zoning regulations.

Program H-2.3.1 Limited Equity Cooperatives and Sweat Equity Projects: Seek sponsors to utilize State funds to develop a limited equity cooperative (LEC). Specific City actions to achieve this objective include assessing the viability and process of establishing an LEC; making such information available at the Community Development Department; identifying potential sites for an LEC; and seeking cooperation and support for this program from non-profit housing organizations.

Responsibility: Community Development Department and non-profit housing organizations

Financing: City

Scheduling: Ongoing

Policy H-2.4 Large-Scale Commercial and Office Projects: Consider the impacts on housing demand of large-scale commercial and office projects.

Program H-2.4.1 Housing Impacts of Employment-Generating Uses: Identify housing impacts of new commercial, office, and industrial development that will generate a significant amount of housing demand as part of the development review process and require appropriate mitigating measures.

Responsibility: Community Development Department

Financing: City

Scheduling: Ongoing

Program H-2.4.2 Consider a Housing Impact Fee: Consider implementing a housing impact fee as condition of specific plan approval and/or annexation of commercial and industrial properties.

Responsibility: Community Development Department

Financing: City

Scheduling: 2008

Policy H-2.5 Secondary Dwelling Units: Continue to facilitate the construction of secondary dwelling units on residential properties consistent with Chapter 18.42.170 (Second Units) of the Coastal Land Use and Development Code.

Policy H-2.6 Manufactured Housing: Continue to allow placement of manufactured housing units on permanent foundations in residential zoning districts.

Policy H-2.7 Infill Housing: Encourage housing development on existing infill sites in order to efficiently utilize existing infrastructure. (Refer to Programs 2.2.1 to 2.2.3.)

Policy H-2.8 Redevelopment Agency: Utilize Redevelopment Agency housing set-aside funds to implement housing programs for lower- income households.³

³

The City had a total balance of \$1,099,305 in the Redevelopment Housing Fund as of June 30, 2007.

Program H-2.8.1 Redevelopment Funds: Use the 20 percent Housing Set-Aside Funds and other Redevelopment funds as available to assist with the development, conservation, or rehabilitation of affordable housing consistent with community housing priorities.

Responsibility: Redevelopment Agency
Financing: City
Scheduling: Ongoing.

Program H-2.8.2 Update the Five-Year Implementation Plan: Revise the Redevelopment Five-Year Implementation Plan to include specific criteria for use of the 20 percent of the tax increment revenues collected which are allocated to the Housing Fund. Include criteria for the provision of full or partial fee waivers for affordable housing projects.

Responsibility: Redevelopment Agency
Financing: City
Scheduling: Ongoing.

Goal H-3 Expand affordable housing opportunities for persons with special housing needs such as the elderly, the disabled, households with very- low to moderate incomes, and first time home buyers.

Policy H-3.1 Available Funding Sources: Utilize County, State and Federal programs and other funding sources that provide housing opportunities for lower-income households.

Program H-3.1.1 Available Funding: Seek available State and Federal assistance to develop affordable housing for seniors, the disabled, lower-income large households, and households with special housing needs. Consider joint applications with the County Community Development Commission for HCD programs such as the California Self Help Housing Program (CSHHP), the Multi-family Housing Program (MHP), and/or the HOME Program.

Responsibility: Community Development Department
Financing: State and Federal sources
Scheduling: Ongoing

Program H-3.1.2 Tax-Exempt Financing: Require developers utilizing tax-exempt financing to include language in agreements with the City permitting persons and households eligible for HUD Section 8 rental assistance or Housing Voucher Folders to apply for below-market-rate units provided in the development.

Responsibility: Community Development Department
Financing: City and housing developers utilizing tax-exempt revenue bonds
Scheduling: Ongoing

Program H-3.1.3 School Facility Reimbursement: Encourage developers of affordable housing to apply for the Proposition 1A School Facility Fee Reimbursement Program (SFFRP) financed by the California Housing Finance Agency. Consider making this a requirement for development receiving subsidies or density bonuses for very-low rental income units.

Responsibility: Community Development Department
Financing: City and housing developers utilizing tax-exempt revenue bonds
Scheduling: Ongoing

Policy H-3.2 Encourage Senior Housing: Allow senior housing projects to be developed with density bonuses and flexible parking standards where found to be consistent with maintaining the character of the surrounding neighborhood consistent with the requirements of Policy H-3.5.

Program H-3.2.1 Amend the Coastal LUDC to address senior housing developments: Revise the Coastal LUDC to establish flexible parking requirements and to allow density bonuses for senior housing projects.

Responsibility: Community Development Department
Financing: City
Scheduling: Completed Coastal LUDC revisions, 2008

Program H-3.2.2 Affordable Senior Housing: Establish and maintain an inventory which identifies properties which are potentially well-suited for senior housing funded by HUD 202 financing or similar program. Work with developers to facilitate obtaining funding and construction of senior housing.

Responsibility: Community Development Department
Financing: City
Scheduling: Completed

Policy H-3.3 House Sharing: Encourage and facilitate house sharing programs for seniors.

Program H-3.3.1 Senior Shared Housing: Amend the Coastal LUDC to allow for conversion of existing residences into shared housing for seniors (i.e., suites with shared living/cooking facilities) and separate residential facilities for an on-site manager, with a use permit in all residential zones.

Responsibility: Community Development Department
Financing: City to apply for available funding; non-profit organization to implement the program.
Scheduling: Completion of the Coastal LUDC revisions, 2008

Policy H-3.4 Increase Affordable Housing Development: Encourage the construction of housing units which are affordable to households with very-low to moderate incomes consistent with Chapters 18.31 and 18.32 of the Coastal Land Use and Development Code.

Program H-3.4.1 Implement the City's Inclusionary Housing Ordinance which requires residential developments of 7 or more units consistent with Chapters 18.31 and 18.32 of the Coastal Land Use and Development Code to:

- a) Provide 15 percent of for sale units at prices affordable to moderate and median income households.
- b) Provide 15 percent of rental units at prices affordable to very-low, low - income and median income households.
- c) Construct all required inclusionary housing on-site unless an alternative equivalent action is approved by City Council.
- d) Implement the City's Inclusionary Housing Ordinance which requires the construction of one small secondary unit and/or one inclusionary unit in projects of 4 to 6 units.

Program H-3.4.2 Inclusionary Housing Standards: Revise the Coastal LUDC to include the following performance criteria for inclusionary units:

- a) the exterior appearance of inclusionary units shall not be different than other units in the housing development of which they are a part; and
- b) inclusionary units shall be dispersed or distributed throughout the development rather than being concentrated in one portion of the development.

Responsibility: Community Development Department

Financing: City

Scheduling: Complete 2008

Program H-3.4.3 Revise the Inclusionary Housing Ordinance: Revise the Coastal LUDC incorporating Programs 3.4.1 and 3.4.2 above establishing income guidelines, in-lieu fees, purchase or rent levels, and measures to assure a minimum 30-year affordability of inclusionary units.

Responsibility: Community Development Department

Financing: City

Scheduling: Complete 2008

Policy H-3.5 Density Bonus Incentives: Continue to provide density bonuses to projects that provide a required percentage of total units affordable to very-low, low-income, median, and moderate-income households and for units meeting the special housing needs identified in this Element and as established in conformance with State law. Density ranges described in land use designations may be exceeded consistent with the provisions of Government Code Section 65915 to encourage affordable housing production pursuant to §65915 of the California Government Code (Density Bonuses) provided the density bonus will not have an adverse effect on coastal resources. Any housing development approved pursuant to Government Code Section 65915 shall be consistent with all applicable certified Local Coastal Program (LCP) policies and development standards. In reviewing a proposed density increase, the City shall identify all feasible means of accommodating the density increase and consider the effects of such means on coastal resources. The City shall only grant a density increase if the City determines that the means of accommodating the density increase proposed by the applicant does not have an adverse effect on coastal resources. If, however, the City determines that the means for accommodating the density increase proposed by the applicant will have an adverse effect on coastal resources, the City shall not grant the density increase.

Program-3.5.1 Density Bonus Regulations: Revise the Coastal LUDC as needed to incorporate the Density Bonus provisions of State Law requiring the granting of a density bonus and additional incentives. Adopt an ordinance setting forth the requirements of the Density Bonus Program and defining affordable sales prices and rents, the affordability criteria, and additional incentives.

Responsibility: Community Development Department

Financing: City and developers

Scheduling: Complete 2008

Policy H-3.6 Resale and Rental Controls on BMR Units: Require resale and rental controls on all Below Market Rate (BMR) units, which are inclusionary units and units with affordability restrictions.

Program H-3.6.1 Adopt Continued Affordability Measures: Prepare deed restrictions and/or similar covenants to ensure the continued affordability of Below Market Rate units

for a specified minimum period of time for rental and ownership units which implement the requirements imposed by State and Federal laws.

Responsibility: Community Development Department
Financing: City and developers
Scheduling: 2008 and ongoing

Policy H-3.7 Large Families: Encourage housing for large families.

Program H-3.7.1 County Community Development Commission: Work with the County Community Development Commission to obtain and administer a HCD HOME grant or CDBG grant specifically to accommodate large families.

Responsibility: Community Development Department
Financing: City
Scheduling: ongoing

Policy H-3.8 Planned Development: The Planned Development Permit process shall be used to promote flexibility in the application of development standards under limited and unique circumstances to allow consideration of innovation in site planning and other aspects of project design to more effectively respond to site features, uses on adjoining properties, and environmental resources. Planned Unit Development Permit approval does not replace, supercede or modify the independent requirement for a CDP approved pursuant to the otherwise applicable policies and standards of the certified LCP.

Policy H-3.9 Housing for the Disabled: Continue to facilitate barrier-free housing in new development.

Program H-3.9.1 Accessible Units for the Physically Disabled: Revise the Coastal LUDC to establish requirements that specify a percentage of ground floor and other units in new residential projects which must be accessible for physically disabled persons. Ensure that these units are barrier-free consistent with the American with Disabilities Act (ADA) and State standards.

Responsibility: Community Development Department
Financing: City
Scheduling: Complete Coastal LUDC revisions, 2008

Policy H-3.10 Emergency and Transitional Housing:

Program H-3.10.1 Ongoing Estimates of the Demand for Emergency Housing: Consult with the Fort Bragg Police Department and homeless providers in the community to maintain ongoing estimates of the demand for emergency housing in Fort Bragg.

Responsibility: Community Development Department
Financing: City
Scheduling: Ongoing

Program H-3.10.2 Inter-Agency Cooperation: Work with private, County, and State agencies to provide emergency housing for the homeless.

Responsibility: Community Development Department
Financing: City
Scheduling: Ongoing

Policy H-3.11 First Time Home Buyers: Encourage affordable housing for first time home buyers.

Program-3.11.1 First Time Home Buyers: Include in the Density Bonus provisions of the Coastal LUDC incentives for the provision of housing units affordable to first time home buyers who qualify for affordable housing.

Responsibility: Community Development Department
Financing: City
Scheduling: 2008

Program 3.11.2: Funding Sources for First Time Home Buyers: Consider applying for funding sources for first time home buyers such as HCD's HOME Program, and provide referrals to FHA programs offered by local lenders and sweat-equity programs operated by non-profit housing organizations.

Responsibility: Community Development Department
Financing: City
Scheduling: Ongoing

Goal H-4 Promote housing opportunities for all persons regardless of race, gender, age, sexual orientation, marital status, or national origin.

Policy H-4.1 Equal Housing Opportunity: Continue to facilitate non-discrimination in housing in Fort Bragg.

Program H-4.1.1 Housing Discrimination Complaints: Facilitate equal housing opportunity by referring housing discrimination complaints to the Fair Housing Division of HUD. Information regarding equal housing opportunity laws and the equal housing opportunities for Fair Housing shall be distributed to the public at City Hall and the public library.

Responsibility: Community Development Department
Financing: City
Scheduling: Ongoing

Program H-4.1.2 Non-discrimination Clauses: Provide non-discrimination clauses in rental agreements and deed restrictions for housing constructed with City assistance.

Responsibility: Community Development Department
Financing: City
Scheduling: Ongoing

Policy H-4.2 Improve Accessibility to Housing: Make it easier to develop housing for seniors and persons with disabilities.

Program H-4.2.1 Use Housing Funds: Consider using the City's housing funds to subsidize the construction of renovations and improvements that improve the accessibility to housing for seniors and persons with disabilities.

Responsibility: Community Development Department
Financing: City
Scheduling: Ongoing

Program H-4.2.2 Reasonable Accommodation for Persons with Disabilities: Review the City's land use and building regulations to identify constraints that may exist for the provision of housing for persons with disabilities, and adopt measures to facilitate reasonable accommodations for persons with disabilities. Publicize revisions to land use regulations providing for reasonable accommodation for persons with disabilities.

Responsibility: Community Development Department
Financing: City Housing Funds, Redevelopment Housing Set Aside Funds
Scheduling: 2008

Goal H-5 Adopt and implement a Housing Element that complies with State Law.

Policy H-5.1 Public Participation: Continue to encourage and facilitate public participation in the formulation and review of the City's housing and development policies.

Program H-5.1.1 Workshops: Continue to hold workshops and public hearings to discuss proposed revisions to the City's Housing Element.

Responsibility: Community Development Department, Community Development Advisory Board (CDAB)
Financing: City
Scheduling: Annually (include with the annual review of the CIP by the Planning Commission)

Policy H-5.2 Annual Review of Housing Element Implementation: Carry out an annual progress report on implementation of the Housing Element.

Program H-5.2.1 Annual Report: Prepare an annual report that describes the amount and type of housing constructed, the stock of affordable housing units, demolition permits, and conversion of residential units to other uses, and other housing-related activities for review by the CDAB, Planning Commission and City Council.

Responsibility: Community Development Department
Financing: City
Scheduling: Annually (include with the annual review of the CIP by the Planning Commission)

2. Previous Housing Element

The policies and implementing actions of the previous Housing Element adopted in 1993 concentrated on preserving existing single-family neighborhoods and encouraging the construction of secondary dwelling units and multi-family and senior citizen housing.

The City has been quite successful in achieving the goals established by the previous Housing Element. Since 1991, 268 affordable dwelling units were built in the City. In addition, the City has met a substantial proportion of its overall regional housing need.

The revised Housing Element builds on the foundation established by the previous Element, but contains more specific implementation programs and quantified objectives. Priorities of the revised Housing Element are to conserve and rehabilitate existing homes, provide additional housing for seniors, and provide programs to advertise, implement and fund these activities.

The revised Element recognizes the need to provide stronger incentives for the construction of additional affordable housing. See Appendix B for an evaluation of the programs in the previous Housing Element.

3. Public Participation

The Housing Element was prepared as a part of a comprehensive revision of the General Plan. An extensive public participation program was implemented to encourage the involvement of all economic segments of the community.

A Housing Issues Report was prepared and a public workshop was conducted by the Community Development Advisory Board. The public workshop was advertised in the local newspaper and notices sent to affordable housing providers and housing advocates in Mendocino County. Members of the public, and for-profit and affordable housing developers attended the workshop. In addition, six public hearings on the Housing Element were conducted by the Planning Commission and the City Council to solicit public input, all of which were broadcast by MCCET television station.

F. Housing Background

The information presented in this section is intended to summarize the following: demographic characteristics, employment trends, inventory of vacant residential land, and the constraints that exist to the construction of housing in Fort Bragg. The policies and implementation programs address housing needs identified by this section.

Information in the Housing Background Section is based on the following sources: the U.S. Census, the California State Department of Finance, the City's Community Development Department, and the Spatial Insights Corporation. While the General Plan takes a ten-year perspective, the Housing Element projects population and housing needs for a five-year time span. This is done to comply with State Housing law that requires periodic updating of housing elements. The feedback obtained from the affordable housing developers resulted in a number of program changes to the Element.

1. Summary of Demographic Trends

a. Population Growth

The population of the City grew by 2,007 persons between 1980 and 2000, which represents a 39.9 percent increase in 20 years. The population has increased on the average about 1.9 percent per year.

TABLE H-1: POPULATION GROWTH 1980 TO 2000

Year	1980	1990	1995	2000
Population	5,019	6,078	6,180	7,026

Source: U. S. Census, State Department of Finance. (Excludes the Sphere of Influence)

While there are no official population projections for the City, the State Department of Finance projects that the County of Mendocino as a whole will grow from 87,143 people in 2000 to 105,225 people in 2010. This is an increase of 18,082 people, representing an overall increase of 20.7 percent, and an average annual increase of approximately 2 percent per year.

It is assumed that the population of the City of Fort Bragg will grow at approximately the same rate as projected for the County. It is projected that the population in the City will increase by approximately 1,537 persons between the years 2000 and 2010.

TABLE H-2: POPULATION PROJECTIONS

2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
7,026	7,166	7,309	7,455	7,604	7,756	7,911	8,069	8,230	8,395	8,563

Source: PAS & Associates (Excludes the Sphere of Influence)

b. Household Size

Between 1990 and 2000 the average household size in Fort Bragg has remained stable at 2.38 persons per household for owner-occupied units and 2.39 for renter-occupied units respectively¹. The average household size in the County in 1990 was moderately higher at 2.57 persons per household.

c. Female-Headed Households

The number of single parent female-headed households is indicated in Table H-3.

TABLE H-3: FEMALE HEAD OF HOUSEHOLD

	1985	1990	2000
Female Headed Households	260	323	369

Source: 2000 U. S. Census and Spatial Insights Corp.

¹ U.S. 2000 Census.

The number of female-headed households has increased by 29 percent, which is higher than the growth of the population during that period of time.

d. Age Structure

Significant changes are occurring in the age structure of Fort Bragg's population. The City's proportion of elderly residents (over 65 years old) has decreased from 17.3 percent of the population in 1990 to 13.9 percent of the population in 2000. This decrease in Fort Bragg's senior population is accompanied by a commensurate decrease in the proportion of children. Children 5 to 18 years old constituted 26.8 percent of the population in 1990 and 20.1 percent of the population in 2000. The U. S. 2000 Census states that the median age of Fort Bragg residents is 36.2 years.

Table H-4 shows the age structure of Fort Bragg's population in 2000. State projections indicate that the proportion of the elderly population in Mendocino County is expected to increase in the next ten years. Fort Bragg will likely follow this trend, despite the recent reduction in the proportion of senior citizens between 1990 and 2000. This trend will have an impact on the provision of health and social services, as well as on the demand for specialized housing for the growing senior population.

TABLE H-4: AGE STRUCTURE 2000

Age Group	Number of People	Percent
0 TO 4 YEARS	475	6.8
5 TO 9 YEARS	473	6.7
10 TO 14 YEARS	490	7.0
15 TO 19 YEARS	489	7.2
20 TO 24 YEARS	457	6.5
25 TO 34 YEARS	1,000	14.2
35 TO 44 YEARS	1,108	15.8
45 TO 54 YEARS	994	14.1
55 TO 69 YEARS	309	4.4
60 TO 64 YEARS	254	3.6
65 TO 74 YEARS	419	6.0
75 TO 84 YEARS	401	5.7
>85 YEARS	157	2.2
TOTAL	7,026	100.0

Source: U. S. Census 2000

e. Minority Population

The minority population of Fort Bragg represents a relatively small proportion of the total population. The minority population grew from 11 percent of the total population in 1990 to 26 percent in 2000. The largest increase has come from persons of Hispanic origin. Fort Bragg has a slightly smaller proportion of minority residents than that of the State, where over one-third of

the population is comprised of minorities. This is probably due to Fort Bragg's relatively isolated location with respect to the more urbanized portions of California.

TABLE H-5: POPULATION DISTRIBUTION BY RACE IN FORT BRAGG, 1990 AND 2000

Race	1990		2000	
	Number	Percent	Number	Percent
White	5,411	89.0	5,863	74.1
Black	29	0.5	107	1.3
Native American*	98	1.6	266	3.3
Asian	47	0.8	102	1.2
Hispanic	493	8.1	1,596	20.1
Total	6,078	100.0	7,934	100.0

Source: 1990 and 2000 Census. * Includes Polynesian, Hawaiian, Samoan, Tongan, and Guamanian. Note the total population figure differs from Table 1, due to different source data.

f. Household Income

The 1999 estimated median household income for Fort Bragg was \$36,006, while the average household income was \$41,940. Both the median and the average household income levels are projected to increase significantly by the year 2009. The median income is projected to increase by 36 percent, while the average income is projected to increase by 37 percent during this period. The median income for Mendocino County established by HUD in March 2002 was \$41,500.

TABLE H-6: MEDIAN AND AVERAGE HOUSEHOLD INCOME

Income	1999	2004	2009
Median income	\$36,006	\$ 46,102	\$48,836
Average income	\$41,940	\$ 49,920	\$57,629

Source: Spatial Insights Corporation, Inc. In constant 1999 dollars

The increasing household income projected for the City has important effects on housing demand. The higher income households will be able to afford new housing built in the community and will be able to afford to renovate and repair the City's existing older single-family homes.

There is, however, the necessity to maintain incentives for the construction of additional housing units affordable to lower and moderate income households. As indicated in Table H-7, approximately 43 percent of households in Fort Bragg earn less than \$30,000 per year.

TABLE H-7: INCOME DISTRIBUTION

Income	Households	Percent
< \$20K	706	28.9%
\$20K to \$30K	344	14.1%
\$30K to \$40K	313	12.8%
\$40K to \$60K	473	19.4%
\$60K to \$75K	238	9.8%
\$75K to \$125K	264	10.8%
> \$125K	101	4.1%
Total	2,439	100.0%

Source: Spatial Insights Corporation, June, 2000

g. Employment Trends

The majority of the employment in Fort Bragg is in the trade and services sectors, reflecting the City's role as the commercial hub of the coastal area of Mendocino County.

TABLE H-8: EMPLOYMENT BY SECTOR

Agriculture	Constructive	Manufacturing	Transport	Trade	Finance	Services	Gov't.
116	194	910	49	1,520	120	1,060	625
3%	4%	20%	1%	32%	3%	23%	14%

Source: Industry Trends and Outlook, California Employment Development Department, July, 2000

Projections indicate the total number of jobs in Fort Bragg will increase by a modest 3.2 percent between the year 1999 and the year 2009. (See Table H-9.)

It is likely that Fort Bragg will follow the labor force trends projected for the County by the State Employment Development Department. The largest increase in projected new jobs for the County is anticipated to be in the tourism, retail sales, and services sectors. Employment in logging and sawmills is projected to decline by 3.4 percent, and other lumber and wood products industries by 12.8 percent between 1998 and 2008. This follows a structural change in the economy of Mendocino County where future job creation is becoming increasingly based on the growth of the service and retail sectors, rather than on the growth of the manufacturing industry.

TABLE H-9: FORT BRAGG EMPLOYMENT PROJECTIONS 1999 TO 2009

	1999	2004	2009
Total Jobs	3,110	3,176	3,210

Source: Spatial Insights Corporation, June, 2000

Although the projected growth in labor force is modest, the income typically provided by jobs in the growing services and retail sectors is generally not sufficient to allow households to purchase or rent a dwelling in the community. Employment trends suggest that housing affordability will be a continuing problem.

2. Housing Characteristics

Fort Bragg is a predominantly residential community. The existing housing stock defines the character of the City and its neighborhoods and is the City's most valuable resource. The relatively high number of older homes in the City underlines the need for policies and programs which continue to maintain and enhance the quality of older residential areas.

a. Age of Housing Stock

The majority of homes in the City are older dwellings that were constructed prior to 1970, as shown in Table H-10. Approximately 14 percent of the City's homes are in need of significant rehabilitation work, such as repair or replacement of the structure, foundations, mechanical systems, roof, or windows.²

TABLE H-10: AGE OF HOUSING STOCK

Year Built	Number of Units	Percentage
1938 or earlier	1,039	36.8
1939 to 1960	569	20.1
1961 to 1975	292	10.3
1976 to 1980	349	12.4
1981 to 1999	576	20.4
Total	2,825	100.0

Source: 2000 Census and the City of Fort Bragg Community Development Department

b. Annual Construction of Housing Units by Type, 1991-2001

Fluctuations in the type of housing built reflect not only the relative amount of land zoned for different types of residential development in the City, but also changes in various economic factors such as tax codes and the real estate and financial markets. Table H-11 indicates single-family and multi-family home construction in Fort Bragg during the period 1991 to 2001.

² City of Fort Bragg Housing Conditions Survey, Community Development Commission of Mendocino County, 1996

TABLE H-11: ANNUAL CONSTRUCTION OF HOUSING UNITS BY TYPE 1991 TO 2001

Year	Single Family Units	Percent of Total Units Built	Multiple Family Units	Percent of Total Units Built	Demolitions	Net Housing Increase
1991	35	19.2	2	3.1	0	37
1992	34	18.7	3	4.7	0	37
1993	11	6.0	22	34.4	0	33
1994	6	3.3	0	0	0	6
1995	28	15.4	5	7.8	0	33
1996	28	15.4	10	15.6	0	38
1997	19	10.4	0	0	0	19
1998	5	2.8	7	10.9	1	11
1999	16	8.8	15	23.4	2	29
2000	9	100.0	0	0	0	9
2001	16	100.0	0	0	3	13
Total	207	76.0	64	24	6	265

Source: City of Fort Bragg Community Development Department, June 2002

As shown in Table H-11, 76 percent of new housing construction during the period 1991 to 2001 was single-family units. The rate of new residential construction fluctuates significantly from year to year, averaging 27 units per year.

c. Housing Types and Tenure

As indicated in the tables below, Fort Bragg remains predominantly a single-family residential community. The large proportion of single-family homes is typical for a small coastal city located in a predominantly rural county. In addition, a relatively high proportion of housing in Fort Bragg is renter-occupied.

TABLE H-12: HOUSING TYPES

Type of Housing	Number	Percent
Single-family	1,886	66.5
Multi-family	811	28.6
Mobile Home, Trailer, Other	138	4.9
Total	2,835	100.0

Source: State Department of Finance, 1999

TABLE H-13: HOUSING TENURE

Type of Housing	Number	Percent
Owner Occupied	1,218	42.9
Renter Occupied	1,622	57.1
Total	2,840	100.0

Source: U. S. 2000 Census

According to the State Department of Finance, 4.9 percent of Fort Bragg's housing units were vacant in 1999. The U. S. 2000 Census reports a rental vacancy rate of 2.5 percent. Real estate brokers and property managers in the community report a shortage of rental units and rental vacancy rates of less than 2 percent. It is generally accepted that an overall vacancy rate of 4 percent is needed to provide for normal turnover in housing units. Despite the official vacancy rate figure, there appears to be a tight housing market in the community.

3. Special Housing Needs

a. The Elderly

A relatively large proportion (21.6 percent) of Fort Bragg's housing units is occupied by persons 65 years of age or older. Table H-14 below shows the affordable housing developments for senior citizens.

TABLE H-14: AFFORDABLE SENIOR HOUSING

Development	Number of Units	Income Category
Moura Senior Housing	41	Very-Low
Duncan Place (disabled persons and seniors)	43	Very-low to Low
River Garden Apartments (2 ADA-compliant apartments)	2	Very-Low and Low
Walnut Apartments (56 apartments, mixed family and seniors)	2	Very-Low
Total	88	

Source: Community Development Department, City of Fort Bragg, June 2001.

The 88 housing units currently set aside exclusively for seniors do not meet the need for this type of housing. There is a 2-year waiting list comprised of 80 households for the Moura Senior Housing. Similar waiting lists exist for other affordable senior housing developments in the community. At present, 26 percent of Fort Bragg's population is comprised of persons aged 55 or older. The median age of the community is projected to increase from 47.5 years in 1999 to 51.1 years in 2009³. The State Department of Finance projects a doubling in the number of seniors in Mendocino County between 1999 and the year 2010.

The 2000 Census data indicate there were 465 elderly owner households and 221 elderly renter households, representing 16.3 and 13.3 percent of each elderly housing type respectively.

Several factors will affect the future number of senior housing and care facilities that can be built:

³ Spatial Insights Corp. June, 2000

- There has not been a commensurate increase in Federal and State funding to provide additional affordable housing for seniors.
- There are vacant bedrooms in the City. It is difficult to quantify accurately the number of such under-utilized housing units. The diminishing household size since the 1960s combined with the large number of existing single-family homes indicates that there could be significant source of additional housing for seniors dispersed throughout existing neighborhoods. An acceptable housing program for seniors could be implemented to utilize this extra housing capacity.

Programs to assist seniors who wish to continue living in their own homes would not only provide important psychological and social benefits, but also reduce the need to build additional housing. Examples of such programs include low interest loans to qualifying seniors for maintenance and repair of their homes and matching seniors with spare capacity in their homes with other seniors looking for housing.

In addition, this Element recognizes the urgency of providing additional senior housing and includes new programs to meet this need. The City is working with community groups such as Redwood Coast Seniors Inc. and the Coast Senior Housing Assistance Corporation to locate a site and obtain funding for a senior housing development.

b. Disabled Persons

The number of disabled persons in a city has important planning and social implications and will affect the demand for specialized handicapped access and transportation facilities, certain social services, and specialized housing.

The U.S. Census collects information on disabled people based on work disabilities and public transportation disabilities. The most recent 2000 Census information regarding disabled people indicated there were 1,467 persons with one or more disabilities of which 447 were 65 years and older.

The Redwood Coast Seniors Inc. provides scheduled and on-demand transportation services for disabled persons, including seniors, throughout the community and to other locations along the coast under contract with the Mendocino Transportation Authority. This service provides a monthly average of 38 one-way trips per day for persons with wheelchairs, of which 18 are for non-seniors.

The affordability of housing for disabled people is an important concern for Mendocino County. According to the Community Development Commission, most disabled persons entitled to SSDI (Social Security Disabled Insurance) and SSI (Social Security Insurance) benefits receive only \$652.00 or less each month from these sources. The average rent in Fort Bragg is \$700.00 per month, an amount that exceeds the total monthly benefits typically received by disabled persons. Persons receiving Section 8 housing assistance would receive assistance in meeting the market rate rents.

c. Single-Parent Households

Single-parent households, particularly those headed by women, are likely to have greater demand than two-parent households for child care and other social services. There is an obvious need for more affordable housing for this sector of the community. The waiting list for Section 8 housing at the Community Development Commission of Mendocino County is over 600 persons, and it typically takes more than two years to obtain housing.

TABLE H-15: SINGLE-PARENT HOUSEHOLDS IN FORT BRAGG

Head of Household	Number	Percent
Male-Headed Households	65	23.5
Female-Headed Households	212	76.5
Total	277	100.0

Source: Spatial Insights Corporation, June 2000

d. Farm and Fisheries Workers

There exists no data identifying the number of farm or fisheries workers in the community. There are a number of farmworkers employed in nurseries surrounding the City and fisheries workers in Noyo Harbor. There is no housing in the area specifically designed for migrant workers. Although the 2000 Census indicated there were 259 persons working in agriculture, forestry, fishing and hunting, there are no farmworkers in Fort Bragg, since there is no agriculture in the Planning Area. The workers identified by the Census are employed in the fishing and forestry sectors, and are therefore not eligible for farmworker housing subsidies, such as from CDBG grants.

e. Large Households

Large households are defined as households with five or more members. The market does not provide sufficient housing for large households who often have limited income and require additional rooms. The table below shows that there are 188 large households in Fort Bragg.

TABLE H-16: HOUSEHOLD SIZE

Household Size	Number of Households	Percent
1 person	815	32.5
2 persons	844	33.6
3 persons	361	14.4
4 persons	303	12.0
5 or more persons	188	7.5
Total	2,511	100.0

Source: Spatial Insights Corporation, June 2000

The 2000 Census data indicate there were 53 large owner-households and 199 large rental-households in Fort Bragg.

Demographic trends indicate that family size will continue to decrease, thereby reducing the demand for housing units with more than four bedrooms.

4. At Risk Units

There are affordable housing units throughout California which were built 30 years ago with Federal low-interest mortgages from the U. S. Department of Housing and Urban Development with an agreement that the rents of these units be kept at a level affordable to low income households.

State Government Code Section 65863.10 requires owners of such projects to provide at least nine months notice of contract termination or prepayment of Federal assistance to tenants and public agencies. Owners who are proposing to sell or dispose of those properties must also provide first right of refusal to purchase those properties to those agreeing to maintain the affordability of the units.

There are no housing units in Fort Bragg listed by the California Housing Partnership Corporation inventory of Federally subsidized housing at risk of conversion to market rate during the next five years.

5. Ability to Pay for Housing

In analyzing the ability of different economic sectors of the community to pay for housing costs, four income categories are commonly used: above-moderate, moderate, low, and very-low. The following brief definitions explain each of these income categories expressed in dollar amounts as of March 2002 for a four-person household:⁴

Above-Moderate Income: Household income which exceeds 120 percent of the median income for Mendocino County. This represents an annual income of \$49,801 or more.

Moderate Income: Household income between 80 and 120 percent of the median income for Mendocino County. This represents an annual income of \$33,201 to \$49,800.

Low Income: Household income between 50 and 80 percent of the median income for Mendocino County. This represents an annual income of \$20,751. to \$33,200.

Very-Low Income: Household income not exceeding 50 percent of the median income for Mendocino County. This represents an annual income of up to \$20,750.

Table H-17 presents the distribution of households by these four income categories in the City.

TABLE H-17: DISTRIBUTION OF HOUSEHOLDS BY INCOME CATEGORY

	Very-Low	Low	Moderate	Above-Moderate	Total
Households	706	344	313	1,076	2,439
Percent	28.9	14.1	12.8	44.1	100.0

Source: Spatial Insights Corporation and HUD Income Limits 2000. Note the household figures are based on HUD 2000 figures and the 1999 household income figures from Spatial Insights

⁴ According to data developed by the State Department of Housing and Community Development, under the direction of the U.S. Department of Housing and Urban Development (HUD), March 2002.

Corporation and are therefore approximate. These figures are used to provide an approximate estimate of the proportion of households in each income category.

The average rent paid by households in Fort Bragg in the first six months of 2000 for a typical two bedroom apartment was \$700 a month, and for a two-bedroom, single-family house the average rent was approximately \$850, as reported by property managers and real estate brokers in the community.

In addition, rents have increased by approximately 20 percent during the past two years. This rent increase is more than five times the rate of inflation and substantially larger than the growth in household income observed for this period.

The significant rise in rental costs is in part a reflection of the limited supply of rental units in the community, in relation to the large demand. Property managers report having waiting lists of 40 to 50 households for available rental units. Few of the rental units that do come on the market are advertised, since there is such a large pent-up demand.

In order to afford an average rent for an apartment in Fort Bragg of \$700 per month, a household must have an annual gross income of \$25,200, assuming that a maximum of 30 percent of household income is allocated for rent. This level of rent is affordable for above-moderate and moderate income households in the City. It is not affordable, however, to the approximately 43 percent of households in the community with very-low and low incomes. Until additional construction of rental units occurs, the combination of strong demand and low vacancies will contribute to an increasingly severe shortage of rental units and a decrease in their affordability.

The situation for home ownership is similar. The average sales price of a single-family house in Fort Bragg was \$163,000 in 2000. In order to qualify for a mortgage to purchase this home, a household would require a gross annual income of \$55,869. This assumes a 20 percent cash down payment of \$13,040 and a 30-year fixed-rate mortgage at an interest rate of 8.0 percent costing 2 points, including taxes and insurance.

The 1999 estimated median household income for Fort Bragg was \$36,006, which is less than the minimum income required to purchase an average-priced home within the City. (Note this figure is different from the HUD 2002 median income figure for Mendocino County of \$41,500). Although many Fort Bragg residents purchased their homes many years ago, before the time when affordability became an issue, it is evident that the majority of these people could no longer qualify to purchase a home in their community.

Overpayment is clearly an acute problem for renters as well as for those seeking to purchase homes. The policies and programs section of the Housing Element contains actions that seek to address this situation.

According to the 2000 Census, the median household income for Mendocino County was \$35,996. Estimates of overpayment by owners and renters reveal 56 percent of lower-income owner households pay over 30 percent of their household income on housing, and 69 percent of lower-income renter households overpay for housing.

In addition, the 2000 Census data indicated that occupants of 33 owner occupied units (1.15 percent), and 94 renter households (5.6 percent) in Fort Bragg reside in overcrowded conditions. It should be noted that 49 renter occupied units are quite overcrowded, with two or more occupants per room.

6. Regional Housing Needs Determinations

State legislation enacted in 1980, AB 2853, mandated that the Mendocino Council of Governments (MCOG) determines the existing and projected regional housing needs and determines each city's share of the regional need for housing by housing type and cost in Mendocino County.

The Housing Element must consider the local share for regional housing assigned to Fort Bragg by MCOG which takes into consideration employment opportunities, the availability of suitable sites and public facilities, market demand for housing, and the type and tenure of housing.

TABLE H-18: REGIONAL HOUSING NEEDS ALLOCATIONS FOR THE CITY OF FORT BRAGG
JANUARY 2001 – JULY 2008

Income Category	Total Housing Need	Percent
Very-Low (0-50)	85	22
Low (50-80)	74	19
Moderate (80-120)	66	17
Above-Moderate (>120)	163	42
Total	388	100

Source: Mendocino County Housing Needs Plan, Mendocino Council of Governments, as amended December 2003.

The Housing Element must demonstrate that there is sufficient vacant and underdeveloped land to meet Regional Housing Needs and to accommodate a range of housing for all income groups. Table H-19 indicates that there are 103.79 acres of vacant residentially-zoned land which could accommodate development of approximately 1,192 housing units during the time frame of this Housing Element.

A total of 268 dwelling units, of which 84 were affordable units, were constructed in the City since the 1991 Housing Need Allocations. Significant progress has been made towards alleviating the shortage of affordable housing through the collaborative efforts of the City and nonprofit housing organizations. Nonetheless, there continues to be a large unmet need for this type of housing in the community.

a. Residential Development Potential

Table H-19 shows remaining vacant or underdeveloped land that could accommodate housing development within the City of Fort Bragg by General Plan designation. Total residential development potential figures that include the Sphere of Influence are presented in the Land Use Element.

The development potential figures shown in the table are based on a parcel-by-parcel analysis of the number of dwelling units that could be constructed, taking into account the residential densities permitted by the General Plan. Refer to Appendix C for a parcel-specific residential

land use inventory⁵. All of the residential units indicated in Table H-19 can be served by City services and infrastructure.

Several conclusions can be drawn from Table H-19. First, the City has sufficient vacant and underdeveloped land to meet its remaining regional housing allocation of 187 units, since 1,192 units could be built within City limits. The majority (1,087) of these units would be higher-density housing in multi-family housing and mixed use Zoning Districts.

Despite sufficient vacant and underdeveloped land, there exist constraints to increased residential development which are discussed in the Constraints to Housing Development section.

State legislation (SB 1019) requires the City to ensure that there are adequate sites with zoning that permits multi-family residential uses without a conditional use permit to allow the City to meet its housing need for very-low and low income households. The RM, RH and RVH zoning districts permit multi-family housing without a conditional use permit as indicated in Table H-19: therefore the majority of multi-family housing can be developed as a use by right, without a conditional use permit: namely, 40 units in the RM District, 186 in the RH District, and 520 units in the RVH District.

TABLE H-19: RESIDENTIAL DEVELOPMENT POTENTIAL

General Plan Designation	Acres of Vacant Land	Maximum Units
Low Density Residential (RL)	18.45	75
Medium Density Residential (RM)	4.55	40
High Density Residential (RH)	16.58	186
Very-High Density Residential (RVH)	31.67	520
General Commercial (CG)	5.67	63
Highway Visitor Commercial (CH)	26.53	298
CBD	0.34	10
Total	103.80	1,192

Source: Community Development Department, City of Fort Bragg, December 2001 and *Buildout Projections for the 2001 Draft City of Fort Bragg General Plan*, September 2001 LCA & Associates. Note the latter counts mixed use units as commercial square footage, rather than as dwelling units.

b. Emergency and Transitional Housing

Accurate information on the number of homeless persons is impossible to obtain. No official counts of the homeless exist. Only a small proportion of the homeless population contact government and private agencies that provide assistance. Estimates of the number of homeless vary greatly because this population is transient, often moving from place to place every night seeking shelter.

The Police Department does not have statistics on the homeless population in the City. There are several organizations in the community that provide transitional housing facilities, notably the

⁵ The residential development figures in the Housing Element are different than the total buildout figures in the Background Report and in other parts of the General Plan. They are more conservative (i.e., assume less units per acre than would be allowed under the designation).

Ford Street Project, the Yellow House, and the Hospitality House. They report that the demand for temporary housing exceeds the supply. A summary of emergency and transient housing facilities are presented in Table H-20.

TABLE H-20: TRANSITIONAL AND EMERGENCY HOUSING

Organization	Type of Shelter Provided	Units/Size
The Ford Street Project	Emergency Housing	3 beds
	Transitional Housing	5 beds
Hospitality House	Emergency Housing	15 individual beds, 9 family beds
Yellow House	Transitional Housing for families with children and disabled individuals	12 beds
Community Development Commission	Shelter Plus Care voucher program	variable

Source: PAS & Associates

According to Mendocino County's Homeless Services Planning Group which coordinates public and private resources, the majority of homeless are County residents. In most cases, homelessness has occurred because local people are unable to afford housing, rather than as the result of an influx of homeless persons from other areas.

The magnitude of this problem far exceeds the resources of local government, particularly smaller cities. The City, however, has complied with Government Code Section 65583(a)(6) and (c)(1) regarding the identification of adequate sites to facilitate the development of emergency shelters and transitional housing with programs which identify an area suitable for this use.

Programs contained in this Housing Element require a Zoning Ordinance amendment to allow transitional and emergency housing as a permitted use in the CG: General Commercial district. The CG zoning district is an appropriate location for such a facility because:

- There are several underutilized sites within this district;
- There already exist transitional housing facilities in this zoning district;
- This area is centrally located and near public services and stores; and
- Infrastructure, such as water, sewer, roads, and sidewalks, is in place.

The County has taken the initiative in identifying the extent of the problem locally and has established an organizational framework to coordinate funding and implementation of programs for the homeless. The policies of the Housing Element relating to homelessness are based on facilitating and cooperating with this County effort, commensurate with the City's population and resources.

7. Constraints to Housing Development

a. Annexation Standards

An important land use regulation affecting development in Fort Bragg, as well as other cities in Mendocino County, is the policy adopted by the Mendocino County Local Agency Formation Commission (LAFCO) regarding annexation proposals.

The standards and procedures set forth in the LAFCO policy affect its review of requests for City annexation of lands proposed for development. The application of these standards does not constitute a constraint to housing development since they do not exceed the annexation requirements contained in State law.

b. Land Use Controls

The Fort Bragg Zoning Ordinance, contained within the City's Municipal Code, sets forth land use designations and development requirements for construction activity within the City. State law requires that the Zoning Ordinance be consistent with the General Plan. The Fort Bragg Zoning Ordinance is being comprehensively revised to be consistent with the General Plan. The following changes to the Land Use Designations of the General Plan promote housing development by establishing the following maximum residential densities:

- 24 units per acre in the General Commercial (CG) land use designation. The previous General Plan specified density by means of an FAR of 0.4 and a maximum building height of 25 feet for this designation;
- 40 units per acre for the Central Business District; and
- 24 units per acre for the Highway Visitor Commercial (CH) land use district. The current Zoning Ordinance and previous General Plan do not establish residential density limits for this land use designation.
- The City's zoning and development standards do not constitute a constraint to housing development. Regulations for residential development (e.g. required setbacks, maximum lot coverage, height limits, and minimum lot sizes) are no more restrictive than those of surrounding jurisdictions. Indeed, the Zoning Ordinance and related land use regulations serve to promote, rather than constrain, housing development in the following ways:
 - The RM-Medium Density Residential zoning district allows up to 2 units on a lot size of 7,500 square feet with a maximum building height of 35 feet pursuant to a conditional use permit. In addition, existing buildings can be divided into 3 units subject to the Subdivision Map Act and building code compliance. This zoning district has encouraged the restoration of older homes and the creation of additional infill housing units. Requiring a conditional use permit has not restricted the development of duplex and triplex units, and has served the function of ensuring that this type of residential development fits harmoniously with surrounding land uses.
 - The RH-High Density Residential zoning district has a maximum density for 15 units per acre within the Coastal Zone and can be increased elsewhere in the City according to the density bonuses contained in the Housing Element when providing affordable housing and meeting other criteria. Flexible lot configuration and other site design standards provide an incentive

for the development of rental and multi-family housing.

- The RVH-Very High Density Residential zoning district permits up to 24 units per acre in the Coastal Zone. In addition, this zoning district allows zero lot lines within Planned Unit Developments and a maximum building height of 45 feet. These regulations have resulted in the construction of a significant number of multi-family dwellings.
- Programs in this Housing Element and the General Plan would revise the Zoning Ordinance to permit multi-family residential densities in the CG-General Commercial and the CH-Highway Visitor Commercial zoning districts with a conditional use permit.
- The Zoning Ordinance encourages the Planned Development concept. Fort Bragg's PD process permits housing developments to be built with flexible setbacks and zero lot lines.
- The Central Business District permits a residential density of up to 40 units per acre.

The standards for on- and off-site improvements contained in the Subdivision Ordinance do not constitute a constraint to housing development. These standards are summarized below and are no more restrictive than those typically found in other Mendocino County jurisdictions. Indeed, in some cases, less restrictive standards exist in Fort Bragg, since sidewalks with full curb and gutters are not required for all types of residential subdivisions.

TABLE H-21: ON-AND OFF-SITE IMPROVEMENT STANDARDS

Sidewalks	Sidewalks are required on both sides of the street in residentially zoned areas, with the exception that the RS district does not require a sidewalk for lots equal or larger than 15,000 square feet.
Sidewalk Width	Sidewalks shall be at least 4 feet with 1/2 foot. for curb, and not less than 3 5/8 inches thick. Sidewalks shall be adjacent to curbs unless the conditions of tentative map approval provide otherwise.
Curbs	Curbs shall be provided in all residential areas with sidewalks.
Minimum Street Widths	The minimum width of pavement for lots 6,000 square feet - 24 feet with curb, gutter and sidewalk; for lots 6,001 to 15,000 square feet - 40 foot curb-to-curb is required; for lots $\geq$ 15,001 square feet - 18 feet paved with a 2 foot rocked shoulder.
Cul-de-sacs	A paved turn around shall be provided at the ends of cul-de-sac streets. The radius for the edge of pavement or curb line shall be 50 to 30 feet depending on lot size. A hammerhead turnaround is allowed on a case-by-case basis with approval of the Fire Department.
Standard Radii for Curb Returns at Street Corners	All residential street intersections: 20 foot minimum

The revised Housing Element contains many incentives that would reduce the cost of providing inclusionary units, such as density bonuses, a higher density mixed-use land use designation, and use of redevelopment and other housing funds.

The Inclusionary Housing Program does not constitute a constraint to housing development and is an established and proven method to ensure the construction of affordable housing. There are approximately 48 jurisdictions in California with inclusionary housing programs that have led to the production of over 20,000 affordable below market rate units.⁶ The cost of providing

⁶ *Inclusionary Housing Survey Report*, San Diego Housing Commission, 1992.

inclusionary units would either be passed on to the market rate units, reduce the profit margin of the developer, be reflected in a reduction in the value of the land, be partially compensated by density bonuses, fee reductions, or other government incentives, or a combination of these effects. The allocation of this burden would depend on general market conditions and the relative bargaining power of the parties.

c. Secondary Dwelling Units

Section 18.72.200 of the Municipal Code sets forth regulations for secondary dwelling units in the RL, RS, RR1, and RR2 single-family residential districts subject to an administrative review by the Community Development Director. These regulations allow secondary dwelling units on single-family residential lots provided the following conditions are met

- There may be only one secondary dwelling unit per single-family parcel.
- Secondary dwelling units must meet all standards of the zoning district.
- The secondary dwelling unit shall not exceed 960 square feet in the RL and RS Zoning District; 1,000 square feet in the RR1 zoning district; and 1,250 square feet in a RR2 zoning district.
- Impermeable surfaces shall not exceed 50 percent of the total lot area.
- Secondary dwelling units are not permitted where access is provided from streets less than 36 feet wide.

Policies and programs of this updated Housing Element call for Design Review of the site and design of second dwelling units to ensure neighborhood compatibility.

d. Site and Design Review

Residential development of two or more units requires Design Review. The intent of the Design Review process are to preserve and improve the natural beauty of the City's setting and ensure that the new development is visually harmonious with its surroundings. The Design Review Guidelines establish criteria for site and building design and landscaping, with emphasis on preserving designated scenic corridors. The Guidelines do not represent a constraint to housing production in Fort Bragg.

e. Development Fees

The City requires payment of different fees as a condition of development approval. All fees are tied to the City's actual costs of providing necessary services such as project review and plan checking fees. These fees are reviewed and adjusted periodically.

Fees for planning applications (e.g. design review, use permit, variance, rezoning, annexation, and subdivision map approval) range from \$300 to \$1,500. Additional fees, including school impact and parkland dedication fees and charges levied for building, electrical, plumbing, and other permits apply to construction of individual housing units. For a typical three-bedroom, two-bathroom single-family home, the City water, sewer, drainage, and water retrofit fees total approximately \$7,500.

Fee schedules are available at the Community Development Department. The fees required for residential development are based on meeting actual costs of providing City services such as fire, police, and potable water and wastewater treatment. The fees charged by the City staff to

process and review development applications are lower than comparable market-rate fees for technical plan review tasks.

The fees levied for a typical 1,500 square foot single family dwelling, including all water retrofit in lieu fees are \$15,120. For a multifamily dwelling unit in a typical fourplex, fees total about \$6,520 per unit. For multiple family projects, water retrofits must be performed, as in lieu fees may only be paid for projects requiring six or fewer retrofits.

1500 SF SINGLE FAMILY RESIDENCE ON 7500 SF CITY LOT	
FEE TYPE	COST
building permit including plan check	\$ 1,700.00
water retrofit (5 retrofits req'd or in lieu fees)	\$ 2,500.00
water capital	\$ 4,070.00
sewer	\$ 3,302.00
storm drain service (.0388/SF)	\$ 291.00
fire dept	\$ 50.00
school impact (\$2.14/SF)	\$ 3,210.00
TOTAL	\$ 15,123.00

TYPICAL 3800 SF MULTIFAMILY 4-PLEX UNIT	
building permit including plan check	\$ 2,750.00
water retrofits (16 retrofits required)	
water	\$ 8,535.00
sewer	\$ 6,175.00
storm drain service	\$ 400.00
fire dept	\$ 91.00
school impact (\$2.14/SF)	\$ 8,132.00
TOTAL FOR ENTIRE COMPLEX	\$ 26,083.00
TOTAL PER UNIT	\$ 6,520.75

f. Building Codes

Building codes and enforcement do not constrain housing development in Fort Bragg. As the City of Fort Bragg does not maintain its own Building Department, the Mendocino County Building Inspection Department provides building inspection and code enforcement service. New construction is required to meet the requirements of the Uniform Building Code (UBC).

The County Building Department inspects housing units when an owner seeks a building permit for additional construction, or when a specific complaint relating to the health and safety of the building occupants is received. In conformance with the UBC, the County requires new construction to meet all building codes in effect today, but does not typically require previous work that was completed with the necessary permits to comply with current standards.

g. Processing Time

The time taken to process development applications affects housing costs, since interest on loans must continue to be paid and the longer it takes for the development to be approved, the higher the costs will be. The time to process residential developments does not constitute a constraint in Fort Bragg.

The following are estimated processing times for residential development applications for a building permit on a dwelling with no special permit or exception to the standards required:

- Community Development Department - 1/2 to 1 hours.
- Building Department - 2 hours to 2 weeks.

Review requiring a discretionary permit involving one or more public hearings (e.g. Variance, Design Review, and Use Permit):

- Community Development Department and Planning Commission - 3 to 8 weeks.
- Building Department - 2 hours to 2 weeks.

Review requiring a change of zoning, major subdivision approval, or preparation of an Environmental Impact document:

- Community Development Department, Planning Commission, or City Council - 12 weeks to 1 year.
- Building Department - 2 hours to 2 weeks (Includes code compliance, structural, grading, and Title 24 review. Does not include back-up time, rework by applicant, or field inspections and varies with the complexities of the plan. Back-up time varies with volume of applications in the department and can be as long as two to three weeks.)

Single-family units are a permitted use by right and do not require a conditional use permit, and as indicated above, can take up to two months for approval, depending on whether Design Review or another discretionary permit such as a Variance are required. The City has adopted Architectural Review Guidelines with clear illustrations and text to streamline and facilitate this process.

Multi-family housing is a permitted use in all multifamily residential districts. Multi-family housing in mixed use districts requires a conditional use permit, which typically takes two months where no other entitlements, such as a major subdivision are required.

Second dwelling units are approved administratively. The typical administrative approval time for a second dwelling unit is less than three weeks. The time to obtain approvals for single and multi-family housing does not constitute a constraint on housing development in Fort Bragg.

These processing times are comparable to the time taken for processing similar projects in surrounding jurisdictions. It is anticipated that implementation of the policies contained in this Housing Element, combined with the increased staff in the Community Development Department, will further shorten processing time.

h. Infrastructure Constraints

Despite the development potential figures mentioned earlier, there are potentially significant constraints to increased housing development related to the adequacy of the City's infrastructure. These include:

- The City's water capacity needs to be increased to meet current and anticipated growth. Residential development is currently limited to projects that can meet the requirements of the City's Water Retrofit Program designed to optimize existing capacity. The City is currently planning to make improvements to its Noyo River diversion facility. The improvements include adding larger pumps and a new pipeline that would deliver water to Sherwood Road and reconstructing the City's raw water ponds. These improvements will provide the necessary infrastructure to allow the City to pump its full entitlement of up to 3.0 cubic feet per second. Once these improvements are made, the City will have the ability to pump sufficient water from the Noyo River and its other two sources to meet existing and projected demand resulting from new development allowed under the General Plan. Once the improvements are completed, the City can then apply for a permanent license to divert water from the Noyo River. If this permanent license is granted, then the City can meet with the State Department of Health Services (DHS) to amend the existing limits in its Water Permit on how much water the City can divert from the Noyo River.
- Several areas have inadequate storm drains and others are in need of repair. This problem is being actively assessed by the City.
- The sewer system was found to have infiltration problems affecting approximately 146 properties. The Municipal Improvement District is currently designing a new sand filter. The District is also planning to install a new secondary digester at the plant and make improvements to the collection system to address infiltration and inflow problems.
- Financial limitations exist, since the City has a limited retail sales tax base and relies heavily on transient occupancy and property taxes for its revenue.

The City's infrastructure problems have received considerable attention in the last two years. Fort Bragg adopted a Redevelopment Plan in 1987 and a Five-Year Implementation Plan was adopted in 1997 with a specific projects list designed to remedy many of the City's infrastructure problems which include:

- Replace and reconstruct storm drains and sidewalks in coordination with street reconstruction projects on Main, Oak, Chestnut, Franklin, and Harold Streets.
- Improve traffic, parking, and pedestrian circulation in the Central Business District and General Commercial districts.
- Relocate the Police Station.
- Construct the North Fort Bragg water and wastewater extension.
- Implement water system improvements: develop new sources and improve the distribution system and the water treatment plant.
- Construct a new recreation center and rehabilitate City Hall and other public facilities.

Because of these actions, the City's infrastructure problems will be remedied and Fort Bragg will have the infrastructure in place to accommodate its housing development potential well within the five-year time frame of this Element.

i. Market Constraints

Market constraints include the cost of land and improvements, construction costs, interest rates, profit, property taxes and the wide range of factors which determine consumer preference in the housing market. Most of these factors are beyond control of local governments, although occasionally the cost of land and interest rates can be reduced in order to encourage affordable housing production.

The availability of financing is a key component in determining the affordability of homes. Small increases in the interest rates can have a significant impact on the amount of monthly mortgage payments and thereby limit many people from qualifying for a home loan.

The cost of land and housing construction in Fort Bragg is generally less than in other coastal areas in the County. An informal survey of local real estate brokers and developers indicated the following range of costs for construction of a single-family home in the City:

Land costs \$50,000 to \$55,000 for a 6,500 to 7,000 square foot lot.

Construction costs \$80 to \$90 per square foot.

The cost of a typical single family lot in Fort Bragg ranged from \$50,000 to \$80,000. In 2002. Construction costs for a 1,700 square foot, 3 bedroom, 2-bathroom home vary from \$110 to \$125 per square foot. Rising insurance costs and sharply increased worker's compensation insurance for contractors statewide mean that these construction cost figures will increase by approximately 4 to 6 percent next year.

There exist little data regarding land and construction costs for multi-family housing, because few market-rate multi-family units have been developed in Fort Bragg in recent years. One local developer estimates that land costs (including wastewater, water, grading, and drainage improvements) for a typical townhouse development are in the range of \$25,000 to \$30,000 per unit, and that construction costs average approximately \$85 per square foot.

Financing for housing development is relatively easy to obtain and there is no shortage of construction or mortgage financing in Fort Bragg for new construction or rehabilitation. There is no evidence of mortgage deficient areas or "redlining" practices in Fort Bragg. Interest rates are consistent with those found throughout Mendocino County.

j. Community Sentiment

Community attitudes toward housing play a crucial role in determining the type and cost of housing that will be built in the City. A key to obtaining development approvals is to secure the support of the local neighborhood. Developers of potentially controversial housing projects should make the effort to address the legitimate community concerns regarding the type of housing proposed, the characteristics of the potential occupants of the housing units, noise, increases in traffic, and the impact that the proposed development will have on City services.

Involving the community in the early phases of a project is essential for creating the basis for cooperation and constructive participation in the planning process.

The community of Fort Bragg values the historic character of the Central Business District and the quietness of its residential neighborhoods. Most residents would concur that housing should be available to all economic segments of the community, and there has been little opposition to the many affordable housing units built to date.

k. Opportunities for Energy Conservation

The City encourages energy conservation in residential projects. The building orientation, street layout, lot design, landscaping, and street tree configuration of all residential projects are reviewed in order to maximize solar access and energy conservation. Residential structures must meet the requirements of Title 24 relating to energy conservation features of the Uniform Building Code.

APPENDIX A: QUANTIFIED OBJECTIVES BY HOUSING UNIT

Program	Very Low Income	Low Income	Moderate Income	Above Moderate Income	Total
H-1.1.3 Rehabilitation/Preservation	20	35	15		70
H-2.2.1 Mixed Use	10	10			20
H-2.2.2 Zoning Ordinance Revisions	20	20			40
H-2.5.1 Second Dwelling Units	15	25	40		80
H-2.8.1 Redv't. Housing Set-Aside	15	15	25		55
H-3.1.4 School Facility Reimburs't.	5	5	15		25
H-3.2.2 Senior Housing	25	35	40	80	180
H-3.4.3 Inclusionary Housing	5	15	15		35
H-3.5.1 Density Bonus	2	5	5		12
H-3.9.1 Emergency & Transitional	49				48

APPENDIX B: EVALUATION OF PREVIOUS HOUSING ELEMENT

Program	Purpose	Evaluation
1.1.a Continue to obtain a mixture of dwelling unit types through the administration of the General Plan, including newly annexed areas.	Facilitate the construction of a variety of housing types.	Program is general and has no quantitative objectives. The City has administered its General Plan, but it is not clear that this alone results in a variety of housing types <i>(delete)</i> ⁷
1.1.b Amend the Zoning Map to include a Manufactured Housing /Mobile Home Park Zone	To provide a location where manufactured homes and mobile homes could be constructed.	State law allows manufactured homes in residential zoning districts. The Mobile Home Park Zone was not implemented and is not necessary <i>(delete)</i>
1.1.c Amend the Zoning Ordinance for planned developments which will allow for greater flexibility in encouraging and approving higher densities, smaller lot sizes, manufactured housing and alley homes.	To increase residential density and thereby encourage the construction of additional affordable housing.	While the City has a –PD overlay district, the regulations are so vague that there is little incentive for property owners to use the tool. We recommend that this policy be refined and implemented to encourage flexibility and creativity in providing higher density housing. <i>(revise)</i>
1.1.d Conduct an annual inventory of public land available for below market rate housing.	To identify public land where below market rate housing could be constructed.	There is no undeveloped public land within the City which is suitable for affordable housing development. <i>(delete)</i>
1.1.e The City shall request the County to give notice to the City for all rezoning projects within the City's Sphere of Influence.	Work with the County to ensure that the City's housing and other land use policies are considered in the Sphere of Influence.	The County has implemented this policy. <i>(delete)</i> .
1.1.f Allow second units on single-family lots as a permitted use, subject to appropriate development standards for size, 7 and setbacks.	To increase the supply of affordable housing and make better use of existing stock of land and housing.	Implemented. A total of 19 second dwelling units were constructed since 1994. There may be need for policy revision to ensure compatibility with neighboring uses. <i>(revise)</i>
1.2.a Increase base density allocations for the ability of proposed developments to fulfill a need for a variety of housing types.	Encourage the construction of a variety of housing types and increase housing affordability.	This program is vague and its implementation requires a general plan amendment. The City will consider the need for increasing base densities as part of its General Plan update process. This is unnecessary as an on-going program. <i>(delete)</i>

⁷ Delete means the program was eliminated from the Draft Housing Element; revised means the program was revised and included in the Draft Housing Element.

Program	Purpose	Evaluation
1.2.b Amend the Zoning Ordinance to allow second residential units as a permitted use in all residential zones.	Encourage the development of second dwelling units.	Refer to Program 1.1.f for discussion of secondary units. The City has amended the secondary dwelling unit regulations since this policy was adopted. <i>(delete)</i>
1.3.a Amend the General Plan to allow a one-time division of parcels which can provide two existing homes on a residential lot with separate utility connections and meet the development standards in the particular zoning district.	Facilitate the conservation and renovation of existing housing stock.	Not implemented. This policy was adopted without a full analysis of potential impacts to existing roads, infrastructure, public services, neighborhood character, etc. <i>(delete)</i>
Program 1.4.a. Identify and designate on the General Plan and Zoning Maps priority sites for higher density residential development which could include alley houses, smaller lot sizes, etc.	Promote higher density housing.	This activity is a long-range planning effort and is part of the City's current General Plan update process. It is not necessary or appropriate as an on-going housing program. <i>(delete)</i>
Program 1.6a Apply to the Coastal Commission to exempt proposed residential structures situated in the Coastal Zone from obtaining a Coastal Development Permit.	Facilitate the expeditious approval of residential development.	The City has not applied for a Categorical Exclusion order from the Coastal Commission. It is noted that there is only one residential neighborhood in the Coastal Zone and it is nearly built-out. <i>(retain)</i>
Program 1.7.a Continue to obtain a mix of dwelling unit types through the administration of the General Plan, including newly annexed areas.	Promote a variety of housing types.	Program is general and has no quantitative objectives. <i>(delete)</i>
Program 1.8.a Increase base density allocations for the ability of proposed developments to fulfill the need for a variety of housing types.	Promote a variety of housing types.	Review of residential densities is part of the General Plan update process. <i>(delete)</i>
Program 1.9a Allow renters to convert to owning their mobile home space irrespective of rental vacancy rates.	To protect existing mobile home parks from redevelopment to other uses.	Not implemented. <i>(delete)</i>

Program	Purpose	Evaluation
2.1.a Adopt a tiered infrastructure rate policy which charges lower fees for sewer and water hook-ups and drainage improvements to developers of low and very-low income housing and higher fees to developers of market rate housing.	Reduce the cost of developing affordable housing.	Not implemented. The City has been advised that a tiered rate base may violate Prop 218 requirements. <i>(delete)</i>
2.1.b Waive Use Permits and Variance fees for projects involving very low and low income housing.	Reduce the cost of developing affordable housing.	In the past, the City has provided assistance to housing developers in the form of fee waivers and infrastructure development using Redevelopment funds. <i>(retain)</i>
2.1.c Continue to assist housing for very low to low income households within new developments from portions of development fees as specified by the City Council.	Reduce the cost of developing affordable housing.	See 2.1.b above <i>(retain)</i>
2.1.e Continue to give priority processing to those very low and low income developments.	Reduce the cost of developing affordable housing.	The City's permit-processing load is not so substantial that a policy for "priority" processing makes a difference. <i>(delete)</i>
2.1.f Correlate the vacant land inventory with existing needs of low and median income households, and determine the need to redesignate land for specific housing types.	Ensure that adequate sites for the development of affordable housing continue to exist.	Implemented as a part of the General Plan revision process. <i>(delete)</i>
2.1.g Apply for CDBG subsidies to assist in providing necessary infrastructure improvements in developments with below market rate housing, and leverage these subsidies.	Reduce the cost of developing affordable housing.	The City has a very successful Community Development Block Grant program and has received three housing related CDBG grants in the past five years. In addition, the City presently administers Federal Emergency Shelter Grants for two local non-profits providing homeless services. <i>(retain)</i>

Program	Purpose	Evaluation
2.1.h Amend the Zoning Ordinance to permit housing in all commercial zones as a permitted use.	Increase the amount of land available for housing development.	Not implemented. This policy will be re-evaluated in the current General Plan update process and is unnecessary as an on-going or long-term policy. <i>(delete)</i>
2.1.i Create a vehicle, such as an outreach program, nonprofit authority, planning commission, redevelopment agency or corporation, to locate, assist and plan such activities as below market rate housing for low and median income households.	Facilitate the implementation of housing element policies and programs.	The Community Development Department assists local groups in planning for affordable housing projects. <i>(delete)</i>
2.1.j The City shall acknowledge single parent households as viable families when applying for subsidized housing programs.	Facilitate housing availability for single parent households.	This program is vague and unimplementable. <i>(delete)</i>
2.2.a. Developers of planned residential developments of 5 units or more shall provide 10 to 15% of their units as affordable in one of the following ways: 1. 10-15% of the units for rent shall have rents affordable to very low and low income households; 10 – 15% of ownership units shall be affordable to households with incomes at or below the county median. Adopt an Inclusionary Housing Ordinance	Facilitate housing for lower income households.	The City has not adopted an inclusionary zoning ordinance, however, inclusionary units have been required since enactment of this policy. <i>(retain/revise)</i>
Program 2.2.b Provide a bonus to developments that incorporate below market rate units in the same development; to those developments that exceed the requirements of the inclusionary ordinance; provide density bonus increases up to 25 % for below market rate housing in designated areas.	Facilitate housing for lower income households.	City has implemented this policy as required by State law. <i>(retain)</i>

Program	Purpose	Evaluation
2.3.a Schedule an annual meeting with nonprofit housing developers to assist identifying appropriate sites and to encourage the development of rental housing and rehabilitation.	Facilitate housing for lower income households.	The City conducts annual meetings regarding the CDBG grant program and works with non-profit housing developers on an on-going basis. <i>(retain)</i>
2.4.a Amend the Zoning Ordinance to allow second residential units as a permitted use in all residential zones.	Facilitate housing for lower income households.	See 1.1.f and 1.2.b above <i>(delete)</i>
2.4.c Use readily available methods to encourage a full range of housing types, such as developer agreements and mortgage revenue bonds.	Facilitate housing for lower income households.	Program is general and has no quantitative objectives. <i>(delete)</i>
2.4.d Continue to participate in and promote the Section 8 Existing Housing Program. The City will annually monitor the status of the River Gardens Apartments.	Increase the amount of affordable housing units.	Implemented and ongoing. <i>(retain)</i>
2.4.e Expand the redevelopment boundaries for the purpose of encouraging the construction and/or improvement of housing affordable by households of very low, low and median income.	Increase the amount of affordable housing units.	Expanding the agency boundaries will not accomplish this purpose. Housing set-aside funds can be spent outside of the RDA boundaries. <i>(delete)</i>
2.5.a Develop an impact threshold level to determine the impacts on the City's housing supply associated with new commercial and industrial development. Those developments exceeding the threshold must mitigate those impacts.	Mitigate the housing impacts of new commercial and industrial developments.	The scale of commercial and industrial projects within the City is not large enough to justify this type of program <i>(delete)</i>
2.5.b Continue to participate in and promote the Section 8 Existing Housing Program	Increase the amount of affordable housing units.	Implemented and ongoing. See 2.4.d <i>(retain)</i>

Program	Purpose	Evaluation
3.1.b Annually monitor statistics for police, county agencies or private organizations regarding emergency shelter needs, and cooperate with or support public and private efforts to respond to those needs	Ensure that there will be adequate emergency and transitional housing facilities.	As noted above, City has coordinated with emergency and transitional housing providers to obtain grants for homeless shelters and services. <i>(retain)</i>
3.1.c Consider waiving the City's Bed Tax fees for individuals using paid vouchers for temporary shelter in City motels.	Ensure that there will be adequate emergency and transitional housing facilities.	Not implemented. Not included in the revised Housing Element. May be considered with the update of the City's fee structure.
4.1.a Apply for CDBG funds of other available state and Federal funding for housing rehabilitation.	Preserve and enhance the existing housing stock.	The City has applied for Community Development Block Grants annually.
4.2.a Apply portions of the Redevelopment Agency's 20% housing allotment for funding to rehabilitate needed homes.	Preserve and enhance the existing housing stock.	The RDA housing set-aside fund only recently has accrued sufficient funds for establishment of a program such as this. The Housing Element update should identify recommended uses of RDA housing set-aside funds.
4.3.a Develop a voluntary code inspection program emphasizing rehabilitation and energy features.	Preserve and enhance the existing housing stock.	Not implemented. City presently contracts with Mendocino Co. for building inspection services. <i>(delete)</i>
4.3.b Initiate a voluntary pre-sale code inspection program	Preserve and enhance the existing housing stock.	Not implemented. See 4.3.a. <i>(delete)</i>
5.1.a Continue to regulate aesthetics through the Planning Commission, building code, zoning ordinance, Site and Architectural Review Committee.	Preserve and enhance the existing housing stock.	This is an on-going responsibility of the Planning Commission and staff and is fully implemented. <i>(delete)</i>
5.1.b Permit housing rehabilitation in zones where housing is a nonconforming use, considering on a case-by-case basis the neighborhood character and the desirability of mixed use developments.	Preserve and enhance the existing housing stock.	The City's non-conforming use regulations would allow for this activity. The program is not necessary. <i>(delete)</i>

Program	Purpose	Evaluation
6.1.a Continue to provide density incentives for the installation of specified energy conservation features which exceed the required building standards in new housing.	Increase energy efficiency of housing.	Not implemented. <i>(delete)</i>
6.2.b Establish a weatherization assistance program.	Increase the energy efficiency of housing.	Not implemented. PG&E operates a zero interest program and either performs the work itself or contracts out to a local nonprofit housing corporation. <i>(delete)</i>
7.1.a Prepare an informational pamphlet demonstrating procedures to obtain landscaping, well, use of gray water in landscaping, list of native-drought tolerant vegetation and water conserving plumbing that can reduce water consumption in a residence.	Increase the energy and resource efficiency of housing.	The City has a mandatory water-retrofit program for water conservation purposes. A street tree list identifies drought-tolerant tree species and the Planning Commission routinely requires that all landscaping be drought-tolerant. <i>(delete)</i>
7.1.b Establish a permitting process on all residential lots to allow domestic wells where water supply can be proven safe. Periodic testing of wells will be instituted.	Conserve water.	Implemented. <i>(delete)</i>
8.1.a Continue to educate citizens on recycling and provide new information as necessary.	Conservation of resources.	This program is not housing-related and should be relocated to another element of the General Plan. <i>(delete)</i>
9.1. a Establish a permitting procedure on all residential lots to regulate wood burning stoves consistent with State standards.	Improving air quality.	This program is not housing-related and should be relocated to another element of the General Plan. <i>(delete)</i>

Comments

Government Code Section 65583(a)(3) requires "an analysis of the differences between what was projected or planned in the earlier element and what was achieved." The table above indicates that a number of programs in the previous element were not implemented. This was due in part to the City's limited financial resources. Land prices and construction costs limit development of affordable single-family dwellings.

The revised element has recognized these limitations and contains several new programs which will result in the construction of additional affordable housing units, a more stringent inclusionary housing ordinance; establishment of a housing fund; establishment of a density bonus program;

and other programs to meet special housing needs. These programs recognize that the majority of additional units will occur at multi-family densities and includes requirements for affordable housing development as a condition of approval. This approach effectively utilizes the limited remaining developable land in the City toward achieving the City's housing goals.

APPENDIX C: PARCEL-SPECIFIC INVENTORY OF VACANT AND UNDERUTILIZED LANDS

This appendix lists vacant and underutilized lands, and shows development potential for those lands.

APN	Address	Area	GP	Density	Units
018-090-13	330 Cypress Street	2.0	CG	15 du/ac	22

018-340-04	441 South Street	7.94	RVH	15-24 du/ac	143
	Subtotal RVH	31.67			520
	TOTAL	103.8			1192

Note: The data in this Appendix are different than the residential buildout figures contained in the Background Reports and in references to residential buildout in other Elements of the General Plan since it uses more conservative assumptions for calculating buildout (i.e., it reduces the development potential of multi-family properties by about 75 percent); it includes underutilized parcels; and it includes the residential component of mixed use development. The unit development potential for underdeveloped sites was further reduced on a case-by-case basis taking into account the existing development on the site and other constraints.

The Zoning Ordinance is being revised to ensure consistency with the updated General Plan and Housing Element. No Zoning Ordinance or General Plan amendments would be needed to achieve the densities noted above.

APPENDIX D: AFFORDABLE HOUSING UNITS

Listed below are the affordable housing units built in the City.

AFFORDABLE HOUSING UNITS

Development	Location	Year Built	No. of Units	At Risk Status	Income Category
Habitat for Humanity	Oak Street	under const'n.	2	Protected	Very Low
Rural Communities Housing Development Corporation	Stewart Street	2000	10	Protected	Very Low/Low
Rural Communities Housing Development Corporation	Stewart Circle	2000	6	Protected	Very Low/Low
Community Development Commission	John Cimolino Way	2000	14	Protected	Very Low
Rural Communities Housing Development Corporation	Holmes Lane	1999	7	Protected	Very Low/Low
Habitat for Humanity	Maple Street	1998	2	Protected	Very Low
Community Development Commission	South Sanderson Way	1997	9	Protected	Very Low
Habitat for Humanity	South Corry Street	1996	2	Protected	Very Low
Rural Communities Housing Development Corporation	Howland Court	1995	10	Protected	Very Low/Low
Habitat for Humanity	Oak Street	1994	2	Protected	Very Low
Community Development Commission	Cypress Street	1993	19	Protected	Very Low/Low
Habitat for Humanity	South Harold Street	1991	1	Protected	Very Low
Moura Construction	South Street	1990	38	Not Protected	Senior Housing Very Low/Low
Private/Federal Home Mortgage Association	Walnut Street	1986	56	Not Protected	Very Low

Rural Communities Housing Development Corporation	Cypress Street	1980	43	Protected	Very Low
River Gardens	South Street	1979	48	Pending	Very Low
Total Affordable Housing Units			269		

Protected means rental or resale controls are in effect for at least the next ten years.

APPENDIX E: SB 520 COMPLIANCE ANALYSIS

The City of Fort Bragg's existing review procedures regarding housing for persons with disabilities is summarized below.

1 General

- *Does the City have any process for individuals with disabilities to make requests for reasonable accommodation with respect to zoning, permit processing or building laws?*

There exists no special permit process for housing accommodating individuals with disabilities.

- *Has the City made any effort to remove constraints on housing for persons with disabilities?*

Group homes with less than six residents (exclusive of staff) are allowed in all residential zoning districts as a use by right. Group homes for 6 or more residents are allowed in all residential and commercial zoning districts with a conditional use permit. ADA retrofits, such as a ramp or lift, require a building permit, or if they substantially change the appearance of the structure, staff approval or Design Review and Planning Commission approval may be required.

- *Does the City make information available about requesting a reasonable accommodation with respect to zoning, permit processing, or building laws?*

A program addressing this requirement is included in the Draft Housing Element.

2 Zoning and Land Use

- *Has the City reviewed all of its zoning laws, policies, and practices with compliance with fair housing law?*

The City is completing a comprehensive revision of its Zoning and Subdivision Ordinances which includes compliance with fair housing laws.

- *Are residential parking standards for persons with disabilities different from other parking standards?*

There are no residential parking standards for persons with disabilities different from other parking standards. The City complies with the UBC and CALDAG for the number and configuration of handicapped parking spaces.

- *Does the City have a policy or program for the reduction of parking requirements for special needs housing if a project can demonstrate a reduced need for parking?*

The Zoning Ordinance provides for flexible parking standards which would allow a reduction in parking requirements for persons with disabilities, emergency and transitional housing, and other special housing needs, such as senior housing.

- *Does the City restrict the siting of group homes?*

No. As indicated above, group homes of less than six residents are permitted as a use by right in all residential zoning districts. Group homes of six or more residents are allowed with a conditional use permit in all residential and commercial zoning districts.

- *Does the City have occupancy standards in the zoning code that apply specifically to unrelated adults and not to families?*

No. Fort Bragg does not have occupancy standards in its Zoning Ordinance.

- *Does the land use element regulate the siting of special needs housing in relationship to one another? Specifically, is there a minimum distance required between two (or more) special needs housing?*

Neither the Land Use Element nor the Zoning Ordinance contains any regulations addressing spacing or siting of special needs housing nor the location of such facilities with regard to one another.

3 Permits and Processing

- *How does the City process a request to retrofit homes for accessibility?*

A building permit would be required for a ramp or a lift. This is done administratively. Where substantial modifications to the exterior appearance of a commercial or residential structure of more than two units are needed, Design Review approval by the Planning Commission may be required. The discretionary approval by the Planning Commission would be limited to the exterior appearance of the structure, and not to the use or to mechanical equipment required to improve accessibility.

- *Does the City allow group homes with fewer than six persons by right in single-family zones? What permits, if any are required?*

This use is allowed by right in all residential zoning districts. A building permit would be required for one dwelling, and Design Review and Planning Commission approval for design related issues would be required for two or more dwellings.

Does the City have a set of particular conditions or restrictions for group homes with greater than six persons? What are they? How do they affect the development of housing for persons with disabilities?

Group homes for six or more persons are permitted with a conditional use permit in all residential and commercial zoning districts. There are no special standards, requirements, or performance standards applicable to group homes or for persons with disabilities. The use permit requirement does not act as a detriment to development for persons with disabilities in Fort Bragg: two such facilities are already located in the City; and the typical conditions of approval are no more stringent than for other similar residential land uses requiring a conditional use permit.

- *What kind of community input does the City allow for the approval of group homes? Is it different than for other types of residential development?*

Group homes of six or fewer residents require no public hearing or special permits. Group homes with seven or more residents require a conditional use permit that is subject to a public

hearing. The public input for group homes is no more stringent or different than for any other type of residential development, and indeed is less than for a major residential subdivision.

- *Does the City have particular conditions for group homes which will be providing services on site?*

No. The Zoning Ordinance is silent with regard to this matter.

4 Building Codes

- *Has the City adopted the Uniform Building Code? What year? Has the City made amendments that might diminish the ability to accommodate persons with disabilities?*

The City has adopted the most recent UBC dated 1998. No amendments to the UBC have been made by the City affecting housing for persons with disabilities.

- *Has the City adopted any universal design elements in the building code?*

No.

- *Does the City provide reasonable accommodation for persons with disabilities in the enforcement of building codes and the issuance of building permits?*

There are no special provisions, standards, or performance criteria in the Zoning Ordinance or the Building Codes applicable to persons with disabilities.

The City will add the following program under the Special Housing Needs goals and policies:

Program H-4.2.2 Reasonable Accommodation for Persons with Disabilities: Review the City's land use and building regulations to identify constraints that may exist for the provision of housing for persons with disabilities, and adopt measures to facilitate reasonable accommodations for persons with disabilities. Publicize revisions to land use regulations providing for reasonable accommodation for persons with disabilities.

APPENDIX F – RESIDENTIAL LAND USE REGULATIONS

The following table shows land use regulations for existing zoning districts.

Zoning District	Setbacks	Lot Coverage	Building Height	Maximum Density
Rural Residential (RR)	Front-25'; rear-20'; side-20'	Max. 10,000 sf	35'	1 unit/acre
Suburban Residential (SR)	Front-25'; rear-20'; side-10% of lot width (min 10'/max 20')	25%	35'	1 unit/40,000 sf
Low Density Residential (RL)	Front-25'; rear-20'; side-10% of lot width (min 5'/max 12')	40%	35'	6 units/acre
Medium Density Residential (RM)	Front-25'; rear-20'; side-10% of lot width (min 5')	50%	35'	6-12 units/acre
High Density Residential (RH)	Front-20'; rear-10'; side-10'	As determined by Planning Commission	45'	6-15 units/acre
Very High Density Residential (RVH)	Front-20'; rear-10'; side-10'	No limitation	45'	15-24 units/acre
Central Business District (CBD)	None	No limitation	35'	40 units/acre (use permit req'd)
General Commercial (CG)	Front-3'; rear-0'; side-0'	No limitation	35'	As determined by Planning Commission (use permit req'd)
Neighborhood Commercial (CN)	Front-10'; rear-15'; side-0'	No limitation	25'	
Office Commercial (CO)	Front-15'; rear-10'; side-10'	No limitation	25'	As determined by Planning Commission (use permit req'd)

LAND USE PLAN GLOSSARY

Acoustical Engineer

An engineer specializing in the measurement and physical properties of sound. In environmental review, the acoustical engineer calculating noise impacts of proposed projects and designs measures to reduce those impacts.

Acre-Foot

The volume of water that would cover one acre to a depth of one foot. An acre-foot is equal to 326,000 gallons, about the amount of water used each year in and around the home by an average California family.

ADT

Average daily traffic, a two-directional 24-hour traffic volume.

Affordable Housing

Dwelling units for which the housing payment is not more than 30 percent of household gross income for a specified income group.

Aggrieved Person

Any person who, in person or through a representative, appeared at a public hearing of the City of Fort Bragg or the California Coastal Commission in connection with the decision or action on a Coastal Development Permit application, or who, by other appropriate means prior to a hearing, informed the City of Fort Bragg or the California Coastal Commission of the nature of his/her concerns or who for good cause was unable to do either. "Aggrieved person" includes the applicant for a Coastal Development Permit.

Alluvium

A general term for clay, silt, sand, gravel, or similar unconsolidated detrital material deposited during comparatively recent geologic time by a stream or other body of running water as a sorted or semi-sorted sediment in the bed of the stream or on its flood plain or delta, or as a cone or fan at the base of a mountain slope.

Alquist-Priolo Earthquake Fault Zones

A seismic hazard zone designated by the State of California within which specialized geologic investigations must be prepared prior to approval of certain new development.

Appealable Development

After certification of the Fort Bragg Local Coastal Program, an action taken by the City of Fort Bragg on a coastal development permit application may be appealed to the Coastal Commission for only the following types of developments:

- (1) Developments approved by the City between the sea and the first public road paralleling the sea or within 300 feet of the inland extent any beach or of the mean high tide line of the sea where there is no beach, whichever is the greater distance.
- (2) Developments approved by the City not included within paragraph (1) that are located on tidelands, submerged lands, public trust lands, within 100 feet of any wetland, estuary, or stream, within 300 feet of the top of the seaward face of any coastal bluff.
- (3) Any development which constitutes a major public works project or a major energy facility. The phrase "major public works" or a "major energy facility" as used in Public Resources Code Section 30603(a)(5) and in these regulations shall mean: any proposed public works project or energy facility, as defined by Section 13012 of the Coastal Commission Regulations and the Coastal Act.

Aquaculture

Section 30100.2 of the Coastal Act states that: (1) aquaculture means a form of agriculture as defined in Section 17 of the Fish and Game Code; (2) aquaculture products are agricultural products; aquaculture facilities and land uses shall be treated as agricultural facilities and land uses in all planning and permit-issuing decisions governed by this Division.

Army Corps of Engineers

A federal agency responsible for the design and implementation of publicly-supported engineering projects; any construction activity that involves filling a watercourse, pond, lake (natural or man-made), or wetlands (including seasonal wetlands and vernal pools), may require an Army Corps permit.

Arterials

Arterials provide circulation between major activity centers and residential areas, and also provide access to freeways. They are further subdivided into two categories, major and minor arterials, as described in GP Section 5.30.

Beach, inland extent

The inland extent of the beach shall be determined as follows:

- (1) from a distinct linear feature (e.g., a seawall, road, or bluff, etc.);
- (2) from the inland edge of the further inland beach berm as determined from historical surveys, aerial photographs, and other records or geological evidence; or
- (3) where a beach berm does not exist, from the further point separating the dynamic portion of the beach from the inland area as distinguished by vegetation, debris or other geological or historical evidence.

Best Management Practices (BMPs)

Activities, practices, and procedures to prevent or reduce the discharge of pollutants directly or indirectly to the municipal storm drain system and waters of the United States. Best Management Practices include: treatment facilities to remove pollutants from stormwater; operating and maintenance procedures; facility management practices to control runoff, spillage or leaks of non-stormwater, waste disposal, and drainage from materials storage; erosion and sediment control practices; and the prohibition of specific activities, practices, and procedures and such other provisions as the City determines appropriate for the control of pollutants.

Big Box Retail

Refers to large formula retail establishments that are generally located on an arterial or collector roadway, require a site of 1 acre or larger and generally contain one or several businesses or structures totalling 30,000 or more square feet. They may operate as stand along facilities, but also in a new type of shopping center called a "poer center" or "value canter" having such common characteristics as large rectangular buildings, a reliance on auto-borne traffic with limited public transit service. (Refer to Formula Business)

Bike Lane

A corridor expressly reserved by markings for bicycles, existing on a street or roadway in addition to any lanes for use by motorized vehicles (Class II Bikeway).

Bike Path

A paved route not on a street or roadway, expressly reserved for bicycles. Bike paths may parallel roads but typically are separated from them by landscaping (Class I Bikeway).

Bike Route

A facility shared with motorists and identified only by signs. A bike route may or may not have pavement markings or lane stripes (Class III Bikeway).

Bluff, Coastal

A bluff overlooking a beach or shoreline or that is subject to marine erosion. Many coastal bluffs consist of a gently sloping upper bluff and a steeper lower bluff or sea cliff. The term "coastal bluff" refers to the entire slope between a marine terrace or upland area and the sea. The term "sea cliff" refers to the lower, near vertical portion of a coastal bluff. For purposes of establishing jurisdictional and permit boundaries coastal bluffs include, (1) those bluffs, the toe of which is now or was historically (generally within the last 200 years) subject to marine erosion; and (2) those bluffs, the toe of which is not now or was not historically subject to marine erosion, but the toe of which lies within an area otherwise identified as an Appealable Area.

Bluff Edge

The upper termination of a bluff, cliff, or seacliff: In cases where the top edge of the cliff bluff is rounded away from the face of the cliff bluff as a result of erosional processes related to the presence of the steep cliff bluff face, the bluff line or edge shall be defined as that point nearest the cliff bluff beyond which the downward gradient of the surface increases more or less continuously until it reaches the general gradient of the cliff bluff. In a case where there is a steplike feature at the top of the cliff bluff face, the landward edge of the topmost riser shall be taken to be the cliff bluff edge. Bluff edges typically retreat landward due to coastal erosion, landslides, development of gullies, or by grading (cut). In areas where the bluff top or bluff face has been cut or notched by grading, the bluff edge shall be the landwardmost position of either the current or historic bluff edge. In areas where fill has been placed near or over the historic bluff edge, the original natural bluff edge, even if buried beneath fill, shall be taken to be the bluff edge.

Blufftop access

Provides access and coastal viewing along blufftops that run parallel to the shoreline, and in some cases provide the only opportunity for public access along the shoreline above a rocky intertidal zone with no sandy beach.

BMR

Below Market Rate. BMR housing is subsidized to make it available to households that cannot afford current market price.

Buildout

That level of urban development characterized by full occupancy of all developable sites in accordance with the General Plan; the maximum level of development envisioned by the General Plan. Buildout does not assume that each parcel is developed to include all floor area or housing units possible under zoning regulations.

California Coastal Act or Coastal Act

The California Coastal Act of 1976, Division 20 of the Public Resources Code, as amended.

California Coastal Trail (CCT)

A continuous public right-of-way along the California coastline; a trail designed to foster appreciation and stewardship of the scenic and natural resources of the coast through hiking and other complementary modes of non-motorized transportation.

Caltrans

California Department of Transportation.

Capital Improvement Program (CIP)

The multi-year scheduling of public physical improvements based on studies of fiscal resources available and the choice of specific improvements to be constructed.

CDBG

Community Development Block Grant.

CDFFP

California Division of Forestry and Fire Protection.

CEQA

California Environmental Quality Act.

City

The City of Fort Bragg.

CMP

Congestion Management Program, mandated by State Law.

CNDDDB

California Natural Diversity Data Base, Department of Fish and Game.

Coastal-related Development

Any use that is dependent on a coastal-dependent development or use.

Coastal Resources

Include, but are not limited to, public access opportunities, visitor and recreational facilities, water-oriented activities, marine resources, biological resources, environmentally sensitive habitat areas, agricultural lands, and archaeological or paleontological resources.

Collectors

Collectors have the important function of collecting traffic from residential and commercial areas and channeling it to arterials. They are typically fronted by residences, commercial, or public activities. Collectors are usually two-lane streets, and maximum acceptable volumes are dictated by resident concerns about intrusion rather than traffic

Commercial Strip

A retail and service commercial area extending along an arterial street.

Community Noise Equivalent Level (CNEL)

A 24-hour energy equivalent level derived from a variety of single-noise events, with weighting factors of 5 and 10 dB applied to the evening (7:00 to 10:00 p.m.) and nighttime (10:00 p.m. to 7:00 a.m.) periods, respectively, to allow for the greater sensitivity to noise during those hours. An alternative measure is day-night average sound level (Ldn). The A-weighted average sound level for a given area (measured in decibels) during a 24-hour period with a 10dB weighting applied to nighttime sound levels. The Ldn is approximately numerically equal to the CNEL for most environmental settings.

Conservation

The management of natural resources to prevent waste, destruction, or neglect.

Construction Pollution Prevention Plan

A construction-phase erosion, sedimentation, and polluted runoff control plan that specifies temporary Best Management Practices (BMPs) that will be implemented to minimize erosion and sedimentation during construction, and prevent contamination of runoff by construction chemicals and materials. This plan is required for all development that requires a grading permit.

Critical Facility

Facilities having a vital role in a potential emergency, the failure of which might prove catastrophic.

Culvert

A drain, ditch or conduit not incorporated in a closed system that carries drainage water under a driveway, roadway, railroad, pedestrian walk or public way. Culverts are often built to channelize streams and as part of flood control systems.

Cumulatively or cumulative effect

The incremental effects of an individual project shall be reviewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.

Curb Cut

The opening along the curb line at which point vehicles or other wheeled forms of transportation may enter or leave the roadway. Curb cuts are essential at street corners for handicap use.

Decibel (dB)

A unit used to express the relative intensity of a sound as it is heard by the human ear. The decibel measuring scale is logarithmic. Zero (0 dB) on the scale is the lowest sound level that a normal ear can detect under very quiet ("laboratory") conditions and is referred to as the "threshold" of human hearing. On the logarithmic scale, 10 decibels are 10 times more intense, 20 decibels are 100 times more intense, and 30 decibels are 1,000 times more intense than 1 decibel. See also Decibel "A-Weighted."

Decibel "A-Weighted" (dBA)

The scale for measuring sound in decibels that weights or reduces the effects of low and high frequencies in order to simulate human hearing. See also Decibel.

DEIR

Draft Environmental Impact Report.

Density, Base

The allowable residential density range for a General Plan land use classification, excluding any density bonus.

Density Bonus

An increase in allowable density above base density granted in exchange for providing affordable or senior housing.

Density, Gross

The number of housing units on a site divided by the total developable area of the site exclusive of drainages, power transmission easements or other public or semipublic uses, measured to the centerline of abutting streets having a right-of-way of 100 feet or less. Streets having a right-of-way exceeding 100 feet are assumed to be 100 feet wide for the purpose of density calculation. Streets, whether public or private, within a site to be developed are included within gross acreage.

Density, Net

The number of dwelling units per acre of developable residential land in a site, exclusive of public and private streets, drainage, power-transmission-line easements, or other public and semipublic uses.

Density, Transfer

The transfer of density calculated as suitable if applied to all developable portions of a site is transferred to allow development of the same number of housing units on a portion of the site with remaining site area restricted as permanent open space.

Design Review

The process whereby projects are reviewed for compliance with established design guidelines.

Development

On land, in or under water, the placement or erection of any solid material or structure; discharge or disposal of any dredged material or of any gaseous, liquid, solid, or thermal waste; grading, removing, dredging, mining, or extraction of any materials; change in the density or intensity of use of land, including, but not limited to, subdivision pursuant to the subdivision map act (commencing with Government Code Section 66410), and any other division of land except where the land division is brought about in connection with the purchase of such land by a public agency for public recreational use; change in the intensity of use of water, or of access thereto; construction, reconstruction, demolition, or alteration of the size of any structure, including any facility of any private, public, or municipal utility; and the removal or harvesting of major vegetation other than for agricultural purposes, kelp harvesting, and timber operations in accordance with a timber harvesting plan submitted pursuant to the provisions of the Z'berg-Nejedly Forest Practice Act of 1973 (commencing with Public Resources Code Section 4511).

Development Fees

Direct charges or dedications collected on a one-time basis for a service provided or as a condition of approval being granted by the local government. The purpose of the fee or exaction must directly relate to the need created by the development. In addition, its amount must be proportional to the cost of the service or improvement. Fee can be broken down into two major classes: 1) service charges such as permit fees covering the cost of processing development plans, connection or standby fees for installing utilities or application fees for reviewing and considering development proposals; and 2) "impact" fees levied on new development to cover the cost of infrastructure or facilities necessitated by development

Developments of Special Water Quality Concern

Certain categories of development that have the potential for greater adverse coastal water quality impacts, due to the development size, type of land use, or proximity to coastal waters. These developments shall be subject to additional requirements to protect coastal water quality.

DFG

State of California, Department of Fish and Game.

DHS

State of California, Department of Health Services.

Directly Connected Impervious Area

The area covered by a building, impermeable pavement, and/or other impervious surfaces, which drains directly into the storm drain without first flowing across permeable land area (e.g., lawns).

Discharge Directly to the Ocean or a Waterbody

Outflow from a drainage conveyance system that is composed entirely of flows from the subject development or redevelopment site, and not commingled with flows from adjacent lands.

DMG

State of California, Division of Mines and Geology.

Dwelling Unit (du)

A building or portion of a building containing one or more rooms, designed for or used by one family for living or sleeping purposes, and having a separate bathroom and only one kitchen or kitchenette. See Housing Unit.

Effective Date of the Coastal Act

February 1, 1973 for areas subject to the California Coastal Zone Conservation Act and is January 1, 1977 for those areas identified as the Coastal Zone and subject to the California Coastal Act of 1976.

Effective Date of Coastal Land Use Development Code

The date of effective certification by the Coastal Commission pursuant to Section 13544 of Title 14 of the California Code of Regulations.

Effective Date of Coastal General Plan

The date of effective certification by the Coastal Commission pursuant to Section 13544 of Title 14 of the California Code of Regulations.

Effluent

A liquid discharged as waste, such as the outflow from a sewage treatment facility or storm sewer.

EIR (Environmental Impact Report)

A report on the effect of a proposed development proposal or other major action which would significantly affect the environment. The report consists of an inventory of existing environmental conditions, projected impacts of development, and mitigation for significant adverse impacts, as required by CEQA. A General Plan EIR is necessarily more general than a site-specific EIR.

Endangered Species, California

A native species or sub-species of a bird, mammal, fish, amphibian, reptile, or plant, which is in serious danger of becoming extinct throughout all or a significant portion of its range, due to one or more factors, including loss in habitat, change in habitat, over-exploitation, predation, competition, or disease. The status is determined by the State Department of Fish and Game together with the State Fish and Game Commission.

Endangered Species, Federal

A species which is in danger of extinction throughout all or a significant portion of its range, other than the species of the Class Insect as determined to constitute a pest whose protection under the provisions of the 1973 Endangered Species Act, as amended, would present an overwhelming and overriding risk to humans. The status is determined by the U.S. Fish and Wildlife Service and the Department of the Interior.

Environmentally Sensitive Habitat Area (ESHA)

Any area in which plant or animal life or their habitats are either rare or especially valuable because of their special nature or role in the ecosystem and which could be easily disturbed or degraded by human activities and developments.

Environmentally Sensitive Habitat Area (ESHA) Buffer

A transitional area adjacent to environmentally sensitive habitat that provides distance and physical barrier to human intrusion. The purpose of this buffer area is to provide for a sufficient area to protect environmentally sensitive habitats from significant degradation resulting from future development. Buffers shall be of a sufficient size to ensure the biological integrity and preservation of the ESHA they are designed to protect. The width of the buffer area shall be a minimum of 100 feet, unless an applicant can demonstrate, after consultation and agreement with the California Department of Fish and Game, and the City, that 100 feet is not necessary to protect the resources of that particular habitat area and the adjacent upland transitional habitat function of the buffer from possible significant disruption caused by the proposed development. The buffer area shall be measured from the outside edge of the environmentally sensitive habitat areas and in no event shall be less than 30 feet in width.

EPA

Environmental Protection Agency.

Erosion

The wearing away of the ground surface as a result of the movement of wind, water, or ice.

Estuary

A coastal water body, usually semi-enclosed by land, having open, partially obstructed, or intermittent exchange with the open ocean, and in which ocean water is at least occasionally diluted by freshwater from the land. The salinity level may be periodically increased to above that of the open ocean due to evaporation. The mean high tide line shall be defined as the statistical mean of all the high tides over the cyclical period of 18.6 years, and shall be determined by reference to the records and elevations of tidal benchmarks

established by the National Ocean Survey. In areas where observations covering a period of 18.6 years are not available, a determination may be made based on observations covering a shorter period, provided they are corrected to a mean value by comparison with observations made at some suitably located control tide station.

FAR

Floor Area Ratio. The ratio between gross floor area of structures on a site and gross site area. Thus, a two-story building covering 50 percent of its site would have a FAR of 1.0.

Fault

A surface or zone of rock fracture along which there has been displacement, from a few centimeters to a few kilometers in scale.

Feasible

Capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, social, and technological factors.

Federal Flood Insurance

Affordable flood insurance offered by the federal government to property owners whose communities participate in the National Flood Insurance Program. Redlands is a participant.

FEIR

Final Environmental Impact Report.

FEMA

Federal Emergency Management Agency.

Fill

Any earth or material or substance, including pilings, placed for the purposes of erecting structures thereon, placed in a submerged or upland area.

First Public Road Paralleling the Sea

That road nearest the sea, as defined in this Section, and which meets all of the following criteria:

1. The road is lawfully open and suitable for uninterrupted use by the public;
2. The road is maintained by a public agency;
3. The road contains an improved all-weather surface open to motor vehicle traffic in at least one direction;
4. The road is not subject to any restrictions on use by the public except during an emergency or for military purposes; and
5. The road connects with other public roads providing a continuous access system and generally parallels and follows the shoreline of the sea so as to include all portions of the sea where the physical features such as bays, lagoons, estuaries and wetlands cause the waters of the sea to extend landward of the generally continuous coastline.

500-year flood

A flood which has a 0.2 percent chance of occurrence in any given year.

Floor Area, Gross

The total horizontal area in square feet of all floors within the exterior walls of a building, but not including the area of unroofed inner courts or shaft enclosures.

Formula Business

Formula Business is a business which is required by contractual or other arrangement to maintain standardized services, décor, uniforms, architecture, signs or other similar features. This shall include, but not be limited to retail sales and service, and visitor accommodations.

Freeways

Freeways are high speed, high capacity limited access facilities serving intercity and regional travel.

General Plan

A comprehensive, long-term plan mandated by State Planning Law for the physical development of a city or county and any land outside its boundaries which, in its judgment, bears relation to its planning. The plan shall consist of seven required elements: land use, circulation, open space, conservation, housing, safety, and noise. The plan must include a statement of development policies and a diagram or diagrams illustrating the policies.

Green Building Project

A project that is certifiably green by either the United States Green Building Council (LEED program) and/or Build it Green.

Habitat

The natural environment of a plant or animal.

Hardscape

Rigid portions of the urban landscape, including the surfaces of streets and sidewalks, structures, and underground utilities.

Hazardous Waste

Waste which requires special handling to avoid illness or injury to persons or damage to property. Includes, but is not limited to, inorganic mineral acids of sulfur, fluorine, chlorine, nitrogen, chromium, phosphorous, selenium and arsenic and their common salts; lead, nickel, and mercury and their inorganic salts or metallo-organic derivatives; coal, tar acids such as phenol and cresols and their salts; and all radioactive materials.

Historic Property

A historic property is a structure or site that has significant historic, architectural, or cultural value.

Household

Person or persons living in one dwelling unit.

Housing Payment

For ownership housing, this is defined as the mortgage payment, property taxes, insurance and utilities. For rental housing this is defined as rent and utilities.

Housing Unit, Multifamily

A dwelling unit in a structure designed and/or used to house three or more families living independently of each other.

Housing Unit, Single Family Detached

A dwelling unit that is structurally independent from any other residential unit.

Housing Unit, Single Family Attached

A dwelling unit that is separated from one or more adjoining dwelling units by a structural wall extending from ground level to the roof and having a separate heating system. This housing type includes duplexes, triplexes, townhouses, and condominiums. (This definition is adapted from the U.S. Census.)

Impervious Surface

Any material that prevents absorption of water into land.

Implementing actions

The ordinances, regulations, or programs which implement either the provisions of the certified local coastal program or the policies of the Coastal Act and which are submitted pursuant to Coastal Act Section 30502.

Inclusionary Unit or Inclusionary Dwelling Unit

Equivalent of Affordable Unit

Income, Above-Moderate

A household whose income exceeds 120 percent of the county median.

Income, Low

A household whose income does not exceed 80 percent of the county median.

Income, Median

The county-wide median income for a four-person household, as defined by the United States Department of Housing and Urban Development and the California Department of Housing and Community Development.

Income, Moderate

A household whose income is between 81 and 120 percent of the median family income for the county.

Income, Very-Low

A household whose income does not exceed 50 percent of the median family income for the county.

Infill

The development of new housing or other buildings on scattered vacant lots in a built-up area or on new building parcels created by permitted lot splits.

Infiltration

The downward entry of water into the surface of the soil.

Inversion

Temperature inversions limit the amount of vertical mixing of air and thus trap pollutants in the lower atmosphere where people breathe. Inversions are characterized by a layer of warmer air above a layer of cooler air, a reversal of the normal decline in temperature with increasing altitude.

Jobs-Housing Balance

A ratio used to describe the adequacy of the housing supply within a defined area to meet the needs of persons working within the same area.

Land use plan

The relevant portions of a local government's general plan, or local coastal program which are sufficiently detailed to indicate the kinds, location, and intensity of land uses, the applicable resource protection and development policies and, where necessary, a listing of implementing actions. (Coastal Act Section 30108.5)

Landmark

Defined as a building, site, or area with exceptional character or exceptional historic or aesthetic interest or value as part of the development, heritage, or cultural characteristics of the City, State, or Nation.

Landslide

The downslope movement of soil and rock.

Lateral access

Provides for public access and use along or parallel to the shoreline.

Life of the Project

Shall be 100 years.

Liquefaction

A sudden large decrease in the shearing resistance of a cohesionless soil, caused by a collapse of the structure by shock or strain, and associated with a sudden but temporary increase of the pore fluid pressure.

Local Coastal Program (LCP)

A local government's (a) land use plans, (b) zoning ordinances, (c) zoning district maps, and (d) within sensitive coastal resource area, other implementing actions, which, when taken together, meet the requirements of, and implement the provisions and policies of, the Coastal Act.

Local Streets

Local streets have the sole function of providing access to adjoining land uses. All streets not depicted on the circulation plan are local streets.

LOS

Traffic Level of Service calculated on the basis of a volume-to-capacity ratio of an intersection.

Low Impact Development

Small-scale integrated management practices designed to maintain a development site's natural hydrology by minimizing impervious surfaces and infiltrating stormwater close to its source

Low-income household

A household with income between 50 percent and 80 percent of median income.

Major Public Works and Major Energy Facilities

Facilities that cost more than one hundred thousand dollars (\$100,000) with an automatic annual increase in accordance with the Engineering News Record Construction Cost Index, except for those governed by the provisions of Public Resources Code Sections 30610, 30610.5, 30611 or 30624. Notwithstanding the criteria above, "major public works" also means publicly financed recreational facilities that serve, affect, or otherwise impact regional or statewide use of the coast by increasing or decreasing public recreational opportunities or facilities.

Median-income Household

A household with an income of between 80 percent and 100 percent of median income.

Mitigation

A specific action taken to reduce environmental impacts. Mitigation measures are required as a component of an environmental impact report (EIR) if significant impacts are identified

Moderate-income household

A household with an income of between 100 percent and 120 percent of median income.

(MS4) Municipal Separate Storm Sewer System

A conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains) owned, operated, maintained, or controlled by the City and used for the purpose of collecting, storing, transporting, or disposing of stormwater.

Non-Point Source Pollution

A pollutant source introduced from dispersed points and lacking a single, identifiable origin. Examples include automobile emissions or stormwater runoff.

Non-Stormwater Discharge

All discharges to and from a MS4 that do not originate from precipitation events (i.e., all discharges from a MS4 other than stormwater). Non-stormwater includes illicit discharges, non-prohibited discharges, and NPDES permitted discharges.

Net Acre

(See also Density, Net.) As used to calculate Floor Area Ratio (FAR), the area of a lot exclusive of land used or to be used for public or private streets or other rights-of-way, and land restricted to open space use by means other than transfer of FAR.

Nitrogen Dioxide (NO₂)

A reddish brown gas that is a byproduct of the combustion process and is a key to the ozone production process.

Noise Contour(s)

Isolines (a line on a map or chart along which there is a constant value) representing noise, measured in decibels. See also Community Noise Equivalent Level.

Non-point Source

A pollutant source introduced from dispersed points and lacking a single, identifiable origin. Examples include automobile emissions or urban run-off.

NPDES

National Pollutant Discharge Elimination System Storm Water Discharge Permits. General, group, and individual stormwater discharge permits that regulate facilities defined in Federal NPDES regulations in compliance with the Clean Water Act. The California Regional Water Quality Control Board, North Coast Region (hereinafter, Regional Board) and the State Water Resources Control Board have adopted general Storm Water Discharge Permits, including but not limited to the permits for Small MS4s, General Construction Activity, and General Industrial Activity.

100-year Flood

That flood event which has a 1-percent chance of occurrence in any one year.

Open Space

Any parcel or area of land or water devoted or committed to an open-space use as defined in the General Plan.

Ozone

An oxidant, O₃, that makes up the largest single portion of smog.

Parcel

A lot or tract of land.

Particulate Matter

Minute, separate airborne solid or liquid particles including smoke, dust, aerosols, metallic oxides, and pollen.

Passive Recreational Use

Those recreational activities typically associated with coastal open space that generally are non-structured and require minimal or no developed facilities or improvements to land. Such activities include, but are not limited to, walking, biking, jogging, hiking, dog walking, bird watching, tide-pooling, beach combing, informal sports activities such as Frisbee or ball throwing and kite-flying, nature viewing, and picnicking. Passive recreation includes ancillary facilities necessary to support visitor access to the coastal open space, including but not limited to parking lots, interpretive signage, visitor kiosks, restrooms, etc. Passive recreation activities do not include activities such as: playgrounds, community gardens, ball-fields, skate parks, etc. [City Requested MOD]

PCB

Polychlorinated biphenyl, a highly toxic, petroleum-based compound used in the past as an insulating and lubricating product.

Peak Hour Traffic

The number of vehicles passing over a designated section of a street during the busiest one-hour period during a 24-hour period.

Point Source

A source of pollutants which may be traced to a point of emissions.

Policy

A specific mandatory statement binding the City's action and establishing the standard of review to determine whether land use and development decisions, zoning changes or other City actions are consistent with the General Plan.

Pollutant

Anything which causes or contributes to pollution. Pollutants may include: paints, varnishes, and solvents; oil and other automotive fluids; non-hazardous liquid and solid wastes and yard wastes; refuse, rubbish, garbage, litter, or other discarded or abandoned objects, articles, and accumulations, so that same may cause or contribute to pollution; floatables; pesticides, herbicides, and fertilizers; hazardous substances and wastes; sewage, fecal coliform and pathogens; dissolved and particulate metals; animal wastes; wastes and residues that result from constructing a building or structure (including but not limited to sediments, slurries, and concrete rinsates); and noxious or offensive matter of any kind.

Pollution

The human-made or human-induced alteration of the quality of waters by waste to a degree which unreasonably affects, or has the potential to unreasonably affect, either the waters for beneficial uses or the facilities which serve these beneficial uses (California Water Code § 13050).

Population Holding Capacity

The population that would result if all vacant land designated for residential use within the City were built at the average density for the designated General Plan density category.

Post-Construction BMPs

A subset of Best Management Practices including structural and non-structural controls which detain, retain, filter, or educate to prevent the release of pollutants to surface waters during the final functional life of developments.

Pre-Development Runoff Discharge Rates

Runoff conditions that exist onsite immediately before the planned development activities occur. This definition is not intended to be interpreted as that period before any human-induced land activities occurred. This definition pertains to redevelopment as well as initial development.

Priority Uses, Coastal Act

Uses that the Chapter 3 policies of the Coastal Act protect in favor of other competing uses without such priority status. Generally, these priority land uses include uses that by their nature must be located on the coast to function, such as ports and commercial fishing facilities, or uses that encourage the public's use of the coast, such as various kinds of visitor-serving facilities and coastal recreational and public access uses, uses that protect existing coastal resources such as wetlands and other sensitive habitat, and coastal agriculture.

Program

An action, activity, or strategy carried out in response to adopted policy to achieve a specific goal. The City's "Programs" shall not govern the review and approval of coastal development permits.

Public Viewing Area

A location along existing scenic public roads and trails or within public parklands or beaches where there are scenic views of the beach and ocean, coastline, mountains, ridgelines, canyons and other unique natural features or areas.

Public Trust Lands

All lands subject to the Common Law Public Trust for commerce, navigation, fisheries, recreation, and other public purposes. Public trust lands include: tidelands, submerged lands, beds of navigable lakes and rivers, and historic tidelands and submerged lands that are presently filled or reclaimed, and which were subject to the Public Trust at any time.

Reclaimed Wastewater

Treated sewage or excess irrigation water with chlorine or other chemical disinfectants added.

Recreational access

Provides public access to coastal recreational resources through means other than those listed above, including but not limited to, parking facilities, viewing platforms, and blufftop parks.

Response Time

The amount of time for an emergency services response, measured from the time of the distress call until arrival on the scene.

Retention Area

A pond, pool, lagoon, or detention basin used for the storage of water runoff.

Right-of-Way

A strip of land acquired by reservation, dedication, forced dedication, prescription or condemnation, and intended to be occupied or actually occupied by a road, crosswalk, railroad, electric transmission lines, oil or gas pipeline, water line, sanitary storm sewer or other similar use.

Riparian Corridor

A general term for lands running parallel to and along a creek or stream, which lands constitute the ecosystem and potentially environmentally sensitive habitat for animal and plant life of said creek or stream.

Riparian Habitat

Land and plants bordering a water course.

Runoff Mitigation Plan

A post-construction drainage and polluted runoff control plan, which shall be required for approval of any new development. This plan shall specify long-term Site Design, Source Control, and, if necessary, Treatment Control BMPs that will be implemented to minimize polluted runoff after construction, and shall include the monitoring and maintenance plans for these BMPs.

RWQCB

Regional Water Quality Control Board.

Sea

The Pacific Ocean and all harbors, bays, channels, estuaries, salt marshes, sloughs, and other areas subject to constant or periodic tidal action through any connection with the Pacific Ocean, excluding non-estuarine rivers, streams, tributaries, creeks, and flood control and drainage channels.

Sediment

Soil, sand, and minerals washed from land into water. Sediment resulting from anthropogenic sources (i.e., human-induced land disturbance activities) is considered a pollutant.

Seiche

Oscillation of the surface of an enclosed body of water owing to earthquake shaking.

Sensitive Receptors

Members of the population who are most sensitive to air quality include children, the elderly, the acutely ill, and the chronically ill. The term "sensitive receptors" can also refer to the land use categories where these

people live or spend a significant amount of time. Such areas include residences, schools, playgrounds, child care centers, hospitals, retirement homes, and convalescent homes.

Siltation

The process of silt deposition. Silt is a loose sedimentary material composed of finely divided particles of soil or rock, often carried in cloudy suspension in water.

Site Coverage

The percentage of total site area occupied by structures, sidewalks, paved driveways, and other impervious surfaces.

Site Design BMP

Any project design feature that reduces the creation or severity of potential pollutant sources, or reduces the alteration of the project site's natural flow regime.

Source Control BMP

Any schedules of activities, prohibitions of practices, maintenance procedures, managerial practices, or operational practices that aim to prevent stormwater pollution by reducing the potential for contamination at the source of pollution.

Small secondary unit

A small secondary residential dwelling unit is a separate, complete housekeeping unit with a separate entrance, kitchen, sleeping area, and full bathroom facility, which is an attached or detached extension to a single-family structure that has no more than one bedroom and that is no greater than 600 square feet in size. Any loft area, regardless of ceiling height, is counted when calculating maximum square feet. No more than one loft area is permitted in a small secondary unit.

Solid Waste

Unwanted or discarded material, including garbage, with insufficient liquid content to be free flowing.

Source Control BMP

Any schedules of activities, prohibitions of practices, maintenance procedures, managerial practices, or operational practices that aim to prevent stormwater pollution by reducing the potential for contamination at the source of pollution.

Specific Plan

A tool for detailed design and implementation of a defined portion of the area covered by a General Plan. A specific plan may include all detailed regulations, conditions, programs, and/or proposed legislation which may be necessary or convenient for the systematic implementation of any General Plan element(s) or a portion thereof or for designating, in a comprehensive and detailed fashion, the City's or a developer's intentions with respect to a property's use and development. (Authorized and further defined in California Planning, Zoning, and Development Laws, Article 8., Sections 65450 through 65457.).

Storm Drain System

Publicly-owned facilities operated by the City by which stormwater is collected and/or conveyed, including any roads with drainage systems, municipal streets, gutters, curbs, inlets, piped storm drains, pumping facilities, retention and detention basins, natural and human-made or altered drainage channels, reservoirs, and other drainage structures which are within the City and are not part of a publicly owned treatment works as defined at 40 CFR Section 122.2.

Stormwater

Any surface water flow, runoff, or drainage which originates from precipitation (i.e., rainfall or snowmelt).

Storm Event

A rainfall event that produces more than 0.1 inch of precipitation and that is separated from the previous storm event by at least 72 hours of dry weather.

Public Trust Lands

All lands subject to the Common Law Public Trust for commerce, navigation, fisheries, recreation, and other public purposes. Public trust lands include: tidelands, submerged lands, beds of navigable lakes and rivers, and historic tidelands and submerged lands that are presently filled or reclaimed, and which were subject to the Public Trust at any time.

Reclaimed Wastewater

Treated sewage or excess irrigation water with chlorine or other chemical disinfectants added.

Recreational access

Provides public access to coastal recreational resources through means other than those listed above, including but not limited to, parking facilities, viewing platforms, and blufftop parks.

Response Time

The amount of time for an emergency services response, measured from the time of the distress call until arrival on the scene.

Retention Area

A pond, pool, lagoon, or detention basin used for the storage of water runoff.

Right-of-Way

A strip of land acquired by reservation, dedication, forced dedication, prescription or condemnation, and intended to be occupied or actually occupied by a road, crosswalk, railroad, electric transmission lines, oil or gas pipeline, water line, sanitary storm sewer or other similar use.

Riparian Corridor

A general term for lands running parallel to and along a creek or stream, which lands constitute the ecosystem and potentially environmentally sensitive habitat for animal and plant life of said creek or stream.

Riparian Habitat

Land and plants bordering a water course.

Runoff Mitigation Plan

A post-construction drainage and polluted runoff control plan, which shall be required for approval of any new development. This plan shall specify long-term Site Design, Source Control, and, if necessary, Treatment Control BMPs that will be implemented to minimize polluted runoff after construction, and shall include the monitoring and maintenance plans for these BMPs.

RWQCB

Regional Water Quality Control Board.

Sea

The Pacific Ocean and all harbors, bays, channels, estuaries, salt marshes, sloughs, and other areas subject to constant or periodic tidal action through any connection with the Pacific Ocean, excluding non-estuarine rivers, streams, tributaries, creeks, and flood control and drainage channels.

Sediment

Soil, sand, and minerals washed from land into water. Sediment resulting from anthropogenic sources (i.e., human-induced land disturbance activities) is considered a pollutant.

Seiche

Oscillation of the surface of an enclosed body of water owing to earthquake shaking.

Sensitive Receptors

Members of the population who are most sensitive to air quality include children, the elderly, the acutely ill, and the chronically ill. The term "sensitive receptors" can also refer to the land use categories where these

people live or spend a significant amount of time. Such areas include residences, schools, playgrounds, child care centers, hospitals, retirement homes, and convalescent homes.

Siltation

The process of silt deposition. Silt is a loose sedimentary material composed of finely divided particles of soil or rock, often carried in cloudy suspension in water.

Site Coverage

The percentage of total site area occupied by structures, sidewalks, paved driveways, and other impervious surfaces.

Site Design BMP

Any project design feature that reduces the creation or severity of potential pollutant sources, or reduces the alteration of the project site's natural flow regime.

Source Control BMP

Any schedules of activities, prohibitions of practices, maintenance procedures, managerial practices, or operational practices that aim to prevent stormwater pollution by reducing the potential for contamination at the source of pollution.

Small secondary unit

A small secondary residential dwelling unit is a separate, complete housekeeping unit with a separate entrance, kitchen, sleeping area, and full bathroom facility, which is an attached or detached extension to a single-family structure that has no more than one bedroom and that is no greater than 600 square feet in size. Any loft area, regardless of ceiling height, is counted when calculating maximum square feet. No more than one loft area is permitted in a small secondary unit.

Solid Waste

Unwanted or discarded material, including garbage, with insufficient liquid content to be free flowing.

Source Control BMP

Any schedules of activities, prohibitions of practices, maintenance procedures, managerial practices, or operational practices that aim to prevent stormwater pollution by reducing the potential for contamination at the source of pollution.

Specific Plan

A tool for detailed design and implementation of a defined portion of the area covered by a General Plan. A specific plan may include all detailed regulations, conditions, programs, and/or proposed legislation which may be necessary or convenient for the systematic implementation of any General Plan element(s) or a portion thereof or for designating, in a comprehensive and detailed fashion, the City's or a developer's intentions with respect to a property's use and development. (Authorized and further defined in California Planning, Zoning, and Development Laws, Article 8., Sections 65450 through 65457.).

Storm Drain System

Publicly-owned facilities operated by the City by which stormwater is collected and/or conveyed, including any roads with drainage systems, municipal streets, gutters, curbs, inlets, piped storm drains, pumping facilities, retention and detention basins, natural and human-made or altered drainage channels, reservoirs, and other drainage structures which are within the City and are not part of a publicly owned treatment works as defined at 40 CFR Section 122.2.

Stormwater

Any surface water flow, runoff, or drainage which originates from precipitation (i.e., rainfall or snowmelt).

Storm Event

A rainfall event that produces more than 0.1 inch of precipitation and that is separated from the previous storm event by at least 72 hours of dry weather.

Stream

A stream mapped by USGS on the 7.5 minute quadrangle series, or identified in a local coastal program. The bank of a stream shall be defined as the watershed and relatively permanent elevation or acclivity at the outer line of the stream channel which separates the bed from the adjacent upland, whether valley or hill, and serves to confine the water within the bed and to preserve the course of the stream. In areas where a stream has no discernable bank, the boundary shall be measured from the line closest to the stream where riparian vegetation is permanently established.

Structural BMP

Any structural facility designed and constructed to mitigate the adverse impacts of stormwater runoff pollution (e.g., a canopy or enclosure for an outdoor trash storage area). This category may include both Treatment Control BMPs and Source Control BMPs.

SSZ

Special Studies Zones, as defined under the Alquist-Priolo Special Studies Zone Act, 1973.

Subdivision

The division of a lot, tract, or parcel of land into two or more lots, tracts, parcels, or other divisions of land for sale, development, or lease.

Subsidence

The gradual sinking of land as a result of natural or man-made causes.

Substrate; Substratum

The material of which something is made and from which it derives its special qualities.

TDM

Travel demand management.

Threatened Species, California

A native species or sub-species of a bird, mammal, fish, amphibian, reptile, or plant that, although not currently threatened with extinction, is likely to become an endangered species in the foreseeable future in the absence of special protection and management efforts required by Chapter 1.5 of the State Department of Fish and Game Code.

Threatened Species, Federal

A species which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

Tidelands

All lands which are located between the lines of mean high tide and mean low tide.

Trail access

Provides public access (i.e. hiking and equestrian) along a coastal or mountain recreational path, including to and along canyons, rivers, streams, wetlands, lagoons, freshwater marshes, significant habitat and open space areas or similar resource areas, and which also may link inland trails or recreational facilities to the shoreline.

Transit

Public transportation provided by van, bus, or rail vehicle.

Treatment

The application of engineered systems that use physical, chemical, or biological processes to remove pollutants from stormwater. Such processes include, but are not limited to, filtration, gravity settling, media adsorption, biodegradation, biological uptake, chemical oxidation, and UV radiation.

Treatment Control BMP

Any engineered system designed to remove pollutants from stormwater by simple gravity settling of particulate pollutants, filtration, biological uptake, media adsorption, or any other physical, biological, or chemical process.

Trip

A one-way journey that proceeds from one origin to one destination. Each trip has two trip ends.

Trip-Generation Rate

The number of vehicle trips per acre, per 1,000 square feet of floor area, per housing unit or other unit of measure during a stated period. Measured trip-generation rates are used to project the impact of development on the traffic circulation system and as a basis for regulating the intensity of development.

USDA

United States Department of Agriculture.

USFS

United States Fish and Wildlife Service.

USGS

United States Geological Survey.

USGS Quadrangles

A U.S. Geological Survey-produced map showing natural and cultural features for an area extending across 15 minutes of longitude and 7.5 minutes of latitude.

Vertical access

Provides public access from the first public road, trail, or public use area nearest the sea to the publicly owned shoreline, tidelands, or established lateral access perpendicular to the shore.

Volume to Capacity (V/C) Ratio

A measure of the operating capacity of a roadway or intersection, in terms of the number of vehicles passing through, divided by the number of vehicles that theoretically could pass through when the roadway or intersection is operating at its designed capacity.

Waste Stream

All solid, semisolid and liquid wastes including garbage, refuse, paper, rubbish, ashes, industrial wastes, demolition and construction wastes, abandoned vehicles and parts thereof, discarded home and industrial appliances, manure, vegetable or animal solid and semisolid wastes.

Water Quality Management Plan

A plan to control post-construction stormwater runoff and pollution, certified by a California Registered Civil Engineer, which shall be required for all Developments of Special Water Quality Concern. The WQMP supplements the Runoff Mitigation Plan required for all development. The WQMP shall include hydrologic calculations that estimate increases in pollutant loads and runoff flows resulting from the proposed development, and specify the BMPs that will be implemented to minimize post-construction water quality impacts.

Waterway

A natural waterway can support its own environment of vegetation, fowl, fish, and reptiles, and appears natural.

Wetland

(1)Wetland means lands which may be covered periodically or permanently with shallow water and include saltwater marshes, freshwater marshes, open or closed brackish water marshes, swamps, mudflats, and

fens. Wetlands are usually lands where the water table is at, near or above the land surface long enough to do either of the following: a) promote the formation of (hydric) soils that are saturated with water at or near the surface and are deficient of oxygen long enough during the growing season to result in soil properties that reflect dominate wetness characteristics near the soils surface (within 10"); or b) support the growth of hydrophytic plants which grow in water or in wet habitats, and include those types of wetlands where vegetation is lacking and soil is poorly developed or absent as a result of frequent and drastic fluctuations of surface water levels, wave action, water flow, turbidity or high concentrations of salts or other substances in the substrate. Such wetlands can be recognized by the presence of surface water or saturated substrate at some time during each year and their location within, or adjacent to, vegetated wetlands or deep-water habitats. The upland limit of a wetland shall be defined as:

- A. the boundary between land with predominantly hydrophytic cover and land with predominantly mesophytic or xerophytic cover;
- B. the boundary between soil that is predominantly hydric and soil that is predominantly nonhydric; or
- C. in the case of wetlands without vegetation or soils, the boundary between land that is flooded or saturated at some time during years of normal precipitation, and land that is not.

(2) The term "wetland" shall not include wetland habitat created by the presence of and associated with agricultural ponds and reservoirs where:

- A. the pond or reservoir was in fact constructed by a farmer or rancher for agricultural purposes; and
- B. there is no evidence (e.g., aerial photographs, historical survey, etc.) showing that wetland habitat pre-dated the existence of the pond or reservoir. Areas with drained hydric soils that are no longer capable of supporting hydrophytes shall not be considered wetlands.

Zoning District

A specifically delineated area on a zoning map within which regulations and requirements uniformly govern the use, placement, spacing, and size of buildings, open spaces, and other facilities.

Zoning Ordinance

establishes regulations governing the use, placement, spacing, and size of buildings, open spaces, and other facilities.
